## RECENT DISSERTATIONS OF INTEREST

---

The following list of dissertations, all of which have appeared in the last decade, is intended to call attention to significant new scholarship that might be relevant to a reader's particular research topic but that might otherwise be overlooked. Some works on the list have since been published in one form or another, though most have not. Summaries can be found in *Dissertation Abstracts*, which is readily available online. Readers are urged to bring any relevant dissertation that may have been inadvertently left off the list to the attention of the editors.
