Author

Hoyt, Robert D

Publication Date

2002-11-01

A BIBLIOGRAPHY OF THE EARLY LIFE HISTORY OF FISHES. VOLUME 1, LIST OF TITLES

Compiled, edited, and published (1988, copyright) by Robert D. Hoyt
Department of Biology, Western Kentucky University, Bowling Green, Kentucky 42101

Updated November 2002 by

Tom Kennedy

Aquatic Biology, University of Alabama, Tuscaloosa, Alabama 35487-0206

and

Darrel E. Snyder

Larval Fish laboratory, Colorado State University, Fort Collins, Colorado 80523-1474

Dr. Hoyt granted the American Fisheries Society Early Life History Section permission to prepare, update, and distribute his 13,717-record bibliography (comprehensive for literature through 1987, but out-of-print) as a personal computer file or searchable resource on the Internet so long as the file is made available to all interested parties and neither it nor printed versions of it are sold for profit. Because of computer search capabilities, it was deemed unnecessary to provide a computer text version of Dr. Hoyt's subject, scientific name, common name, family name, and location indices (Volume II). As chairman of the Section's bibliography committee, I prepared and partially edited version 1.0 of this file from Dr. Hoyt's original VAX computer tapes and made it available in 1994 for download and use as a searchable resource on the internet. Dr. Julian Humphries (then at Cornell University) and Peter Brueggeman (Scripps Institution of Oceanography Library) prepared and posted the gopher- searchable and web-searchable versions, respectively.

The file has now been further edited for duplicate records and errors by Tom Kennedy and myself and partially updated by Tom Kennedy. For the update, Tom incorporated a file of records through 1997 provided by George W. Boehlert (NMFS Southwest Fisheries Science Center, 1352 Lighthouse Avenue, Pacific Grove, California 93950-2097), perused over 25 academic and governmental web sites, and used Current Contents software for published literature from 1999 to 5 August 2002. I also added a few dozen records. The bibliography now includes 15,596 records from 1842 through July 2002.

Many references are yet to be identified and added to the bibliography for the period of 1988 through 1997 and especially the year 1998. Users of the bibliography, AFS Early Life History Section members, and anyone else having published in the field are encouraged to submit additional corrections and bibliographic records to me for future updates. Please compare records herein with your own bibliographic files and personal publication lists (including "grey" literature and agency final reports). Bibliographic format generally follows American Fisheries Society guidelines except that standard journal abbreviations are acceptable. Your contributions will be duly acknowledged. If anyone is interested in becoming more involved with the bibliography, much as Tom Kennedy did for this update, I am willing to share or transfer responsibility for maintaining and updating it for the AFS Early Life History Section.
