California Digital Library *UCLA*

Harvard University

Imagine ...

... a fast-moving event unfolding online as much as on the ground

How can we respond as a community appropriately and responsibly?

Imagine ...

Harnessing the domain knowledge and technical capabilities of the entire *community*

Enabling *local* collection development decisions based on *global* information

Complementary, cooperative, and *collaborative* collecting

Institutional participation at a level *commensurate* with local expertise and capacity

Increasing scholarly and public *awareness*

Centralized *catalog* of collection- and seed-level metadata

Establishment of thematic collecting *projects*

Open *nomination* of topical seed URLs by interested stakeholders

Claiming of seeds by archival institutions intending to harvest

Holdings records for seeds actually harvested

Thematic *discovery* of web archives of interest

Why cobWeb ?

The demands of archiving the web in comprehensive breadth or thematic depth *exceeds* the technical and financial capacity of any one institution

Curators cannot make rational collection development *decisions* without knowledge of what others have collected or intent to collect

Relevant seed URLs can be meaningfully *contributed* by various stakeholders: curators, archivists, subject area specialists, scholars, journalists, event participants, and the public

Apportioning collection responsibility into granular pieces encourages *participation* by smaller institutions and programs

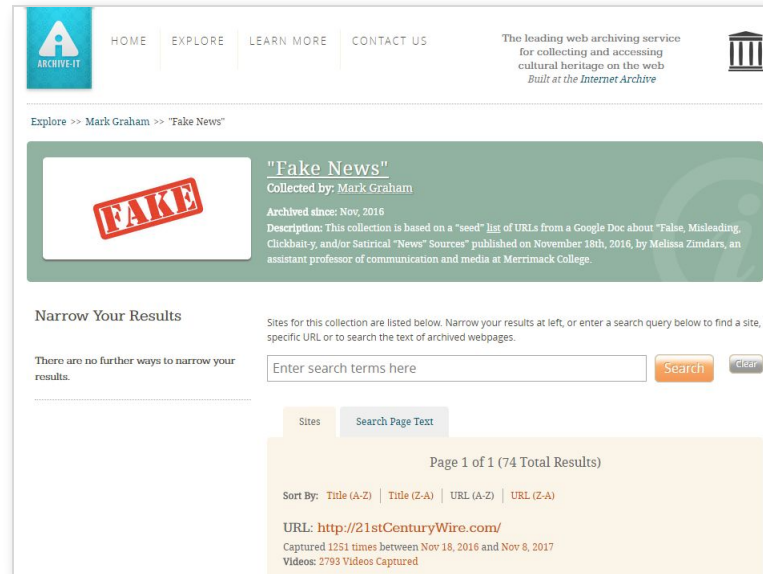

Archive of the California Government Domain, CA.gov
Collected by: [University of California Libraries](#)
Archived since: Apr, 2015
Description: This archive preserves access to hundreds of California state agency sites. State agencies utilize their websites to publish everything from press releases, agendas, minutes, events, reports and statistics. This material is especially volatile as leadership changes or as time sensitive issues are no longer on agendas or in the news. The archive is maintained by government information specialists and web curators across several UC campuses, the Stanford University Libraries and the California State Library.
Subject: [Government - US States](#), [Politics & Elections](#), [Government](#)

CA.gov archive of the California state government domain

- Collaborative effort of government information librarians at UC and Stanford and the CA State Library and CA State Archive
- More than 700 seeds (URLs) captured total
- Collecting 2007-present, major content refresh 2016-2017
- Coordinating workflows, approaches to QA and metadata

Peter Broadwell at UCLA was well into collecting “fake” news sites before it occurred to him to wonder if anyone else was doing something similar

There was; Mark Graham at IA

The screenshot shows the Internet Archive interface. At the top, there is a navigation bar with links for HOME, EXPLORE, LEARN MORE, and CONTACT US. The main heading is "Fake News", collected by Mark Graham. A red stamp with the word "FAKE" is visible on the left. The description states: "Description: This collection is based on a 'seed' list of URLs from a Google Doc about 'False, Misleading, Clickbait-y, and/or Satirical 'News' Sources' published on November 18th, 2016, by Melissa Zimdars, an assistant professor of communication and media at Merrimack College." Below the description, there is a search bar and a "Narrow Your Results" section. The search results show "Page 1 of 1 (74 Total Results)" and a list of results. The first result is for the URL <http://21stCenturyWire.com/>, which was captured 1251 times between Nov 18, 2016 and Nov 8, 2017, and has 2793 videos captured.

Collaborative Web Archiving Projects

- UC Libraries, Stanford, CA State Library, CA State Archives
 - CA.gov
- Ivy Plus Libraries Web Resources Collection Program
 - CAUSEWAY, Contemporary Composers
- IIPC Content Development Group
 - Olympics, Global News
- Internet Archive, LoC, Stanford, CDL, et al
 - End of Term
- Canadian Web Archiving Coalition (CWAC)
- Preservation of Electronic Government Information (PEGI)

One-year collaborative project between CDL, Harvard University, and UCLA,
funded by IMLS #LG-70-16-0093-16

Public online service hosted at CDL

Targeting initial production release in conjunction with the November 2018
IIPC General Assembly and Web Archiving Conference

<https://cdlib.org/cobweb>

<https://github.com/CobwebOrg/cobweb>

The Team

Project and Outreach Management	CDL
Development and Technical Oversight	UCLA
UI/UX Development and Testing	Harvard

Our Process

Agile approach (two-week sprints), iterative and collaborative approaches:

- collecting user data
- translating user data -> workflows -> functionality/interfaces
- confirming functional reqs
- sprint prep/retros

Conferences/Professional Associations:

- SAA (Web Archiving Section)
- AoIR
- Dodging the Memory Hole
- UC-DLFx
- CNI
- IIPC

Platforms/Communities:

- Internet Archive's Archive-It
- Rhizome's webrecorder.io

cobWeb timeline

Activity	Dates
Develop user personas and user stories, user data gathering	August – October 2017
Establish functional requirements, refine metadata specifications	August 2017 – January 2018
Develop core functionality, import sample holdings metadata	September – November 2017
Draft workflows and wireframes	October – November 2017
First prototype rollout	November 2017
User testing, data gathering	February - March 2018
Iterative development on prototype refinements, continue importing holdings metadata	December 2017 – March 2018
Second prototype rollout	March/April 2018
Beta testing	April - September 2018
Production system rollout	September/October 2018
Sustainability planning	July – October 2018

Next steps

Cobweb is a tool for collecting communities...

Next steps

- Keep learning about your collaborative collecting projects and workflows
- Confirming functional requirements
- Refining and validating use cases
- Engaging testers to walk through prototypes (early spring 2018)
- Iterative development, responding to user testing findings

Next, next steps

Cobweb is a tool for collecting communities
and perhaps not just those collecting web resources...

Q & A

Questions for us?
Questions *from* us!

Cobweb affordances for:

- Establishing collecting (collection management?) projects
- Nominating resources for...
- Claiming intentions for nominated resources
- Reporting holdings
