## KEYWORDS

cerebrovascular reactivity, cerebral blood flow, hypercapnia, cognition, arterial spin labeling

## A Corrigendum on

### Relationship between cerebrovascular reactivity and cognition among people with risk of cognitive decline

by Kim D, Hughes TM, Lipford ME, Craft S, Baker LD, Lockhart SN, Whitlow CT, Okonmah-Obazee SE, Hugenschmidt CE, Bobinski M and Jung Y (2021). *Front. Physiol.* 12:645342. doi: 10.3389/fphys.2021.645342

In the published article, there was an error. We inaccurately wrote **Equation 1**. A correction has been made to **Materials and Methods**, “*Image Processing and CVR*,” **Equation 1**. The corrected sentence appears below:

“

$$CVR = 100 \times \frac{CBF_{Hypercapnia} - CBF_{rest}}{\Delta P_{ET}CO_2} / CBF_{rest} \quad (1)$$

”

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
