Churches working to save more than souls

This longform television project examines the growing popularity of singles ministries--social and religious support groups for the unmarried--within historically black churches.

In America today, black women are less likely to be married than any other group--only 42 percent according to a Yale study. For black, educated women the likelihood of marriage drops further--only around 30 percent are married.

Black women are also one of the most religious groups in America. As such, many of them are turning to church to find solutions to low marriage rates. And many churches are responding to this demand through singles ministries.

Traditionally, single ministries have been a place for older, widowed or divorced congregants to gather together for fellowship and prayer. Today, they are populated primarily with younger members and play host to social activities outside the church. While they make no explicit claims of being a matchmaking service, most ministries feature regular discussion groups on dating practices and strategies for finding a life companion.

Nowhere is this trend in singles ministries more visible than in the D.C. Metropolitan Area where only 17 percent of African Americans are married. This project focuses on the popular singles ministry at Alfred Street Baptist Church in nearby Alexandria, Va. Interviews include Monique Williams, an active singles ministry member who believes these organization are a critical service in black churches; Rodney Garrett, the director of the singles ministry who speaks to the big shifts in the church's demographics (he says 80% of new members are single, mostly female); and Brittini Brown, a church member who thinks these ministries exploit the circumstances of her fellow female congregants and perpetuate negative racial stereotypes. The perspectives of these characters reflect an ongoing debate in the black community. Some believe the church is in the best position to foster healthy, happy marriages. Others believe churches are hyping up singles ministries to attract new members, but have yet to see these organizations produce remarkable results for men or women.

Our goal in producing this report on singles ministries is to offer our viewers a side of the black marriage story that the mainstream media hasn't covered in depth, and to examine the benefits and limitations of these organizations.
