ENCOUNTER WITH AN ANGRY GOD

*Recollections of My Life with
John Peabody Harrington*

By CAROBETH LAIRD

The Angry God, Gargantua, Don Quixote, Captain Ahab, King Kong, and Pecos Bill of this book is a legendary anthropologist named John Peabody Harrington . . . Never before have I heard of an exciting new literary talent bursting forth at the age of 80. But now, I am convinced, we have one. Carobeth Laird's story of how she married the Genius Anthropologist and left him for one of the natives he was studying manages to be at once tender and ruthless—ruthlessly funny—and to offer an amazing slice of American life.

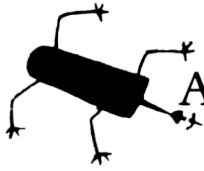

—Tom Wolfe
Author of *The Electric
Kool-Aid Acid Test*, etc.

Quoted by Permission of *Harper's Bookletter*

Hardcover \$8.95 – 230 pages

DECEMBER'S CHILD

A Book of Chumash Oral Traditions

Edited, with an analysis by

Thomas C. Blackburn

This first large collection of oral literature from any Southern California Indian tribe is also the first collection of any kind from the Chumash, a group that seems to have had the most complex culture of the area and yet is the least known. Blackburn is able to shed new light on a fascinating but previously obscure culture by analyzing in terms of recurrent themes and patterns a highly diverse corpus of 111 previously unpublished narratives drawn from the archival materials of the ethnographer John P. Harrington. Blackburn suggests that oral traditions should be reexamined in light of recent developments in cognitive, rather than affective research.

384 pages, illustrated, \$12.95

TEMALPAKH

(FROM THE EARTH)

*CAHUILLA INDIAN KNOWLEDGE
AND USAGE OF PLANTS*

By Lowell John Bean and Katherine Siva Saubel

Paperback \$6.50 retail, hardcover \$10.00

Malki Museum Press is proud to announce the publication of TEMALPAKH (FROM THE EARTH), an ethnobotany of the Cahuilla Indians of southern California which encompasses the knowledge about and usage of more than 250 native plants.

More than ten years of research have been devoted to gathering the data for this work, which is one of the most detailed ethnobotanies ever published on a North American Indian group. The work is excellently illustrated with numerous photographs of plants by the Pasadena photographer Nancy Bercovitz and with many historical photographs from museums.

Indian people, laymen, and scholars will all profit from an immensely readable book that is certain to become a classic in its field. It is rich in intriguing details of Cahuilla plant lore and presents a broad survey of plant uses for medicine, food, and manufacture. The studies of Bean and Saubel reveal the high degree of sophisticated knowledge possessed by the Cahuilla concerning their plant environment, suggest the acuteness of their ecological awareness, and have implications of considerable significance for southern California Indian research as a whole.
