R (reduplication)

<-**R1**- or -**C1e**>, (//**-R1-** or -**C1e**//), ASP /'continuative, be -ing'/, (semological comment: means the action is still continuing to happen), phonology: infix reduplication, a type of doubling in Halkomelem lessons and classes, takes the first consonant of the root then adds e (schwa) and inserts or infixes the two sounds after the first vowel of the root, grammatical comment: as discovered by Wayne Suttles in his *Musqueam Grammar* (consonant alternation 1984) all affixes and ablauts used to express continuative can also be used to express resultative aspect (a different meaning) for the same words, another way to say this is the plain continuative form of a given word is the same as the plain resultative form, they are homophonous, so if a given word takes a particular kind of reduplication or ablaut to express continuative it will use the same means to express resultative aspect (if it has a resultative aspect form), this is true also of Upriver Halkomelem, though a few roots have been found for which this is not true, i.e., the continuative aspect has one type of reduplication or ablaut while the resultative aspect of the same root has another type of ablaut or reduplication, syntactic analysis: ii (inflectional infix); found in <**cháchelh**>, cts //c'ɛ[-C₁ə-]ɬ//, ABDF ['it's aching of arthritis'], <**kw'íkw'ets'**>, cts //k'w'í[-C₁ə-]c'//, FSH ['butchering'], <**kwíkwemel**>, cts //k'w'í[-C₁ə-]m=ə//, LT ['it's getting red'], <**tskwíkwem**>, cts //c=k'w'í[-C₁ə=]m//, LT ['being red'], <**kwókwxewels**>, cts //k'w'ó[-C₁ə-]x'w=ə//, ABFC /'knocking, rapping', <**kw'okw'etl'élmel**>, cts //k'w'ɛ[-AaC₁ə=]ë' =əlmə//, ABFC ['thinking about having intercourse'], <**làlets'éwtxwem**>, cts //l'ɛ[-C₁ə-]c' =ə[- ']wtx'w=ə//, SOC ['be visiting'], <**lhálheqem**>, cts //ɬ'ɛ[-C₁ə-]q=ə//, ABFC ['whispering'], <**mámelqlexw**>, cts //mə[=A'ɛ=] [-C₁ə-]l=q=l-əx'w//, rsls, EFAM ['forgetting (s-th/s-o)'], <**mímesem**>, cts //mí[-C₁ə-]s=ə//, MC ['picking out'], <**q'áq'el**>, cts //q'ɛ[-C₁ə-]l//, EFAM ['believing'].

<=**R1**= or =**C1e**>=, da //=-C₁ə= or =C₁ə=//, ASP /'resultative, -ed, have -en (usually results in a past tense or past participle translation in English)'/, (semological comment: means the action has been completed with some results, inflectional hyphens should probably be used instead of derivational equal signs but the result is often an adjective, thus changing the syntactic subclass of the word and that makes it somewhat derivational too, in Galloway 1977 this was translated as verbal adjective or participle and usually involves the stative prefix s= added onto the same word), phonology: infix reduplication, a type of doubling in Halkomelem lessons and classes, takes the first consonant of the root then adds e (schwa) and inserts or infixes the two sounds after the first vowel of the root,, syntactic analysis: derivational infix, syntactic comment: usually used along with s= stative; found in <**sq'áq'eth'**>, str //s=q'ɛ[-C₁ə=]è'//, DESC /'(be) tight, (leaning backwards [EB])'/, <**smímeq'**>, str //s=mí[-C₁ə=]q' or s=mí=C₁ə=q'//, WATR /'(be) sunk', <**lholhek'w'íwel ~ lholhk'w'íwel**>, rsls //ɬa[-C₁ə=]k'w' =íwə//, EFAM /'be startled, be dumbfounded, be shocked, be stupified, be speechless, be overwhelmed', <**slhálhex**>, str //s=ɬ'ɛ[-C₁ə=]x'//, FOOD ['be served'], literally /'(be spread)'/, <**slí:leq'w**>, stvi //s=lí[-C₁ə=]q'//, DESC /'be slack, loose, too loose, hanging loose (of a slackened rope)'/, <**kw'íkw'ets'**>, rsls //k'w'í[-C₁ə=]c'//, FSH ['sides of butchered salmon with knife marks in them'], (<=**R1**>= resultative).

<=**R1**= or =**C1e**>=, da //=-C₁ə= or =C₁ə=//, DESC /'diminutive, little (of subject, object, agent, patient or action)'/, EFAM ['pet name'], phonology: infix reduplication, a type of doubling in Halkomelem lessons and classes, takes the first consonant of the root then adds e (schwa) and inserts or infixes the two sounds after the first vowel of the root,, syntactic analysis: derivational infix; found in

<**cháχket**>, dms //cɛ[=C₁ə=]kət//, CLO ['small jacket'], <**kw'elókw't'el**>, ds //k'w[-ə-]ɛ[=AáC₁ə=]t'ə//, EZ ['a few mice'], (<**-el- infix**> plural), (<**á-ablaut** and **R1**> diminutive), <**kw'ík'w'exwelhp**>, dmn //k'w'í[=C₁ə=]x'w=ə+p//, EB ['"jack pine", lodgepole pine', ['Pinus contorta'], (<**=R1**> diminutive), <**smámelet**>, dmn //s=mɛ[=C₁ə=][=ə=]t//, LAND ['little stone, pebble, little rock hill, small rock mountain (like in the Fraser River in the canyon)'], <**múmesmes**>, dmn //mú[=C₁ə=]sməs//, EZ ['small adult cow'], <**q'áq'emi**>, dmn //q'ɛ[=C₁ə=]m=i(y)//, HAT ['little girl (perhaps four years), young girl, (girl from five to ten years [EB])'], <**húheliya**>, dmn //hú[=C₁ə=]i=yɛ//, EZ ['small-sized humpback salmon'], ['*Oncorhynchus gorboscha*'], <**á'iy ~ 'á'iy**>, dmn //ʔɛ[=C₁ə=]y or C₁ɛ=ʔɛy//, VALJ ['cute little one'], probably <**-R1**> diminutive, possibly <**R7**> diminutive.

<**=R1=** or **=C1e=>**, da //C₁ə= or =C1ə=//, ASP ['comparative or augmentative'], phonology: infixed reduplication, a type of doubling in Halkomelem lessons and classes, takes the first consonant of the root then adds e (schwa) and inserts or infixes the two sounds after the first vowel of the root,, syntactic analysis: derivational infix; found in <**sóseqwt** ~ (rarely) **só:seqwt**>, df //sá[=C₁ə=]q'w't//, KIN ['younger, younger sibling, cousin of a junior line (cousin by an ancestor younger than the speaker's), junior cousin (child of a younger sibling of one's parent, (great) grandchild of a younger sibling of one's (great) grandparent), younger brother, younger sister'], possibly <**=R1=**> comparative, <**thíthe**>, augs //éi=C₁ə//, plv, DESC ['(be) larger, bigger'], (<**=R1**> augmentative).

<**=R2** or **=C1eC2>**, da //C₁əC₂ or =C1əC2//, ASP ['characteristic, inherent continuative'], (semological comment: called inherent continuative in Galloway 1977, this suffix means that the action is done continuously or many times so that it becomes characteristic of the thing doing the action, it is often converts the word to a nominal or noun in English, such as *thief* (characteristically steals, steals many times, steals continuously) or *stinging nettle* (characteristically stings or poisons, stings many times, stings continuously) but also creates verbal adjectives too like *rowdy*, *talkative* (characteristically talks, talks many times, talks continuously)), phonology: suffixed reduplication which copies the first consonant of the root adds an e (schwa) and then adds a copy of the second consonant of the root, and adds the sequence of three sounds to the end of the root, called a type of doubling in Halkomelem classes and lessons, this suffix usually is also accompanied by ablaut or change of the root vowel to é (schwa), syntactic analysis: derivational suffix; found in <**qélqel**>, chrs //qɛ[=Aá=]l=C₁əC₂//, SOCT ['thief'], (<**é-ablaut on root á**> derivational), (<**=R2**> characteristic), <**th'éxth'ex**>, chrs //è'əx=C₁əC₂//, EB ['stinging nettle'], ['*Urtica dioica*'], literally ['sting/poison =characteristically'], <**qwélqwel**>, chrs //q'w'ɛ[=Aá=]l=C₁əC₂//, EFAM ['be rowdy, be a nuisance, be mischievous'], SOC, (<**é-ablaut**> resultative? or continuative), (<**=R2**> characteristic), <**spóypiy**>, chrs //s=páy=C₁əC₂//, stvi, DESC ['be crooked [characteristically]'], (<**s=**> stative), (<**=R2**> characteristic), <**sélseltel**>, chrs //səl=C₁əC₂=təl//, WV ['spindle for spinning wool, a hand spinner'], TOOL, (<**=R2**> characteristic), <**sí:si**>, chrs //síy=C₁əC₂//, EFAM ['be afraid, be scared, be nervous'], (<**=R2**> characteristic)(<**síy**>, bound root //síy or sáy nervous, afraid//, Salish cognate: Lushootseed /sáy/ nervous, fidgety, at loose ends, excited H76:703), <**s'éts-'ets**>, chrs //s=ʔɛc=C₁əC₂//, [sʔɛcʔɛc (normal speed), sʔɛcʔɛc (hyper-slow speed)], LANG ['stuttering, to stutter'], (<**s=**> stative), possibly root <**áts**> as in <**átslexw**> hear about it?, (<**=R2**> characteristic), <**lésleseqw**>, chrs //lo[=Aá=]s=C₁əC₂=əq'w//, DESC ['greasy-headed'], ANA ['fatty salmon head'], FOOD, (<**é-ablaut**> derivational), (<**=R2**> characteristic), <**yélyešem**>, chrs //yál[=C₁əC₂=]əs=əm//, ABDF ['(have) a steady toothache, have a toothache'], (<**=R2**> characteristic).

<**=R2** or **=C1eC2>**, da //C₁əC₂ or =C1əC2//, NUM ['plural, inherent plural'], (semological comment: inherent plural and plural in Galloway 1977, this suffix means that an action is done many times so that it becomes characteristic of the thing doing the action, it is often converts the word to a nominal

or noun in English, such as *thief* (characteristically steals, steals many times, steals continuously) or *stinging nettle* (characteristically stings or poisons, stings many times, stings continuously) but also can create some simple plurals as in *syáq'yeq' a lot of logs*), phonology: suffixed reduplication which copies the first consonant of the root adds an e (schwa) and then adds a copy of the second consonant of the root, and adds the sequence of three sounds to the end of the root, called a type of doubling in Halkomelem classes and lessons, this suffix usually is also accompanied by ablaut or change of the root vowel to é (schwa), syntactic analysis: derivational suffix; found in <syáq'yeq'>, pln //s=yéq'=C₁əC₂//, EB ['a lot of logs'], (<R2> plural), <tewtewá:la ~ tutuwále>, chrs //təw[=C₁əC₂]=] (=)é·lɛ//, LAND ['side hills, tilted hills, slopes'], <s'éts-'ets>, chrs //s=ʔəc=C₁əC₂//, [sʔicʔic (normal speed), sʔécʔéc (hyper-slow speed)], LANG ['stuttering, to stutter'], (<s=> stative), possibly root <áts> as in <átslexw> *hear about it?*.

<R3= or C1eC2=>, da //C₁əC₂= or C1əC2=//, NUM ['plural, (usually) many in a group, collective'], (semological comment: plural in Upriver Halkomelem is seldom used for just a few objects or actions, usually it means many in a group), phonology: prefixed reduplication which copies the first consonant of the root adds an e (schwa) and then adds a copy of the second consonant of the root, and adds the sequence of three sounds to the front of the root, called a type of doubling in Halkomelem classes and lessons, added only to the beginning of the root, never before a prefix (such as s=, lexw=, shxw=, etc.), syntactic analysis: derivational prefix, syntactic comment: because it doesn't change the syntactic class of a word it should probably be shown with an inflectional hyphen rather than derivational equal sign, I started to use the equal sign because as a plural marker it seemed to be largely optional semantically and syntactically--unlike inflections, which are normally obligatory as required by the syntax and morphology; found in <lets'ló:ts'tel>, plv //C₁əC₂=lɛ[=Aá=]·c'=T-əl//, rcp, LT ['(many) different colors'], <lemlemá:t>, its //C₁əC₂=ləmɛ·T//, ABFC ['kick s-th around'], (<R3=> iterative), <steqtéq>, pln //s=C₁əC₂=təq or s=C₁əC₂=tɛ[=Aá=]q//, WATR ['jampile, log-jam'], EB, (<s=> nominalizer, R3= plural), <xwiyxwiyáye>, pln //C₁əC₂=x^wéy=i[=M2=]yɛ//, EZ ['a lot of flies, big blow-flies'], ['order Diptera, family Calliphoridae'], (<R3=> plural), <yelyelísem>, ds //C₁əC₂=y=əlís=əm or C₁əC₂=yəlɛ[=Aí=]s=əm//, WETH ['(have/get) many icicles'], <S'em'oméla>, pln //s=C₁əC₂=ʔamə́lɛ//, SOCT ['Thompson people'], (<s=> nominalizer or stative, R3= plural (collective)), <p'elp'álq'em>, plv //C₁əC₂=p'élq'=əm//, LT ['shining, glittering, sparkling (with many reflections)'], (<R3=> plural actions or agents).

<R4= or C1í=>, da //C₁í= or C1í=//, DESC ['diminutive, little (of subject, object, agent, patient or action), small, (all diminutive verbs are also continuative)'], (semological comment: as Suttles noticed in his Musqueam Grammar manuscript, diminutives of verbs are semantically also continuative, as in *a little person is/was picking* rather than *a little person picks or picked*), phonology: prefixed reduplication which copies the first consonant of the root adds í and adds the two sounds to the front of the root, called a type of doubling in Halkomelem classes and lessons, added only to the beginning of the root, never before a prefix (such as s=, lexw=, shxw=, etc.), to make a plural of such diminutives the í is normally ablauted or changed to é (schwa) in the reduplication, since this ablaut clearly has a separate semantic function, it is not necessary to set up a new reduplication C1é=, syntactic analysis: derivational prefix, syntactic comment: because it doesn't change the syntactic class of a word it should probably be shown with an inflectional hyphen rather than derivational equal sign, I started to use the equal sign because it seemed to be often optional semantically (unlike inflections, which are normally obligatory as required by the syntax and morphology) and seemed to add a more derivation meaning, but it now seems to have been used more by the eldest speakers as a semi-obligatory prefix with verbs; found in <híhòkwexes>, dm v //C₁í=hák^w=əx^y-əs//, if, CLO ['he (a small child) is wearing it.'], (<R4=> diminutive), <siseqíws ~ síseqíws>, dm n //C₁í=səq=íws//, CLO ['short pants, little pants, underpants'], (<R4=> diminutive), <qwíqweláts ~ qwíqwelà(:)c>, dm v

//C₁í=q^wɛ̃·l=ə[=M2=]c//, LANG /'gossip about someone, talk about someone behind his back'/, EFAM, literally probably /'small talk on the back'/, (<R4=> diminutive), <p'íp'eq'>, dmv //C₁í=p'əq'//, LT ['a little white'], ASM ['occurs almost alternately with p'áp'eq'el within the same areas (as shades of white tinged with orange, yellow or blue) so no difference in meaning can really be distinguished between the two forms, the second form has R7= comparative or emphatic, (sometimes) continuative which was not attested in color term words by any of the others we interviewed'], (<R4=> diminutive), <tsqwíqweyel>, ds //c=C₁í=q^wɛy=əl//, LT ['I have/get/be in a state of going a little yellow or green'], (semological comment: this term labels almost all the margins of tsqwáy (from green's margins with blue, to yellow's margins with orange and pink and white), it also includes some moderately light green close to the focus of tsqwá:y, which, for EB of Chehalis, is green (as it is for AH of Sumas).), (<ts=> have, get, stative with colors), (<R4=> diminutive), (<=el ~ =íl> go, come, get, become).

<R5- or C1e->, (/R5- or C1e-//), ASP /'continuative, be -ing'/, (semological comment: means the action is still continuing to happen), phonology: prefixed reduplication which copies the first consonant of the root adds e (schwa) and adds the two sounds to the front of the root, called a type of doubling in Halkomelem classes and lessons, added only to the beginning of the root, never before a prefix (such as s=, lexw=, shxw=, etc.), syntactic analysis: ip (inflectional prefix); found in <ch'ech'émels>, cts //C₁ə=c'ə́m=əls//, sas, dnom, ABFC /'a biter (animal, fish, etc.), a thing that is (always) biting'/, (<R5=> continuative), (<=els> structured activity continuative nominal), <th'eth'ám>, cts //C₁ə-èé=m//, ABFC ['chewing (gum)'], (<R5-> continuative), comment: this seems the regular continuative for this verb, not th'á:m, see th'eth'át chewing s-th, <tl'etl'áxel>, df //C₁ə-ë'(?)é=x'ə́l or C₁ə=ë'(?)é=x'ə́l//, SOC /'inviting (to come eat, dance), to give a potlatch, (give a feast or gathering), to invite to a feast, invite to a potlatch'/, possibly <R5-> continuative, possibly <R5=> derivational, <kwekwó:thet>, cts //C₁ə-k^wɛ[=Aa=]' =T-ət//, [k^wɔk^wá-èət], ABFC ['galloping'], (<R5-> continuative),

<R5= or C1e=>, da //C₁ə= or C1e=//, ASP /'resultative, -ed, have -en (usually results in a past tense or past participle translation in English)'/, (semological comment: means the action has been completed with some results, inflectional hyphens should probably be used instead of derivational equal signs but the result is often an adjective, thus changing the syntactic subclass of the word and that makes it somewhat derivational too, in Galloway 1977 this was translated as inherent continuative, often syntactically a verbal adjective/adjectival verb or participle, it may also involve the stative prefix s= added onto the same word), phonology: prefixed reduplication which copies the first consonant of the root adds e (schwa) and adds the two sounds to the front of the root, called a type of doubling in Halkomelem classes and lessons, added only to the beginning of the root, never before a prefix (such as s=, lexw=, shxw=, etc.), syntactic analysis: derivational prefix; found in <stl'etl'íq'>, str //s=C₁ə=ë'íq'//, TCH /'(be) too tight (of shoes, clothes, trap, box), tight (of a dress one can't get into), too tight to get into (of dress, car, box of cards, etc.)'/, (<s=> stative), (<R5=> resultative), <sqweqwá>, dnom //s=C₁ə=q^wé//, DESC ['a hole'], ASM ['like a knothole, hole in a pail, cave, tunnel'], (<s=> nominalizer perhaps ~ stative here), possibly <R5=> durative or resultative,

<R5= or C1e=>, (/R5= or C1e=//), NUM /'(rare) plural, (usually) many in a group, collective'/, also alloseme (ASM) NUM /diminutive plural/ is an alternative to usually stressed schwa ablaut on R4 diminutive, (semological comment: plural in Upriver Halkomelem is seldom used for just a few objects or actions, usually it means many in a group (as in legs, feet)), phonology: prefixed reduplication which copies the first consonant of the root adds e (schwa) and adds the two sounds to the front of the root, called a type of doubling in Halkomelem classes and lessons, added only to the beginning of the root, never before a prefix (such as s=, lexw=, shxw=, etc.), more often found added to a form also pluralized by =el= infix; found in sts'eló:meqw ~ sts'ets'eló:meqw great grandparents/-

children, syntactic analysis: derivational prefix; found in <**sxexéyle** or **sxexíle**>, //s=C₁ə=xə[=Aí=]lə//, /'legs, feet'/. SH

- <sh> . This represents the same sound as in English, but the sound is an allophone of /s/ in Upriver Halq'eméylem. It occurs only before /x^w/ (<xw>) in native words; it also occurs in a few interjections (which may be native or borrowed) and a few borrowed words. Its occurrence is so limited that it does not appear before /x̄^w/ <x̄w> in native words; however, since it has a clear distinct sound and is found in borrowings not before <xw>, it is written <sh> in the Stó:lô writing system wherever it occurs.
- <sh>, free root //š//, EFAM ['shoo'], semantic environment ['said while waving off a pesky animal, etc.'], syntactic analysis: interjection, attested by Elders Group (5/14/80), AH and LG (Deming 5/8/80).
- <Shéykes>, free root //šéykəs//, REL ['Shakers'], ASM ['members of the Indian Shaker church'], syntactic analysis: nominal, dialects: *Chilliwack Landing (Pilalt?)*, attested by Elders Group (6/8/77), borrowed from English /šéykrz/ *Shakers*.
- <shíka leplít>, //šíkε ləplít//, REL /'Shaker minister'/, attested by AH, also see leplít.
- <sht ~ sh:t>, free root //št ~ š·t//, EFAM ['shh'], semantic environment ['said to quiet kids, etc.'], syntactic analysis: interjection, attested by Elders Group (5/14/80).
- <shúkwe ~ súkwe ~ súkwa>, free root //súk^wə ~ súk^wε//, [súk^wə ~ šúk^wə], FOOD ['sugar'], phonology: allophone sh normally only appears before xw but also appears elsewhere in some borrowings, syntactic analysis: noun, nominal, attested by AC, MH (Deming 1/4/79), EB, Ed and Delphine Kelly (12/10/71), borrowed from Chinook Jargon /súk^wa ~ šúk^wa/ *sugar* itself from French <sucre> *sugar* Johnson 1978:428, example: <lí welí kw súkwa?>, //lí-ə wə-lí k^w súk^wε//, /'Is there any sugar?/, attested by EB (2/2/76).
- <shúkwet ~ súkwet>, pcs //súk^wə=T//, FOOD ['sugar it'], (<=t> purposeful control transitivizer), syntactic analysis: transitive verb, attested by Elders Group (3/8/78).
- <shúkwe'álà>, ds //súk^wə=ʔèlè//, FOOD ['sugar bowl'], HHG, lx <='álà ~ =álá ~ =hàlà> container of, syntactic analysis: nominal, attested by Deming (at Fort Langley museum 3/9/78).
- <Shushxwáp>, free root //šušx^wép//, SOCT ['Shuswap people'], syntactic analysis: nominal, attested by DM (1/8/62 or July 64 or 12/4/64), also <Shúshwop>, //šúšwap//, attested by BHTTC, Salish cognate: Shuswap /səx^wép-mx ~ səx^wép-məx/ *Shuswap Indian(s)* Kuipers 1974:187.
- <shxw=>, da //sx^w= or s=x^w=//, [šx^w=], CJ /'nominalizer, something for, someone for, something that'/, <s(h)=> nominalizer, <xw=> towards, (semological comment: almost always used with *continuative* stems, thus the translation *something for [doing X]* in contrast to the translation for s= used mostly with non-continuatives *something to [do X]*, occasionally both suffixes violate this semantic distinction and then they have the literal translation *something that [does/is doing X]*, discovering this semantic principle has allowed the derivations of a number of words from their proper roots). Rather than cross referencing every word with this suffix under the <sh> here, the reader should look up the forms under the consonant following the <shxw> as such words will be found under the root beginning with that consonant. A few sample words only are listed here under <sh>, along with those whose roots are unclear or the few words that begin with borrowed or sound symbolic <sh>.
- <Shxwá:y>, //sx^wé·y//, less correct variant of <Shxwhá:y>, dnom //sx^w=hè[=́=].y//, PLN /'village at outlet of old Chilliwack River on Fraser River, now known as Skway reserve (Chilliwack Indian

<témélh>, free root //téméʔ//, LAND /'red ochre, (clay colored reddish by oxides of iron)'/, EB perhaps /'red rock fungus used for Indian paint, (perhaps) Indian paint fungus'/, (perhaps) [*Echinodontium tinctorium*], REL /'Indian red paint (used by spirit dancers, ritualists, and Indian doctors or shamans)'/, ASM [*red Indian paint was made by mixing grease with powder from clay colored reddish by oxides of iron and/or reddish soot from baked red rock fungus, it was and is used as face paint by powerful Stó:lô (and other) spirit dancers, by ritualists, and shamans or Indian doctors, and was (and still may be) painted on certain sacred rocks such as the stone shaman at Doctor's Point in Harrison Lake, Indian spirit dancers with red paint are said to have different spirit powers than those with black paint,*], a sample of Stó:lô Indian red face paint (for spirit dancers) was obtained from Mrs. Amy Cooper by Oliver Wells, kept by the Wells family after his death, and chemically analyzed from Oct. to Nov. 1981 at Simon Fraser University for Dr. Ralph Maud, Marie Weeden and Dr. Brent Galloway in their project to transcribe the Oliver Wells tapes and inventory his Indian research materials, the analysis by Keith Slessor of S.F.U. together with graphs of three tests (see illustrations) follows: "Face Paint Analysis. X-ray analysis (Prof. John D. Auria): sample contained about 10 percent iron Fe, also contained other minor components so we suspect an iron-containing clay rather than a pure iron oxide, Microanalysis (Ms. S.A. Black): showed about 70 percent organic consistent with a grease or fat added to and mixed in with the iron-bearing clay, Fat analysis (Ms. S. A. Black and Mr. B. D. Johnston): capillary gas chromatography of the methyl ester of the fatty material showed a highly saturated fat typically of animal origin, plant and fish oil (fats) are reasonably unsaturated and I believe can be ruled out in this case., [Summary]: The face paint is probably an iron-containing clay that would be dark brown (or red brown) ground up finely in the presence of four times the volume of animal fat. [from another note dated 27/11/81]: In discussion here about the face paint, the suggestion that the animal fat origin is very likely to be black bear arose. I think that's a very sensible suggestion, which you might find useful." TS

<ts>, comment: The Stó:lô orthography uses both <ch> ([è]) and <ts> ([ç]), for two allophones of a single Halkomelem phoneme, /c/. This has the advantage of showing phonetic preferences of the speakers which are difficult to predict purely from environments; in linguistic terms [è] and [ç] are evolving from a state of free variation to conditioned variation (or vice versa)(see Galloway 1977:5-7 for a statement of the environments, dialects, and idiolects conditioning these two sounds). As it happens, comparatively few cases of initial <ts> [ç] occur. Therefore if a reader is looking up a word spelled or sounded with an initial ts, he should be sure to check under <ch> as well, as more speakers may pronounce it with <ch>..

<ts= ~ ch= ~ ts'=>, da //c= ~ c'=/, TIB /'stative (with color terms), have, get (elsewhere)/, phonology: since most roots begin with a consonant and there is a phonemic rule that /c/ → [ç] <ts> between word boundary and a consonant, this prefix is only rarely found as [è] <ch>; there is also an allomorphic rule that {c-} → /c'/ <ts'> before glottalized consonant, syntactic analysis: derivational prefix; found in <tschá:xw>, //c=cé·x'//, /'get a wife/, <tskwí:m>, //c=k'í·m//, /'be red, (have red)/, */'get red'/ rejected, <tsqwá:y>, //c=q'ê·y//, /'be yellow, be green, (have yellow/green)/; for EB there are two cases of minimal contrast, forms with ts= vs. without (p'íp'eq'el with diminutive vs. tsp'íp'eq'el, and q'íq'exel with continuative vs. tsq'íq'exel); the ts= forms may be a little more intense, deeper in the color, than the forms without. This would fit with the literal meanings for each set ("going a little white" vs. "have/get/be in a state of going a little white", "going a little black" vs. "have/get/be in a state of going a little black"; or if one uses the -ish meaning, "a little whitish" vs. "have/get/be in a state of a little whitish", etc.)., For Chilliwack speaker NP there are quite a few such contrasts, in fact with inceptives based on all the roots but xwíkw', gray, qálq rose, and st'áwel purple. Sumas speaker AH has minimal contrasts between forms with s= and with c=; tsqwóqwiyel and sqwóqwiyel don't seem semantically distinct, but there are a number of colors labelled by tskwíkwemel and a number by skwíkwemel; on the Munsell charts she did with us these two are fairly evenly mixed with each other, though the forms with ts= are found mostly close to the focus, while the s= forms occur close to the focus but also as the farthest away from the focus (C4, E6, I2, C35, etc.)., NP's charted forms also show such a contrast: under tsqw'íxw ts= forms are more focal, while s= forms are more distant from focus, blackest; under tsqwá:y ts= forms are at intense margins, while s= forms are at light margins or blackest; under tsméth' ts= forms are at light margins, some dark, while s= forms are one ex. next to focus; under tskwím ts= forms are at intense margins, while s= forms are at light margins or near focus; under tskwím + R5= ts= forms are more focal, while s= forms are more distant from focus; under tsq'íx ts= forms are (one ex.) browner, while s= forms are one ex., bluer, darker?; under p'éq' ts= forms are not found, while, s= forms are closer to /p'éq'/ than non=statives; under tsp'íqw' ts= forms are at I35, H34, D32, darker or lighter, while s= forms are at F34 but focused at H32, and sp'íp'eqw'el at I36; ("Intense margins" refers to margins between colors other than white or black.). Chehalis speaker EB has no /s=/ forms to contrast. Tait speaker TG has one contrast, tsqwóqwiyel vs. sqwóqwiyel, where the ts= form is more focal than most of the examples of the s= form., syntactic analysis: derivational prefix, see charts by Rob MacLaury, see dialect form <ch=>; found in <ts'q'éy<, //c'=q'éy<, /'black, be black/, <tsqwá:y>, //c=q'éy<, /'green, yellow, be yellow or green/, <tsméth' ~ (rarely) ts'méth'>, //c=méè' (sometimes c'=méè')//, /'blue, be blue/, <tskwí:m>, //c=k'í·m//, /'red, be red/, <tskwí:meqw>, //c=k'í·m=éq'//, /'red-head(ed)/, <ts'méth'ó:les>, //c'=méè'=á·ləs//, /'blue eyes/, <tsqw'íxw ~ ts'qw'íxw>, //c=q'íxw ~ c'=q'íxw//,

'be brown', <tskwikwemel(=í:wel)>, //c=k^wík^wəm=əl(=í:wəl)//, *'reddish-brown, be reddish-brown'*, (<=el> -ish), <tsxwíkw>, //c=x^wík^w//, *'gray, be gray'*, <ts'q^wíq^wexwel>, //c'=q^wíq^wəx^w=əl//, *'brownish-black, be brownish-black'*, (<=el> -ish), <tstáwél>, //c=téwəl//, *'bright-colored'*, root <táwel> *bright, light*, comment: note that not all colors have this prefix for ex. p'éq' *white, be white*, qwiqwóyáls *orange, be orange; an orange*, and stl'ítl'esel *dark gray, dark color*, <tsqw'íq^wexw>, //c=q^wí[=C₁ə=]x^w//, *'brown'*, <tskwikwemel>, //c=k^wí:[=C₁ə=]m=əl//, *'pink'*, <chmítl>, //c=míë' or c=má[=Aí=]ë'//, *'dirty'*, phonology: ch= rather than ts= here may be Thompson influence on EB who speaks Thompson as well as Chehalis Halkomelem, attested by EB, ASM [*'derivational'*], <tsmékw>, //c=mék^w//, *'discover, find'*, also <chmékw>, phonology: ch= rather than ts= here may be Thompson influence, attested by EB, ASM [*'have, get'*], <tschá:xw>, //c=cé·x^w//, *'get a wife'*, <tsth'óqwi>, //c=cè'áq^wi//, *'to fish'*, literally *'to get fish'*.

<ts- ~ ch->, ia //c-//, CJ *'subject of independent clause, non-subordinate subject'*, (semological comment: with -tset *we (non-subordinate subject)*, *our* and -chap *you folks (non-subordinate subject)*, *you folks's* the prefix is apparently petrified in those pronouns when used as possessive pronoun inflections--they are possessive pronouns without being non-subordinate subjects simultaneously), syntactic analysis: non-subordinate subject marker, compare <-tsel> *I (non-subordinate subject)*, with <-chexw> *you (non-subordinate subject)*, <-chap> *you folks (non-subordinate subject)*, *you folks's*, and <-tset> *we (non-subordinate subject)*, *our*.

<tsálmalqel>, LANG [*'Chinese language'*], see chá:lmel.

<tscháxw>, KIN [*'get a wife'*], see chá:xw.

<-tsel ~ (very rarely) -chel>, ia //c-əl//, PRON [*'I (non-subordinate subject)'*], phonology: phonologically a suffix except where it precedes the verb in the ambiguous past construction, phonologically it is shown to be a suffix (rather than a postposed enclitic or postclitic) by the fact that it causes a stress shift to schwa in object suffixes attached to any verb stem; found in <tsel maythóme ~ tsel máythómè> *I helped you* vs. <maythométsel> *I help you* and <maythométselcha> *I'll help you*, there is also no word boundary before <-tsel, -tset, -chexw or -chap>, syntactic analysis: subject pronoun, attested by all speakers, comment: see many examples throughout the dictionary, also in Galloway 1977.

<tselá:l>, probable root or stem //cəlÉ·l//, root meaning uncertain unless related to <chá:l or chó:l> *follow behind, go a distance*// with el-inflex plural, not semantically related to <chelà:l>, us //cəlÉ·l//, EFAM *'what a lot., it's sure a lot'*.

<stselá:l>, df //s=cəlÉ·l//, ABDF [*'be fading (of eyesight)'*], (<s=> stative), root meaning unknown, syntactic analysis: adjective/adjectival verb, attested by AC, example: <stselá:l te skw'áts.>, //s=cəlÉ·l tə s=k^wéc-s//, *'Her eyesight is fading., "Her eyes are fading."'*, attested by AC.

<tselcheptel?>, df //c=əlcəp=təl?//, TIME [*'October to November, (wood gathering time)'*], Elder's comment: "it means *wood-gathering time*", possibly <ts=> *get*, lx <=élchep> *firewood*, lx <=tel> *something to*, syntactic analysis: nominal, attested by Elders Group (3/28/79) after Wm. Sepass as recorded by Jenness, source: Diamond Jenness field notes on Wm. Sepass of Sardis.

<tsel:ém>, possible root or stem //cəl·(=)ə[=´=]m//, probably ANA [*'liver'*]

<stsel:ém>, df //s(=)cəl·(=)ə[=´=]m//, ANA [*'liver'*], possibly <s=> nominalizer, possibly <=em> intransitivizer, *have, get* or middle voice, perhaps <=´=> derivational, root meaning unknown, phonology: possible stress-shift or updrifting, syntactic analysis: nominal, attested by AC, DM (12/4/64), Deming (4/17/80), Elders Group, also <schél:ém>, //s=cəl·(=)ə[=´=]m//, attested by SJ (Deming 4/17/80), other sources: ES /scəl·əm/ (CwMs /scələm/) *liver*, H-T <túlEm> *liver*.

- <**tseléqelhtst**>, bens //cəĺéq=ə́c=T//, SOC [*divide something in half with s-o*], NUM, (<=**elhts**> benefactive), (<=**t**> purposeful control transitivizer), syntactic analysis: transitive verb, attested by Elders Group (3/72), Salish cognate: Squamish /cíaq-n/ [//cíaq-n//] *divide off (a part from a whole)* (tr.) W73:81, K69:53, Lushootseed root /cəlq/ *halve, divide into equal parts* as in /cəlq-əd/ *share it equally with s-o* and /cəlq-c/ *give me half, divide it in two* H76:48, historical/comparative detail: Upriver Halkomelem <**th**> is expected from normal sound correspondences; found in <**tseléqelhtsthòmə**>, //cəĺéq=ə́c=T-ámə//, /'divide (in half) with you'/, attested by Elders Group (3/72 tape 33).
- <**tselq ~ chélq**>, free root //cəĺq//, TVMO /'fall, fall off, drop, drop off, drop or fall down (of person)'/, semantic environment [*for ex.: from a shelf, from a mountain, into a hole*], syntactic analysis: intransitive verb, attested by AC (8/6/70, 10/13/71), EB (12/15/75, 4/29/76), Elders Group (8/25/76, 3/72), CT (6/8/76), RG & EH (4/9/99 Ling332), other sources: ES /c'élq/ *fall*, contrast <**wets'étl' ~ wech'étl'**> *fall off, drop down, fall (from a shelf example)* (with <**we**> suddenly), example: <**le tsélq**>, //lə cəĺq//, /'He fell in (caught his foot and fell in a hole)'/, attested by AC, <**me tsélq te mestíyexw**>, //mə cəĺq tə məstíyəxw//, /'The person fell down.'/, attested by EB (12/15/75).
- <**tsélqléxw**>, ncs //cəĺq=l-ə́xw//, ABFC [*drop s-th (accidentally)*], (<=**l**> non-control transitivizer), (<-**exw**> third person object), syntactic analysis: transitive verb, attested by AD (3/5/79), EB (1/20/76).
