Correction to "Error Analysis and Stochastic Differentiability
in Subsurface Flow Modeling," by H. A. Loaiciga
and M. A. Mariño

In the paper "Error Analysis and Stochastic Differentiability in Subsurface Flow Modeling" by H. A. Loaiciga and M. A. Mariño (*Water Resources Research*, 26(12), 2897–2902), equation (13) was incorrect. It should read

$$K \frac{\partial \phi}{\partial x_i} = -q_i \quad (13)$$

indicating that the specific discharge q_i depends on the piezometric potential ϕ rather than its mean H .
