2nd Symposium of Systematics and Biogeography of Minas Gerais State

The second *Symposium of Systematics and Biogeography of Minas Gerais State* will be held in 2014 in Diamantina, Brazil. Building from the first symposium in 2012 (see page 88), the 2014 Symposium will have a greater diversity of themes

related to systematics and biogeography, more specialists, and will aim to promote closer interactions between students and researchers for the promotion of biogeography in Brazil, building on the achievements of the first Symposium.

If your department is searching for a new faculty position this year in biogeography, ecology, evolution, geography and related disciplines, consider advocating for an advert to be placed in the September issue of *Frontiers of Biogeography* (to be published ~3rd week of September). A quarter-page advertisement (~150 words, with formatting) will reach approximately 1000 active biogeographers (including many students and postdocs) globally via the journal and additional free advertisement on the IBS blog and an highlight on Facebook at a cost of only \$50; half- and full-page advertisements are available for proportional cost. In addition, you will be helping our junior members and supporting the society's journal.
