**TRANSIT
ORIENTED
LOS ANGELES:**
STATION AREA
COMPARISON APPENDIX

ACKNOWLEDGEMENTS AND DISCLAIMER

This report was made possible through the support of Los Angeles County Metropolitan Transportation Authority (Metro) and the Urban Land Institute - Los Angeles (ULI-LA) and is a companion to “Transit Oriented Los Angeles: Envisioning an Equitable and Thriving Future” published in November 2018.

This report is disseminated in the interest of information exchanges and the contents of the report reflect the views of the authors who are responsible for the facts and accuracy of the data presented therein. The contents do not necessarily reflect the official views or policies of Metro or ULI-LA. This report does not constitute an endorsement by Metro or ULI-LA of any product or policy described therein.

ABOUT THE UCLA LEWIS CENTER FOR REGIONAL POLICY STUDIES

The Ralph & Goldy Lewis Center for Regional Policy Studies is a research center in the UCLA Luskin School of Public Affairs. The Lewis Center advances research on how people live, move, and work in the Los Angeles region, with a focus on policies and interventions that provide paths out of poverty. Since 1989, Lewis Center scholars and staff have produced high-quality research on transportation access, housing affordability, labor, immigration, and many other topics, with a focus on the policy impact on vulnerable populations. The Center produced programs and events alongside accessible publications for policymakers, public officials, students, opinion leaders, and the public.

ABOUT LAplus

LAplus, a project of Community Partners, is an urban policy think tank with the mission to inspire and advance LA’s positive urban future. Through research, policy analysis, collaborations and communications, LAplus promotes Los Angeles’s future as an open city that makes space for diverse residents and allows for innovation, prototyping, growth, and change; and as a region in which more people and organizations can be city-makers helping shape this future.

INTRODUCTION

In “Transit-Oriented Los Angeles: Envisioning an Equitable and Thriving Future” our team presented case studies from seven station areas in the Los Angeles region to understand current and future housing capacity.

Leading up to the case studies, we explored the connections between density and its effects on housing production, neighborhood amenities, and sustainability outcomes. During this review and analysis process, we gathered a variety of data and comparisons between the station areas. This map appendix report takes the seven station areas and compares their characteristics in terms of:

- Population density
- Transit ridership
- Parcel-level housing density
- Housing units and planned housing capacity
- Zoning class
- Building age
- Parking lot availability
- Activity density
- Job density
- Neighborhood amenities

The Los Angeles region is known for its great diversity of neighborhoods and by comparing these station area characteristics, we can see these differences at a glance. Many of these characteristics are interrelated to each other. For example, Wilshire/Vermont has the highest level of transit ridership (on both rail and bus), as well as the highest levels of population and activity density, housing capacity, and neighborhood amenities as measured by Walk score®. This result is not surprising as the existing literature explains the mutually beneficial and strong relationship between all of these factors.

The purpose of this appendix is to help readers further explore similarities and differences in these seven station areas and to be inspired to consider how different features shape neighborhoods around rail stations throughout Los Angeles County.

Case study station area comparison locations

POPULATION DENSITIES BY CENSUS BLOCK

Wilshire/Vermont 64 people/acre

Fillmore 13 people/acre

Culver City 17 people/acre

Van Nuys 23 people/acre

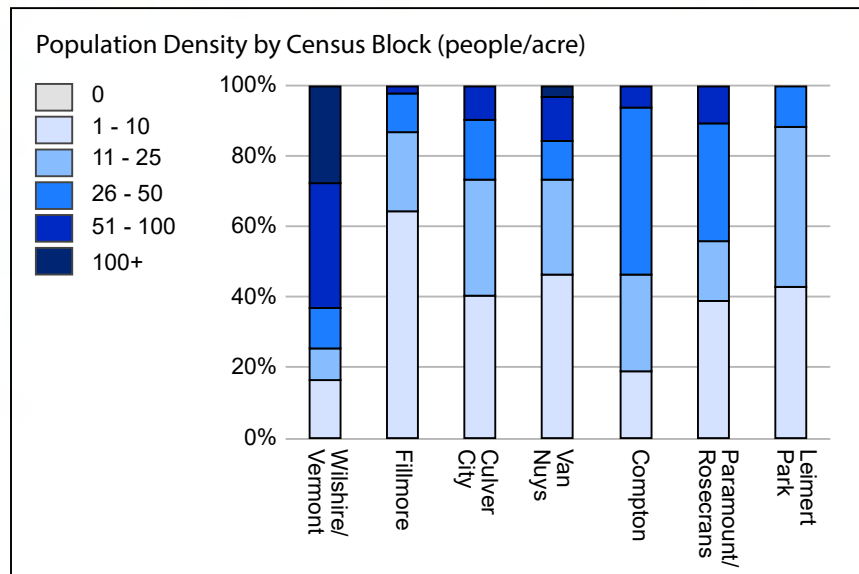

Compton 21 people/acre

Paramount/Rosecrans 19 people/acre

Leimert Park 15 people/acre

TRANSIT RIDERSHIP

Wilshire/Vermont
Avg. daily boardings (Metro): 26,178

Fillmore
Avg. daily boardings (Metro): 5,473

Culver City
Avg. daily boardings (Metro): 4,848

Van Nuys
Avg. daily boardings (Metro): 6,523

Compton
Avg. daily boardings (Metro): 4,630

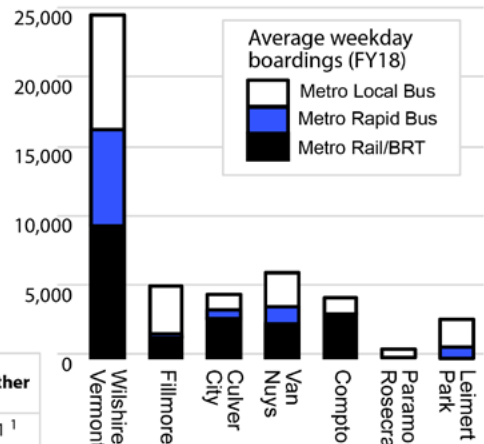

Paramount/Rosecrans
Avg. daily boardings (Metro): 592

Leimert Park
Avg. daily boardings (Metro): 2,915

Metro avg. weekday boardings (FY18)

Stops by station area

	Metro Rapid	Metro Local	Other
Wilshire/Vermont	2	7	1 ¹
Fillmore	1	2	1 ²
Culver City	1	1	4 ³
Van Nuys	2	4	1 ¹
Compton	0	6	6 ⁴
Paramount	0	4	0
Leimert Park	3	4	1 ¹

- LADOT DASH
- Pasadena Transit
- Culver City Big Green Bus and Santa Monica Big Blue Bus
- Compton Transit and Gardena Transit

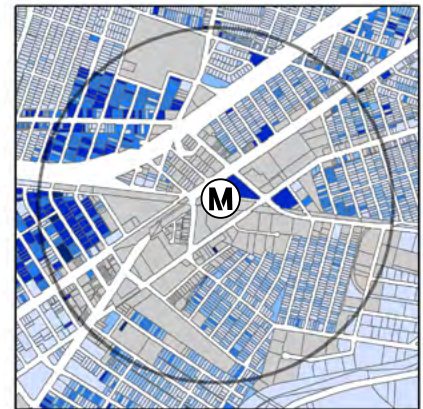

HOUSING DENSITIES BY PARCEL

Wilshire/Vermont 37 units/acre

Fillmore 9 units/acre

Culver City 8 units/acre

Van Nuys 8 units/acre

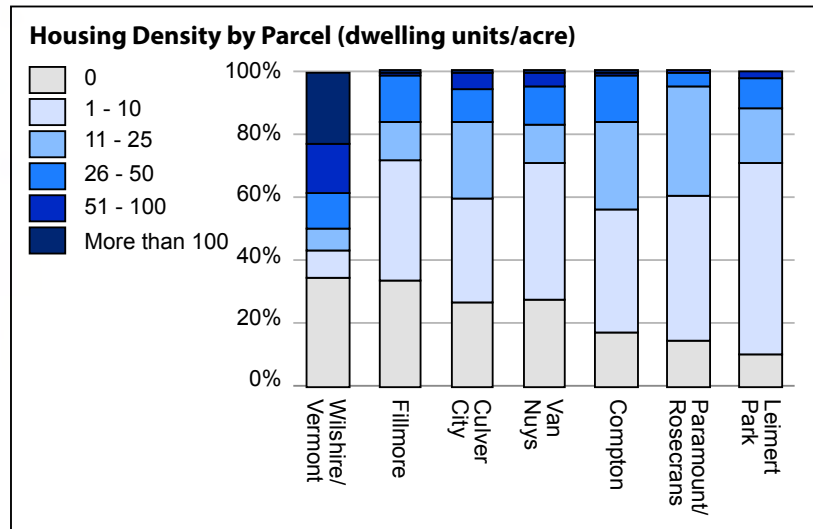

Compton 7 units/acre

Paramount/Rosecrans 6 units/acre

Leimert Park 5 units/acre

CURRENT HOUSING UNITS & PLANNED HOUSING CAPACITY

Wilshire/Vermont

Fillmore

Culver City

BUILDING AGES BY YEAR BUILT

Wilshire/Vermont (mean: 1951)

Fillmore (mean: 1952)

Culver City (mean: 1950)

Van Nuys (mean: 1955)

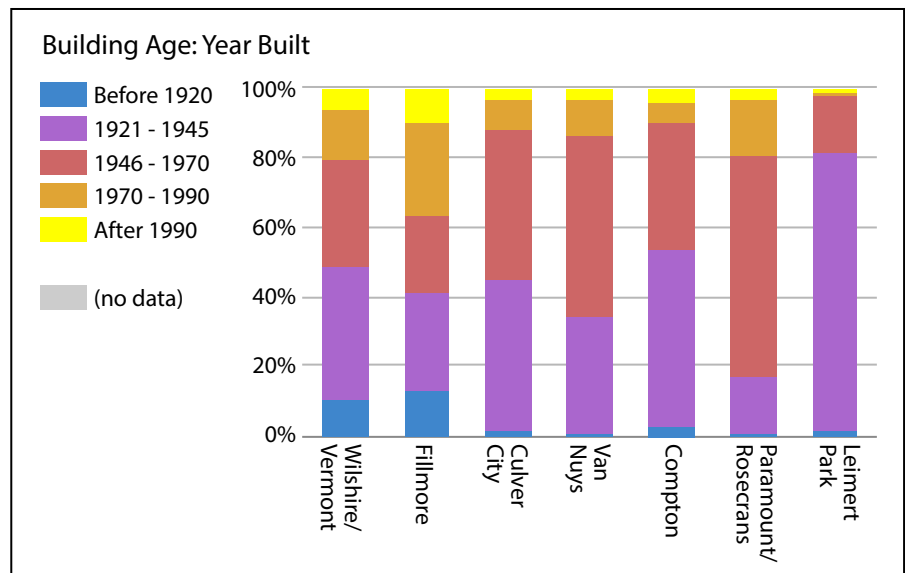

Compton (mean: 1947)

Paramount/Rosecrans (mean: 1959)

Leimert Park (mean: 1938)

ADJACENT SURFACE PARKING LOTS

Wilshire/Vermont
52.2 surface parking acres (13% area)

Fillmore
53.7 surface parking acres (13% area)

Culver City
37.6 surface parking acres (10% area)

Van Nuys
62.7 surface parking acres (16% area)

Compton
59.1 surface parking acres (14% area)

Paramount/Rosecrans
59.1 surface parking acres (30% area)

Leimert Park
19.7 surface parking acres (5% area)

ACTIVITY DENSITY

Wilshire/Vermont
 $64 \text{ pop/ac} + 35 \text{ jobs/ac} = 99 \text{ AU/ac}$

Fillmore
 $13 \text{ pop/ac} + 24 \text{ jobs/ac} = 37 \text{ AU/ac}$

Culver City
 $17 \text{ pop/ac} + 18 \text{ jobs/ac} = 35 \text{ AU/ac}$

Van Nuys
 $23 \text{ pop/ac} + 12 \text{ jobs/ac} = 35 \text{ AU/ac}$

Compton
 $21 \text{ pop/ac} + 4 \text{ jobs/ac} = 25 \text{ AU/ac}$

Paramount/Rosecrans
 $19 \text{ pop/ac} + 5 \text{ jobs/ac} = 24 \text{ AU/ac}$

Leimert Park
 $15 \text{ pop/ac} + 3 \text{ jobs/ac} = 18 \text{ AU/ac}$

JOB DENSITY BY SECTOR

Wilshire/Vermont 35 jobs/acre

Fillmore 24 jobs/acre

Culver City 18 jobs/acre

Van Nuys 12 jobs/acre

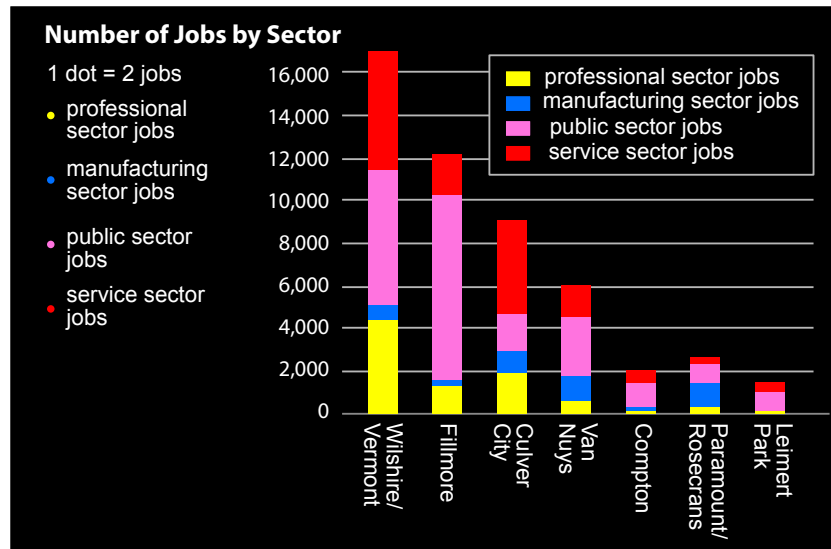

Compton 4 jobs/acre

Paramount/Rosecrans 5 jobs/acre

Leimert Park 3 jobs/acre

NEIGHBORHOOD AMENITIES

STATION	Overall	Culture	Dining	Errands	Grocery	Parks	Schools	Shopping
