**Tabulations from a Late-April-Early May 2021 Survey
of California Registered Voters
About Several Issues Related to Vaccine Verification**

by the
Berkeley IGS Poll
Institute of Governmental Studies
University of California, Berkeley

April 29-May 5, 2021

Introduction

The statistical tabulations in this volume are based on a *Berkeley IGS Poll* completed by the Institute of Governmental Studies (IGS) at the University of California, Berkeley. The poll was administered online in English and Spanish April 29 – May 5, 2021 among 10,289 California registered voters. To cover broad range of issues and still minimize respondent fatigue, the overall sample was divided into two random samples of 5,036 and 5,253 voters on some questions.

The survey was administered by distributing email invitations to stratified random samples of the state's registered voters. Each email invited voters to participate in a non-partisan survey conducted by the University and provided a link to the IGS website where the survey was housed. Reminder emails were distributed to non-responding voters and an opt out link was provided for voters not wishing to participate and not wanting to receive further email invitations.

Samples of registered voters with email addresses were provided to IGS by Political Data, Inc., a leading supplier of registered voter lists in California. The email addresses of voters were derived from information contained on the state's official voter registration rolls. Prior to the distribution of the emails, the overall sample was stratified by age and gender in an attempt to obtain a proper balance of survey respondents across all major segments of the registered voter population.

To protect the anonymity of survey respondents, voters' email addresses and all other personally identifiable information derived from the original voter listing were purged from the data file and replaced with a unique and anonymous identification number during data processing. Post-stratification weights were applied to align the sample of the registered voters responding to the survey to population characteristics of the state's registered voters.

The sampling error associated with the results from the survey are difficult to calculate precisely due to the effects of sample stratification and the post-stratification weighting. Nevertheless, it is likely that the results from the overall sample of registered voters are subject to a sampling error of approximately +/- 2 percentage points at the 95% confidence level, while findings based on each of the two random subsamples are subject to a sampling error of approximately +/- 2.5 percentage points.

Regional definitions referenced in this report

The results from the state's geographic regions referenced in this volume are comprised of the following counties:

Los Angeles County (Los Angeles County)

Orange County (Orange County)

San Diego County (San Diego County)

Inland Empire (Riverside and San Bernardino counties)

Central Coast (Ventura, Santa Barbara, San Luis Obispo, Monterey, Santa Cruz and San Benito counties)

SF Bay Area (Alameda, Contra Costa, San Francisco, Marin, Napa, Sonoma, Solano, San Mateo, Santa Clara).

North Coast/Sierras (Del Norte, Siskiyou, Modoc, Humboldt, Trinity, Lassen, Mendocino, Plumas, Sierra, Nevada, Lake, Alpine, Amador, Calaveras, Tuolumne, Mono, Mariposa, Inyo counties.)

Sacramento Valley (Shasta, Tehama, Glenn, Butte, Colusa, Yuba, Placer, Sutter, Yolo, El Dorado, and Sacramento counties)

San Joaquin Valley (San Joaquin, Stanislaus, Merced, Madera, Fresno, Kings, Tulare, and Kern counties)

Central Valley (net) (includes all counties in the Sacramento Valley and San Joaquin Valley referenced above)

About the Institute of Governmental Studies

The Institute of Governmental Studies (IGS) is an interdisciplinary organized research unit that pursues a vigorous program of research, education, publication and public service. A component of the University of California system's flagship Berkeley campus, IGS is the oldest organized research unit in the UC system and the oldest public policy research center in the state. IGS's co-directors are Professor Eric Schickler and Associate Professor Cristina Mora.

IGS conducts periodic surveys of public opinion in California on matters of politics and public policy through its *Berkeley IGS Poll*. The poll, which is disseminated widely, seeks to provide a broad measure of contemporary public opinion, and to generate data for subsequent scholarly analysis. The director of the *Berkeley IGS Poll* is Mark DiCamillo. For a complete listing of stories issued by the *Berkeley IGS Poll* go to <https://www.igs.berkeley.edu/research/berkeley-igs-poll>.

Table 17: Q24 Several companies and technology groups have begun developing smartphone apps or systems for individuals to upload onto their phones to verify that they have received COVID-19 tests and/or vaccinations. They could then be used by individuals to enter concert venues, sports stadiums, cruise ships, hotels, casinos and other businesses that might require them for entry. Do you approve or disapprove of the idea of allowing certain private businesses to require individuals to verify that they have either been vaccinated or have tested negative for COVID-19 before they can obtain entry? (Registered Voters, Form B)

Table 18: Q24 Several companies and technology groups have begun developing smartphone apps or systems for individuals to upload onto their phones to verify that they have received COVID-19 tests and/or vaccinations. They could then be used by individuals to enter concert venues, sports stadiums, cruise ships, hotels, casinos and other businesses that might require them for entry. Do you approve or disapprove of the idea of allowing certain private businesses to require individuals to verify that they have either been vaccinated or have tested negative for COVID-19 before they can obtain entry? (Registered Voters, Form B)
