## iTACA (Mosaic II) (2013) for Alto/Baritone Sax and Electronics

---

iTACA is inspired by Homer's Odyssey. Like it, this piece is organized in three sections, which in our case coincides with three sound spaces. Among these areas, the saxophone will perform a series of voyages where the concept of mosaic will have its greatest exponent. In the piece there are moments of intertextuality as recited in several fragments homonymous poem of the Alexandrian poet Kaváfis Konstantinos by the saxophone, or use in the electronics text and melody Seikilos epitaph.

iTACA is a travel, where the most important isn't to arrive to destination, otherwise to make the travel and the experience. The work of the sound and the use of instrumental possibilities, will be the "leitmotif" of the work, which will produce an organic body in constant movement, so that in many instances the sax will merge with electronics and vice versa.

The electronic part it's made of live electronics and prerecorded saxophone sounds creating at different times, different atmospheres materials. The spatialization in this work -with four loudspeaker- is very important, because the idea is to submerge the public into the sounds, thereby the listening will be active.

It was premiered at the XI Festival of Spanish Music in Cadiz, on 25th November 2013, within the Chair of Composition Course "Manuel de Falla" under the tutelage of composer Horacio Vaggione by the dedicatee of the piece: Guillermo Martínez (saxophone) and Javier Campaña (electronics), Taller Sonoro Ensemble members.

*Enrique Bustos*

"While you live, shine,  
not suffer for it at all.  
Life is short,  
and determines the final time".

**Epitaph Seikilos**  
(Greek melody I A.D. century)

*"... get there, here's your destination ...  
... as rich you win on the road.  
... ports before you ignored it ...  
... without it you could never depart."*

**Konstantinos Kavafis**  
(Excerpt from the poem "Ithaca")

## INDICATIONS

Air

Air with sound (50%) or percent value.

Air (30%) and sound (70%)

Sound

Transition

*colpo di lingua*

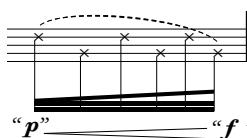

Small golpi di lingua

*f* ————— *mp*

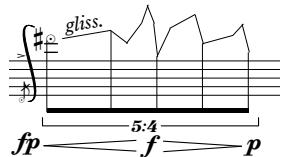

Slap

Noise keys

*suono tromba*

Trumpet sound: play inside the tube without mouthpiece, like a trumpet

*smorz.*

Smorzando: move the air column like a vibrato.

Move the sax left and right or vice-versa

*Voz*

*trans.*

*pp*

*Ah!*

*ff*

Singing inside the instrument, let outfall a shout

Without measure, the time is specific in seconds..

accell. or rit. progressive

## TECHNICS INSTRUCTIONS:

- The saxes haben to be amplified.
- The hall has been in penumbra, only must illuminate the A, B, C player place.

## ELECTRONICS (Max/MSP path)

Material	Concept
a	Surround air as a sound wave
b	Noise keys worked spatially
c	Small slap and golpi di lingua treated and processed electronically
d	Sounds kept flautato creating a very light atmosphere
e	Multiphonic Tremolo (c. 22)
f	Multiphonic in pp spatially
g	Bass, hoarse sound
h	Sib transformed repeat (extensible to other tones)
i	Recited text (whispered) upside down Seikilos epitaph, spatialized
j	Sounds murmurs spatially on alto sax
k	Sounds spatially held around the Sib (variation of "h")
l	Melody Seikilos epitaph, with transformations and pedal note

## LIVE ELECTRONICS

Resonance  
 granulated sound  
 Distortion  
 Transposition

# ÍTACA (Mosaico II)

for Baritone/Alto Saxophone and Electronics
