Introduction

Quick Start

For those who are already oriented to the language and its dialects here is a quick way to get started using this dictionary. The dictionary begins with the Halq'eméylem-to-English section where you can look up words in alphabetical order by Halq'eméylem, the same order as English except that some sounds are written with two or three characters and are treated and alphabetized as single characters. So, **q** will be found before **q'**, **q'** will be found before **qw**, and **qw** will be found before **qw'**. The plain character (for ex. **q**) is always alphabetized before the glottalized version (**q'**), and those sounds made with lips rounded (labialized) are found after the versions not labialized (so **qw** follows **q'**, and **qw'** follows **qw**). (Most entries use ' to show glottalization and glottal stop, but ' is also quite acceptable in the Stó:lō writing system and is usually preferable for clarity in handwritten Halq'eméylem.) So to look things up by Halq'eméylem, follow this order: (**a, ch, ch', e, h, i, k, k', kw, kw', l, lh, m, n, o, o, p, p', q, q', qw, qw', R** (reduplication or doubling), **s, sh, t, t', th, th', tl', ts, ts', u, w, x, xw, x, xw, y, ').**

To look up words by their English translations, look in the English-to-Halq'eméylem section which is the second main section of the book. If you find the Halq'eméylem word you're looking for, to get more information about it (what are its meaningful parts, root, suffixes, prefixes, infixes, example sentences, details of all sorts) then look the word up in the Halq'eméylem-to-English section. If you don't know its root, look it up where you'd normally expect it and you'll find where to find the whole family of words with the same root. Every word is cross-referenced in that way. If you know the word has a prefix (for ex. **s-** or **shxw-** which make nouns from verbs, since 95% of all roots are verbs) you can look it up either under the **s** or **sh** or under the next letter in the word which is usually where the root starts.

In the Halq'eméylem-to-English section the entry with no indent from the margin is root or other headword. Under each root is an entry indented once, a word derived from the root and called a stem. If there is an entry under that which is indented twice, it is derived from the word above it with one fewer indent (i.e. takes that previous word as its stem or starting point and adds something to it—an affix stuck on at the beginning (prefix), inserted inside the root (infix) or stuck on at the end (suffix). Looking down at the words derived from the same root, they are generally arranged going down from simpler to more complex forms (using more affixes) in sets using the same stems. When a word is derived from a stem (always a root plus at least one affix), the meaning of the affix is shown in the entry for the stem, but is not usually repeated in the entries for words derived from that stem. The stems are not otherwise arranged in any fixed order among themselves, except that often they are in alphabetical order or by the suffixes added. So if one stem is derived from a root by adding **<=es>**, the next stem may be one derived from a root by added **<=st>**. This is not always the case, so look through the whole family derived from a particular root if you know from the English index that the word you seek is found under that root. This teaches a lot about how words are formed and about the related meanings behind each word. You will find many interesting and often surprising things; I did myself. (As a reader learns more about forming words, one can soon make up new words for things that are modern technology, etc., which are not known or listed yet in this dictionary! This is a skill all elders and fluent speakers have.)

Rarely a word begins in **s-** or **shxw-** and is followed by a consonant which seems the first letter of the root and yet is not. This is sometimes the case when the root is one beginning in **s-** or **xw-**. For example, **<sqá:la>** *red huckleberry* is derived from **<seq>** *hang under* and **<=á:la>** *container*, since they are harvested by hanging the berry basket container under the clusters of berries and hitting the branch with the cluster on the container so they fall into the basket—a very efficient means of harvesting them. In these kinds of words, the root vowel is dropped and a vowel later in the word normally has or here gets a higher stress or tone (high tone or mid tone). The elders did not tell me this in all cases but showed many other words that work like this, and when one tries to account for every affix and root and their meanings, to make sense of the literal meanings behind the words, one finds examples like this which

don't make sense any other way. The root of *red huckleberry* is not <qél> *bad*, or <qá:l> *steal*, or <qí:l ~ qéy> *put away, save*, or <qó:> *water*, as they contribute meanings that make no sense for <sqá:la> with either <=á:la> *container* or <=á> *living thing* added to finish the word.

It's important that this dictionary have lots of cross-references (entries that are alphabetized by the whole word, for ex. and show which root it has and thus where to find all the detailed information on the word). Cross-references usually just have the word, its meaning, and the root (*see* <tó:l> for ex.). However, in some interesting cases I have included fuller information (the International Phonetic Alphabet spelling and analysis) and sometimes the literal meaning of the word. It takes too much space and time to do this for all cross-references but shows the type of information that can be found under the full entry filed under the word's root.

There are sometimes differences of tones in a given word's pronunciation (and spelling) between one dialect or another or one speaker and another. I have tried to be as accurate and faithful to the elders' pronunciations as possible with these and to show all variants. I have relative pitch myself (and compose classical music) so that plus 37 years of experience should help make the tones accurately reflected by the spelling. The three phonemic tones are sometimes called high-stress, mid-stress, and unstressed, but actually are high tone, mid tone, and low tone (each about a major third apart on a musical scale). These tones can make a difference in meaning between words otherwise spelled exactly the same (for example, <qwá:l> *mosquito* and <qwà:l> *talk, speak*)(with high tone and mid tone respectively). Many examples can be found contrasting between low tone and high or mid tone. Each vowel has its own tone in the word. <pípehò:m> *frog*, has high tone, then low tone, then mid tone (like the U.S. Marine song, "Over Hill, Over Dale" or 5-1-3 in relative musical pitches). (Downriver Halkomelem and Island Halkomelem do not have such phonemic tones so far as is known, they have instead phonemic stress plus some intonation.)

A few words about the English-to-Halq'eméylem section:

1) it is organized by showing the English meaning you want to find. If the word only has that meaning, the entry will show the English, then two colons (:), a few spaces, then the Halq'eméylem word, then if that word is not a root by itself it will be followed by a comes from sign (<) a space and the root the word will be found under in the Halq'eméylem-to-English section. If there is no root shown like this, just look up the word by its own spelling. You can usually do this anyway since all words are cross-referenced.

2) they are in alphabetical order by English, of course, but personal names or place names all begin with capital letters, and if they are spelled the same way as a regular word (like Raven, the name of the character in stories, and raven, the bird), the capitalized name precedes the regular word which is not capitalized.

3) Though this section is an English-to-Halq'eméylem section, you will find a number of terms in another language. These are scientific names which identify the scientific species, genus, and sometimes family or order of a plant or creature. They are mostly Latin terms (a few are Greek terms mixed in), and they are so that one can look up the plant or creature in books or the Internet and get pictures, full details of when plants are ripe, what habits or descriptions are given there, for each plant and animal known to the elders I worked with. Sometimes from the English name alone (for example blueberry or whale) one cannot be sure of the precise plant or creature and all the details. However, with the scientific name identified one can be sure that the exact species or variety of that plant or creature exists in the Stó:lō area and get information exactly about that type or the variety of types the word means.

4) The computer program which I used to create the English-to-Halq'eméylem section is a very good one but created entries only where I inserted a star (*) before the word in my original computer entry of the dictionary. I've added any words I found that were missed (for ex. by my forgetting to add a star before it before I ran the program), but there might be a few I still missed. In such cases the word and meaning will be in the Halq'eméylem-to-English section but that meaning may not be in the English-to-

Halq'eméylem section. If you have a rough idea of the form's Halq'eméylem spelling or root, try looking there to see if a word with that meaning is found there.

Sample entries

This dictionary has a large number of different types of information about each word in the Halq'eméylem-to-English section. The English-to-Halq'eméylem section is mainly an index or finder-list. Later in this introduction is a complete list of all types of information given and all the abbreviations for them, in various tables and charts. For now, I will show you how to read the first three entries under q'.

The first entry is:

<=q'>, da // =q' //, DIR /'on something else, within something else'/, TIB; found in <q'elq'élq't>, //C₁əC₂=q'él=q' //, /'tangled on s-th else, snagged (as a net on a log or branch)'/, <q'elq'élq't>, //C₁əC₂=q'él=q'=t //, /'coil it'/, <xéyq'et>, //xéy=q'=ət //, /'scratch it (to itch it)'/ (compare with <xéy=m=et> grab it).

Angle brackets show forms in the Stólō writing system. To make it easier to find, forms in the Stólō writing system are shown in bold-face type. These are first in every entry, since the speakers and learners of the language will locate them easier. Linguists can use the key (pp.xxxv-xxxvii) to quickly learn the writing system's equivalents to IPA characters and can find the IPA characters given for each word, closely following the word spelled in the writing system. If a hyphen or equals sign precedes a Halq'eméylem form, the form is a suffix, an affix added after the root or after another suffix on the root. The equals sign shows it is derivational, that is, changes the meaning of the word or the word class of the word (for ex. from a verb to a noun); some roots cannot occur as words by themselves and these are sometimes indicated by ending them with an equals sign as well. A hyphen shows the affix is inflectional, so that it allows the word to be used in a sentence (for ex. adds a subject to the verb, makes it plural, etc.). The first entry, given above, is <=q'>, a derivational suffix, written in the International Phonetic Alphabet (IPA) also a // =q' // . Its main semantic area (domain or subdomain) is in DIRECTION and it means *on something else, or within something else*. (Translations are given in italics.) This meaning also belongs in the semantic area or domain of TRANSITIVIZERS, INTRANSITIVIZERS, BENEFACTIVES (TIB), suffixes that show what the verb is acting on or affecting; it isn't actually such a suffix but is closely related semantically, since getting tangled on something else shows an action on something else or affecting something else. When an entry is an affix, typically some examples are given of some words in which it is found; these are shown after the words "as in" in this entry.

The examples are given first in the Stólō writing system used for Upriver Halq'eméylem, then in the IPA used by linguists. The IPA form here shows all the prefixes, infixes and suffixes added to the root, separated by hyphens or equals signs and within double slashes, which linguists use to show morphophonemic transcriptions (versions of the word with the affixes shown divided from the root and from each other). The first example under <=q'> begins with doubling or reduplication, where the first consonant (C₁) and the second consonant (C₂) are copied, separated by a vowel (/ə/, called schwa by linguists and written as <e> in the Stólō writing system) and prefixed to the root. In this case, the root is followed directly by the suffix we have looked up, <=q'>. This example means *tangled on something else, snagged (as a net on a log or branch)*; in linguistics, translations are usually shown within single quotes, as here, but to highlight them, they are also put in italics throughout the dictionary; in certain systematic places the single quotes are omitted. Other examples follow, in the same order. The last one has a form to compare which shows the root without the suffix; by contrasting this we can show clearly what part of the word's meaning belongs to the root and what part to the affixes.

The second entry or root after q' is:

<q'a ~ qa ~ qe>, free root //q'ε ~ qε ~ qə //, CJ ['or'], syntactic analysis: conjunction, attested by AC, example: <lí chòkw te lálems q'a lí stetís? ~ lí chòkw te lálems qa lí stetís?>, //lí cák^w tə léləm-s

q'ɛ/qɛ lí s=tə[=C₁əAí=]s//, /'Is his house far or is it nearby?'/, attested by AC, <tsel má:ythome kw'e tseláqelhelh qe lhulhá.>, //c-əl mɛ:y=T-ámə k'wə əlɛq=əʔ=əʔ qə ʔuʔɛ//, /'I helped you yesterday or the day before yesterday.'/, attested by AC.

This word has several variant pronunciations (~ means “varies with”); it is a free root (can occur as a word by itself without affixes). The IPA spelling follows next with the variants given in the same order. The word belongs to the semantic domain of CONJUNCTIONS (abbreviated CJ) and means *or*. If there are comments about the pronunciation (phonological comments), the word structure (morphological comments), the word order (syntactic analysis), or the meaning (semantic comments SMC or ASM), they follow next, as here. The word is given or attested by Amy Cooper (abbreviations of speaker’s names, and other abbreviations, are listed later in this introduction); then examples in sentences may be given, as here, if available. In the IPA version, full morphological analysis is given, breaking all the words down into their morphemes, whether prefixes, infixes, suffixes, or roots; infixes are shown in square brackets and both preceded and followed by equals signs or hyphens, stuck in the correct place within the root (usually after the first vowel of the root). The speaker or speakers who gave the sentences are identified after the meaning is given.

The third entry or root after **q'** is:

<**q'á:l**>, free root //q'ɛ:l//, EFAM ['believe'], syntactic analysis: intransitive verb, attested by Elders Group, AC, EB, example: <skw'áy kw'els q'á:l kwes lúwes.>, //s=k'wɛy k'w-əl-s q'ɛ:l k'w-ə-s lúwə-s//, /'I couldn't believe it was you.'/, literally /'it can't be that -I -subordinate nominalizer believe that -subordinate nominalizer is you -it (third person subord. subject)'/, attested by AC, <ówelhtsellh q'á:l.>, //ʔówə=ʔ-c-əl-ʔ q'ɛ:l//, /'I don't/didn't believe.'/, Elder's comment: "there's no word for doubt", attested by EB.

This headword is <**q'á:l**>, a free root whose meaning belongs in the semantic area or semantic domain of EMOTIONS, FEELINGS, ATTITUDES, MOODS (abbreviated EFAM), and it means *believe*. If a root is a bound root (cannot occur as a separate word without added affixes), then it is sometimes hard or impossible to identify its meaning—one must subtract the meanings of the affixes to see what meaning is left, but this must be done for all the words it appears in and a common or shared meaning or set of related meanings found for the root. Here, however, there is no problem. The word is an intransitive verb (that is, doesn't have to have a stated object which it acts upon). It was attested by the Elders Group, Amy Cooper, and Edna Bobb (no dates recorded, or attested on multiple dates). A sentence example follows next, and after its meaning is given, a literal meaning is given which shows the meaning of each morpheme in the order it occurs in each word, separated by a hyphen. This helps to show how native speakers organize the words and their meanings and think about the phrase subconsciously. The first example was given by Amy Cooper, the second example sentence by Edna Bobb, who commented, when asked for the Halq'eméylem word for *doubt*, said there is no single word, so this phrase would be a way to express it.

This root has a number of words derived from it which are shown as indented sub-entries under it. Whenever a word is indented further from the left margin than the word above it, it is derived or inflected from the word above it indented less. Thus:

<**q'á:l**>, free root //q'ɛ:l//, EFAM ['believe'], syntactic analysis: intransitive verb, attested by Elders Group, AC, EB, example: <skw'áy kw'els q'á:l kwes lúwes.>, //s=k'wɛy k'w-əl-s q'ɛ:l k'w-ə-s lúwə-s//, /'I couldn't believe it was you.'/, literally /'it can't be that -I -subordinate nominalizer believe that -subordinate nominalizer is you -it (third person subord. subject)'/, attested by AC, <ówelhtsellh q'á:l.>, //ʔówə=ʔ-c-əl-ʔ q'ɛ:l//, /'I don't/didn't believe.'/, Elder's comment: "there's no word for doubt", attested by EB.

<**q'áq'el**>, cts //q'ɛ[-C₁ə-]//, EFAM ['believing'], (<-R1-> *continuative*), phonology: reduplication, syntactic analysis: intransitive verb, attested by Elders Group.

- <lhéq'él:exw ~ lhq'él:exw ~ lhq'élexw>, ncs //†(ə)=q'ɛ[=Aá=]l=l-əx^w//, EFAM /'know s-th, know s-o'/, (<lh= ~ lh=> use, extract, extract a portion), root <q'á:l> believe, (<=l> non-control transitivizer, accidentally, happen to, manage to, é-ablaut resultative or durative), (<-exw> third person object), phonology: consonant merger, ablaut, syntactic analysis: transitive verb, dialects: *Cheh.*, *Tait*, attested by IHTTC, EB, AC, JL, other sources: ES /†əq'əl-əx^w/ know, also <slhéq'el:exw ~ lhéq'el:exw ~ slhéq'elexw>, //s=†ə= 'q'ɛl=l=əx^w ~ †ə= 'q'ɛl=l-əx^w//, (<s=> stative, lh= use, extract, extract a portion), (<= ' (= stress-shift)> derivational), phonology: vowel reduction to schwa-grade in root after stress-shift, dialects: *Chill.*, attested by IHTTC, AC, JL, also <slhéq'awelh ~ slhéq'ewelh>, //s=†ə= 'q'ɛl=wə†//, dialects: *Pilalt (Chilliwack town) and Chill. (Sardis)*, attested by EB, AC; example: <líchxw lhéq'él:exw?>, //lí-c-x^w †ə=q'ɛ[=Aá=]l=l-əx^w//, /'Do you know?, (Do you know it?)'/, attested by AC; found in <lhéq'el:exwtsel.>, //†ə= 'q'ɛl=l-əx^w-c-əl//, /'I know.'/, example: <líchexw slhéq'awelh kw'as ch'eqw'ówelh?>, //lí-c-əx^w s=†ə= 'q'ɛl=əwə† k^w-ɛ-s c'əq^w=ówə†//, /'Do you know how to make a basket?'/, attested by AC, <qe ówétal slhéq'elexw; tsel we xwlálá: el.>, //qə ʔowə= 'tɛ-l s-†ə= 'q'ɛl=l-əx^w; c-əl əw x^wíélé. ʔəl//, /'I didn't know/understand; I just listened.'/, attested by AC, <ówétal slhéq'elexw.>, //ʔowə= 'tɛ-l s-†ə= 'q'ɛl=l-əx^w//, /'I don't know.'/, attested by AC, <ówéta slhéq'el:exwes.>, //ʔowə= 'tɛ s-†ə= 'q'ɛl=l-əx^w-əs//, /'She doesn't know.'/, attested by AC, <tsel slhéq'elexw (kwses spá:th, kws spá:ths).>, //c-əl s=†ə= 'q'ɛl=l-əx^w (k^w-s-əs s=pé-θ, k^w-s s=pá-θ-s)//, /'I know it was a bear.'/, attested by AC, <ówéta slhéq'elexw wetemtámescha kw'es álhtelchet qelát.>, //ʔowə= 'tɛ s=†ə= 'q'ɛl=l-əx^w wə-təm=tém-əs-cɛ k^wə-s ʔi[=Aé=]†=təl-c-ət qəlét//, /'No-one knows when we'll be able to eat again.'/, literally /'nobody knows it when/if- time= is what -it (subjunctive) -will be/future that -subord.cl. eat meal -we again.'/, usage: story of the Flood, attested by AC, <ówéta slhéq'elexw te skwíxs te "cave".>, //ʔowə= 'tɛ s=†ə= 'q'ɛl=l-əx^w tə s=k'íx^y-s tə "cave"/, /'Nobody knows the cave's name., (Nobody knows the name of the cave.)'/, usage: story of the Flood, attested by AC, <chel we lhq'élexw westámes kw'e le kwú:tes.>, //c-əl wə †=q'ɛ[=Aá=]l=l-əx^w wə-s=tém-əs k^wə lə k^wú.=T-əs//, /'I know what he took.'/, literally /'non-subord.subj.- I contrastive know it if- is what -it (subjunct. subject) what (the (remote)) third person past he takes it'/, attested by EB, <(chel we, chu) lhq'élexw wetewátes kw'e xt'ástxw tethá.>, //(c-əl wə, c(-əl)-u) †=q'ɛ[=Aá=]l=l-əx^w wə-tə=wét-əs k^wə xt'és=sT-əx^w tə=θé//, /'I know who did it.'/, literally /'I contrastive know it if/when- is who -3subj. that do s-th that'/, attested by EB, <wétal slhéq'ewelh>, //ʔowə= 'tɛ-l s=†ə= 'q'ɛl=wə†//, /'I don't know.'/, dialects: *Pilalt and Chill. (Chilliwack and Sardis)*, attested by EB (5/18/76), <wétal lhq'élexw>, //ʔowə= 'tɛ-l †=q'ə[=Aá=]l=l-əx^w//, /'I don't know.'/, dialects: *Cheh.*, attested by EB, <líchxw lhq'él:àx?>, //lí-c-x^w †=q'ɛ[=Aá=]l=l-àx^y//, /'Do you know me?'/, dialects: *Cheh.*, *Tait*, attested by IHTTC, also <líchxw slhéq'el:òx?>, //lí-c-x^w s=†ə= 'q'ɛl=l-àx^y//, dialects: *Chill.*, attested by IHTTC (8/8/77).
- <lhéq'elómet>, ncs //†ə=q'ɛl=l-ámət//, EFAM /'know oneself, be confident'/, (<-ómet> reflexive), phonology: consonant merger, vowel-reduction to schwa-grade of root from stress-shift to affix, syntactic analysis: intransitive verb, attested by Elders Group (4/6/77), also <slhéq'el:ó:met>, //s=†ə=q'ɛl=l-á-mət//, also /'understand'/, phonology: consonant merger, dialects: *Chill.*, attested by AC (10/8/71), example: <ówetsel líl slhéq'el:ó:met>, //ʔowə-c-əl lí-l s=†ə=q'ɛl=l-á-mət//, /'I don't understand.'/, attested by AC.
- <q'élmet>, iecs //q'ɛ[=Aá=]l=məT//, EFAM /'believe s-o, trust s-o'/, (<é-ablaut> non-continuative), (<=met> indirect effect control transitivizer), phonology: ablaut, syntactic analysis: transitive verb, attested by Elders Group (2/16/77, 2/8/78), AC, example: <ówetsellh q'élmethóme.>, //ʔowə-c-əl † q'ɛ[=Aá=]l=məT-ámət//, /'I don't (didn't) believe you.'/, attested by AC.
- <q'áq'elmet>, cts //q'ɛ[-C,ə-]l=məT//, EFAM /'believing s-o'/, (<-R1-> continuative), phonology:

reduplication, syntactic analysis: transitive verb, attested by Elders Group (2/8/78).

<q'elstá:xw>, caus //q'el=sT-ə[=Aé:]=x^w//, durs, EFAM /'fool s-o, deceive s-o, (lie to s-o [SJ])/, (<=st> causative control transitivizer), probably <á:-ablaut on suffix> durative or possibly to dissimilate from <q'elstexw> return it, bring it back, give it back which has root <q'ó:> together or possibly <q'ál> go over/around, go back on oneself, coil, (<-exw> third person object), phonology: ablaut, syntactic analysis: transitive verb, attested by EB, Deming, also /'lie to s-o/, attested by SJ (Deming 4/27/78), example: <tse q'elstá:xw.>, //c-əl q'el=sT-ə[=Aé:]=x^w//, /'I fooled him./, attested by EB; found in <q'elstá:xwes.>, //q'el=sT-ə[=Aé:]=x^w-əs//, /'He fooled someone./, attested by EB, example: <q'elstá:xwes qesu q'á:l.>, //q'el=sT-ə[=Aé:]=x^w-əs qə=su q'é:l//, /'He fooled him and he believed./, attested by EB, <q'elstá:xwes á:lhtel te Lawéchten.>, //q'el=sT-ə[=Aé:]=x^w-əs ʔé:ʔtəl tə ləw(=)éc=tən//, /'They fooled Lawéchten., They lied to Lawéchten./, comment: Lawéchten is a Nooksack language proper name; Charlie Lewiston, an Indian doctor from the area of Nooksack, Wash., had that name till his death ca. 1920 (pronounced by non-Indians as Lewiston); the name was formally passed to Brent Galloway by Alice Hunt (AH) and Louisa George (LG) at a naming ceremony 10/9/77 at Chehalis, B.C.), attested by Deming (4/27/78 and 1974-1977 as well); found in <q'elstá:xwesthòx>, //q'el=sT-ə[=Aé:]=x^w=sT-áx^y//, (irregular), comment: in this form =stá:xw is used as part of the root and a second causative =st is added, then the object pronoun suffix -òx me; it is not clear whether this is an error or is required and allowed to maintain the root vowel shifted into =stá:xw; normally the -exw is present only when a third person object is intended (even if it is reanalyzed and considered part of the causative and non-control suffixes, as =stexw and =lexw, as do Suttles and Hukari in other dialects of Halkomelem); but here both the e (though moved) and the xw are retained with the third person object superceded by the -òx second person singular object suffix, phonology: the last vowel has stress downstepped to ` , attested by Deming (4/27/78).

<q'íq'elstá:xw>, cts and dmV //C₁í=q'el=sT-ə[=Aé:]=x^w//, EFAM /'fooling s-o, (fool s-o as a joke, April-fool s-o [Deming])/, attested by Deming (2/7/80), (<R4=> diminutive continuative), phonology: reduplication, metathesis or ablaut plus vowel-reduction, morphological note: causative durative continuative, syntactic analysis: transitive verb, attested by Elders Group (3/29/78), also <q'íq'elstaxw>, //C₁í=q'el=sT-ə[=Aé:]=x^w//, [q'éq'əlstəx^w], also /'fool s-o as a joke, April-fool s-o/, (<R4=> diminutive), morphological note: causative durative diminutive, attested by Deming (2/7/80); found in <q'éyq'elsthome>, //C₁í=q'el=sT-ámə//, /'to April-fool you/, attested by Deming, <q'íq'elsthòm.>, //C₁í=q'el=sT-àm//, /'You're being fooled./, attested by Elders Group (3/29/78).

So this root has four sub-entries (words derived or inflected from it directly), and the last three of these each have a sub-entry of its own. The four are <q'áq'el> 'believing', <lheq'él:exw ~ lhq'él:exw ~ lhq'élexw> 'know s-th, know s-o' (which has a form derived from it: <lheq'elómet> 'know oneself, be confident'), <q'élmet> 'believe s-o, trust s-o' (which has a form inflected from it: <q'áq'elmet> 'believing s-o'), and <q'elstá:xw> 'fool s-o, deceive s-o, (lie to s-o [SJ])' (which has a form derived from it: <q'íq'elstá:xw> 'fooling s-o, (fool s-o as a joke, April-fool s-o [Deming])').

<q'áq'el> is a continuative stem (cts); later in the introduction there is a list of all such abbreviations and what they stand for. It has infix doubling or reduplication to make it continuative (i.e. adds the -ing, thus believing). The infix consists of a copy of the first consonant of the root (C₁) followed by /ə/ (called schwa by linguists, spelled <e> in the Stó:lō orthography); it is inserted or infixed inside the root, after the first vowel.

<lheq'él:exw ~ lhq'él:exw ~ lhq'élexw> 'know something, know someone' is the next word derived from the root. It has a prefix, <lhe= ~ lh=> 'use, extract, extract a portion', added before the root. And it has two suffixes, <=l> non-control transitivizer, accidentally, happen to, manage to and <-exw> third

person object (the *someone* or *something*) added after the root. A non-control transitivizer means that the subject doesn't have full control over what or who he/she knows, in this case, but the verb can have an object. The root vowel <á> is also changed in this word to <é>: this is called **é-ablaut** and adds the meaning *resultative* or *durative*. *Resultative* shows the meaning emphasizes the result of the action (for ex. *do* + *resultative* becomes *done*). This vowel change could also mean *durative* (continued for a long time or long duration). Putting the meanings of these morphemes together gives a literal meaning something like “happen to or managed to have used or extracted a portion of belief about someone or something” which becomes ‘*know something or someone*’. Halq'eméylem (and this dictionary) is filled with this kind of interesting information, which shows how words were and are made up in the language.

The entry for this word is a complicated one with lots more information about the word. There is consonant merger when the last <l> of the root is combined with the <l> of the suffix; the result is an <ll> which is held for twice as long as a single <l> in the first two variants (shown by <l:l> in the writing system); in the last variant, the second <l> is just dropped. These three variants are found in the Chehalis and Tait dialects, attested by the elders in the Intermediate Halkomelem Teachers Training Class (IHTTC) and by Edna Bobb, Amy Cooper, and Joe Lorenzetto (EB, AC, JL). Another place where one of these variants is attested is in the Elmendorf and Suttles article from 1960; that form is given next in the IPA. There is another variant set of pronunciations in the Chilliwack dialect, <slhéq'el:exw ~ lhéq'el:exw ~ slhéq'elexw>, attested by IHTTC, AC, JL, and another variant set <slhéq'awelh ~ slhéq'ewelh>, //s=ʔə=´q'əl=wəʔ//, subdialects: *Pilalt* (*Chilliwack town*) and *Chill.* (*Sardis*), attested by EB, AC. This last set means *know* but lacks the <-l-exw> suffixes and has instead the suffix <=welh> which is probably <=welh ~ =ulh ~ welh> meaning *already*. One version leaves the root vowel unchanged, the other changes it to <e>, but both shift the high tone to the first syllable, and both sets of variants add a prefix <s-> stative (which means *be in a state of*); the literal meaning of this last variant set is “to be in a state of already extracted or used believing”, thus yielding *to know someone or something*).

The entry continues with a large number of example sentences, each with the Stó:lō orthography first, then the IPA, the meaning, then the person who attested it, and where specified, the dialect or dialects the speakers reported it to be in.

The next entry, <lheq'elómet> '*know oneself, be confident*', is derived from the word just discussed, <lheq'él:exw ~ lhq'él:exw ~ lhq'élexw>, and is a non-control reflexive stem; the suffix <-ómet> is *reflexive, do to oneself*. The meaning *be confident* is developed from “know oneself” and is an alloeme. There are also dialect variants in the entry for the Chilliwack dialect with *stative* <s-> prefixed. There is also the same consonant merger as in the previous word that <lheq'elómet> is derived from, and since the reflexive has a vowel with a high tone (also called high stress in lessons), the root vowel <á> or <é> is changed to low tone <e> (called by linguists here zero grade or schwa). The Chilliwack form is also used to mean '*understand*'. The verb is used as an intransitive verb that can't have a further object. (You can't “be confident the dogs.” for example. If you want to say *know/understand the dogs*, you would use the transitive verb <slhéq'el:exw ~ lhéq'el:exw ~ slhéq'elexw> in the Chilliwack dialect.) There is one example sentence to conclude the entry.

The next entry or stem is <q'élmet>, an *indirect effect control* stem (iecs), meaning '*believe s-o, trust s-o*'. It is derived directly from the root <q'á:l> with a vowel change (<é-ablaut> *non-continuative*) and a suffix (<=met> *indirect effect control transitivizer*). (The reason we know this vowel change has a different meaning than the same vowel change seen in <lheq'él:exw ~ lhq'él:exw ~ lhq'élexw>, is because the next word is <q'áq'elmet> which is *continuative* and keeps the root vowel by contrast.) The suffix meaning *indirect effect control transitive* shows that believing or trusting someone has only an indirect effect on that someone (unlike *chopping carrots* which has a direct effect on the carrots). This word is a transitive verb and was attested by the Elders Group (2/16/77, 2/8/78 [U.S.-style dates]) and by Amy Cooper. A sentence example follows, showing the typical change of <=met> to <=meth> before

certain pronoun suffixes.

The next form <q'áq'elmet> 'believing s-o', derives from the last stem. It is a continuative stem with infixed doubling or reduplication (copies the first consonant of the root, adds <e> and infixes this after the first vowel of the root and before the next root consonant (<l>). It's also a transitive verb, attested by Elders Group (2/8/78).

The next entry or stem is <q'elstá:xw> *fool s-o, deceive s-o*, a causative stem (caus) and also durative (durs), and according to Susan Jimmy, [SJ], it also can mean *lie to s-o*. It has a suffix, <=st> *causative control transitivizer*, which applied to the root *believe* gives it a literal meaning of "cause someone to believe", thus *fool s-o, deceive s-o*. It probably has <á:-ablaut> *durative* on the suffix <-exw> (*third person object*), thus changing the <e> to <á:>; this vowel change morpheme is the only one that is applied to change vowels in suffixes—the others only change the vowel in the root. There is a possibility that the change is also to dissimilate (make the word different) from <q'elstexw> *return it, bring it back, give it back* which either has root <q'ó:> *together* or possibly <q'ál> *go over/around, go back on oneself, coil*. There are then a number of example sentences (labelled "example") and words (labelled "found in") of this word in use. There is a comment and history in passing of the name <Lawéchten> which is used in one of the sentences (the author was given this name in a formal naming ceremony in Chehalis, B.C. in 1977). This is followed by an odd example that seems to have another causative added onto this word, and some discussion about the form and alternate analyses of the causative suffix as <=stexw> instead of <=st> and my arguments against that. There is also a comment about a tone change in the last vowel of the odd form, that the tone or pitch stress is lowered (downstepped) from high to mid.

The last form in this excerpt from the dictionary is <q'íq'elstá:xw>, a diminutive continuative stem (all diminutive verbs are also continuative, i.e. *doing s-th a little*)(cts and dmv) and means *fooling s-o*, and according to the Deming elders also *fool s-o as a joke, April-fool s-o*. It was attested by the Deming elders on Feb.7, 1980 (2/7/80). It has prefixed reduplication (<R4=> *diminutive continuative*), which is made by copying the first consonant of the root, adding <í> and prefixing this right before the root. The word is derived from <q'elstá:xw>, the stem or entry before it in the dictionary. It keeps the *durative* vowel change on the suffix <á:-ablaut>, so there is a morphological note: *causative durative and diminutive continuative*. The literal meaning is "fooling someone a little for a while".

These sample entries do not show examples of every abbreviation or type of information or type of entry, but give an idea how entries are constructed and what to get out of them. To interpret the rest of the entries check out the abbreviations given later in this introduction. They show best the types of other information that can be found in various entries, and the lists can be used to look up all abbreviations. Sometimes there are entries which have words from related languages. These are given because they are cognates or words that are related to the word in Halq'eméylem and in most cases to cognate words in other sister Salish languages; linguists can follow the sound correspondences within such cognate sets and reconstruct what the word looked like in the parent language, either Proto-Central Salish or Proto-Salish for example—both are ancestors of Halq'eméylem. These cognate words are similar in shape and in meaning and follow regular sound shifts or correspondences between sister languages. They also often help us to see what the meaning of the root is or was in Halq'eméylem and confirm the spelling of the word in Halq'eméylem. For example if Squamish, Lushootseed and Nooksack have q' in the word and the Halq'eméylem speakers have some variation between <q'> and <qw'>, the cognates help to show that the <q'> is probably the correct sound in spelling the word and <qw'> is a recent or older variant.

The English-to-Halq'eméylem portion of this dictionary is much simpler to use. Here is a brief example. This whole portion of the dictionary is in 10-point type instead of 11-point to maintain the original headers provided by the sorting program. The English is on the left, but all the variant meanings of the Halq'eméylem word are also given to show all the alloemes and the range of meaning of each

word, affix or idiom. After these alloemes, the word itself in Stó:lō orthography appears after two colons (:). Where the main entry of the word is under a root, that is shown after a < (comes from) sign.

About the language

Halkomelem is an endangered Central Salish language of the Pacific Northwest (B.C. and Washington) with dialects of Upriver, Downriver, and Island Halkomelem (Elmendorf and Suttles 1960 discusses the differences between dialects as do Hill-Tout 1902 and 1904, Duff 1952, and Kava 1972). Each dialect had subdialects, and for Upriver and Island some of these remain. Gerdtz (1977, 1996, 1997, and 1999 for ex.) describes some of the subdialect differences. Island Halkomelem was and is spoken on Vancouver Island from Malahat to Nanoose. Downriver Halkomelem was spoken in the downriver end of the Fraser Valley, from Vancouver to Matsqui; there are still several first language speakers of the Musqueam subdialect in Vancouver, but the last first language speaker of the Matsqui subdialect (a member of the Nooksack tribe, Alice Hunt) passed away June 2004 in Washington. Upriver Halkomelem was and is spoken between Abbotsford and Yale, B.C. and by a few speakers in Whatcom Co., Washington, members of the Nooksack Tribe there.

There are probably less than six fluent elders left who spoke Upriver Halkomelem as their first language; the same is true of Downriver Halkomelem, but the situation is somewhat better for Island

Halkomelem with probably about 50 such speakers left. Fortunately, for all three dialects, English speaking tribal members have been actively trying to learn and revive the language with the help of five or six linguists and the remaining fluent elders, and there are now some moderately fluent speakers of each. A group of about eight students, three or four years ago, finished a three-year language immersion course in Upriver Halkomelem, and there is a similar number of graduates from an earlier three-year sequence of courses given through Simon Fraser University extensions. The Stó:lō Shxweli language department, at the Stó:lō Nation, have given classes from pre-school to adult for 15 to 20 years and for at least 10 years have also used increasingly sophisticated computer lessons which have also been developed (by Dr. Strang Burton); from about 2002 similar work has been done for Upriver Halkomelem by the Nooksack Tribe (coordinated by Catalina Renteria (a graduate of the Simon Fraser University extension program) and now for the Nooksack language by George Adams). Similar efforts have shown good success for Musqueam and Cowichan. The dialects are sufficiently different that separate full grammars have been written for them (Leslie 1979, and Hukari, In preparation for Island or Cowichan; Suttles 2004 for Musqueam (Downriver Halkomelem), and for Upriver Halkomelem (including Chilliwack, Chehalis, Pilaltxw, Sumas, and Tait subdialects) Galloway 1977a and 1993a (for people with linguistic training) and Galloway 1980a (for those without linguistic training). There are also separate dictionaries either done or being completed for each, also based on original fieldwork (Hukari and Peters 1996, and Gerdts, Compton, Edwards, Thorne, & Ulrich 1997), Suttles posthumous, in preparation by Gerdts, and the present work by Galloway).

The Upriver Halkomelem subdialects share certain phonological, morphological, syntactic, and lexical features which allow them to be considered as a unit in contrast to Downriver and Island dialects of Halkomelem. Within the Upriver area are the Chilliwack, Chehalis, Pilaltxw, Sumas, and Tait subdialects. I believe Tait includes speakers native to the following areas: Yale, Hope-Katz, Seabird Island, and Laidlaw-Cheam; Chehalis includes Chehalis and Scowlitz; Chilliwack River includes Chilliwack Landing-Rosedale (Pilaltxw), Sardis-Tzeachten, and Soowahlie-Cultus Lake (Pilaltxw includes Chilliwack Landing-Rosedale and is often considered part of the Chilliwack subdialect).. In the Nooksack-Everson-Deming area of Washington, some members of the Nooksack Tribe speak the Chilliwack River dialect (Sardis-Tzeachten), and some speak a dialect more downriver (Kilgard-Sumas and Matsqui microdialects); these last two microdialects probably form a single subdialect and seem to have some distinctive linguistic features of both Upriver and Downriver dialects. With the establishment of an ethnic curriculum and a writing system, the upriver people now refer to themselves and the downriver people in writing as the Stó:lō and politically all those except the Musqueam as the Stó:lō Nation, though in fact some reserves opt in and out of the Stó:lō Nation politically, and the more downriver groups are not politically part of the Stó:lō Nation. Linguistically, Upriver Halkomelem, Downriver Halkomelem, and Island Halkomelem will refer to the groupings of dialects.

I began work on the language in August 1970 with Mrs. Amy (Lorenzetto) (Commodore) Cooper on the Soowahlie Reserve near Vedder Crossing. I worked with her each summer (or fall) in 1970, 1971, 1972, and 1973, funded by the Survey of California and Other Indian Languages at the University of California, Berkeley. My thesis supervisor was Mary Haas. In 1972 I had only a week in the area but met the Stalo Heritage Project's Elders Group (a group of most of the fluent speakers of Upriver Halkomelem who spoke it as a first language) and worked with the group and with some individual elders twice. In 1973, Amy and I worked together from August to December; during that period, on several occasions, I also visited Mrs. Mary Charles of Seabird Island and with Mrs. Cecilia Thomas of Seabird Island (near Agassiz), who was able to tell me a number of stories in Halkomelem. I also met with Mrs. Nancy Phillips of Chehalis (on Harrison River), who was teaching the language in the Chehalis Reserve federally-funded elementary school.

Amy, her husband Albert, and I also made a trip to Yale and visited with Mrs. Margaret Emory of

Yale, who spoke only Halkomelem and Thompson. At the end of the year (Dec. 1973), I gave a speech in Halkomelem at a large spirit dance at Tzeachten; the speech was in honor of chief Richie Malloway, who put on the dance, and it also encouraged the preservation and revival of the language. I constructed the speech in Halq'eméylem, then Amy corrected my grammar in the speech and gave me stylistic pointers. Amy was good to work with--patient, diligent, always willing to work, and always willing to travel with me to visit others. She would even call people up (for ex. Elizabeth Herrling and Joe Lorenzetto) to track down particular words she could not remember. In 1974 I self-funded a short trip and was also hired by the Nooksack Tribe in Deming, Wash. to work with their Halkomelem Workshop, which had about 15 fluent speakers of Upriver Halkomelem and the last fluent speaker of Nooksack.

In 1974 I applied to the newly started Coqualeetza Education Training Centre in Sardis, B.C. to set up a Halkomelem program for them, develop a writing system, classes, train teachers, and train an elder to replace me to head the program. I was hired and moved to Chilliwack in Jan. 1975. Working with both the Elders Group and the Nooksack Tribe's Halkomelem Workshop, as well as a full-time research assistant elder, through daily and weekly field work plus card files from my work with Amy Cooper (which I began in 1970), we amassed a dictionary card file of 15,000 cards of Halkomelem words with example sentences. Through several grants at different times Coqualeetza was able to employ Wilfred Charlie, Mrs. Tillie Gutierrez, Mrs. Edna Bobb, and Mrs. Amelia Douglas to help with language research and file-slipping. Tillie is and Amelia was fluent in the Tait dialect; Edna was fluent in the Chehalis dialect; and Wilfred knew a little of the Chilliwack (Sardis) dialect. Edna and I, especially, worked together from November 1975 to October 1976. As a result, I elicited, transcribed, and analyzed and she file-slipped several thousand Chehalis forms from her, as well as all the forms from the weekly elders' meetings since 1975; we also transcribed a number of songs and stories. Wilfred, Edna, and Amelia also helped me transcribe some tapes of elders' meetings going back to 1972, though many remain to be transcribed (I understand Elizabeth Phillips has since done those). Amelia and I worked together from May to September 1978 and from November 1979 to July 1980, obtaining several thousand Tait forms and transcribing more songs, conversations, and stories. We made a copy of this whole set of file cards before I left the program in the hands of Mrs. Amelia Douglas, one of the graduates of the three Halkomelem Teacher Training courses for elders (Beginning, Intermediate and Advanced, abbreviated as BHTTC, IHTTC, and AHTTC). These courses taught literacy, curriculum development, phonics, grammatical structure, and also were occasions for transcribing a great many new words for the dictionary in the process. Galloway 1979a, 1988b, 2001b, 2002a and 2007a have accounts of this program and the Nooksack program in some detail.

From 1978 to 1982 I worked with Ralph Maud and Marie Weeden to transcribe and annotate all of the 50 tapes Marie's father Oliver Wells had recorded with speakers of Upriver Halkomelem (Maud, Galloway & Weeden 1978-1982), and good portions of the transcripts are published in Maud, Galloway and Weeden 1987. Mrs. Edna Bobb, my elder research assistant during this period, helped me transcribe and translate difficult recorded passages of Halkomelem. Thus, a number of speakers who were already dead when I began my work (Dan Milo, Bob Joe, Albert Louie, Harry Edwards, Mrs. Margaret Jim, and others) have contributed their knowledge to this dictionary; all their recorded words are in this dictionary, as well.

In 1984 I received a grant from the National Endowment for the Humanities to compile an Upriver Halkomelem dictionary and enter data towards a Nooksack language dictionary, learning how to enter and sort the data on computers with Dr. Bob Hsu of the University of Hawaii. Dr. Laurence Thompson and his wife, Terry, as well as Dr. Thom Hess and Vi Hilbert (táq^wšəblu) had been working on similar projects for the Thompson and Lushootseed languages, respectively. I learned the basics and a little programming in Hawaii, with their help, and thanks also to linguists at the University of Washington I was able to get started on the mainframe there. Thanks to Dr. Tim Montler and Pam Cahn, who assisted in the computer programming on the mainland and helped me progress from entering data on a Terak

computer (before p.c.'s) and sorting it on the mainframe, to converting everything to a p.c. and updated programs. Thanks also to Bob Hsu who, having retired to Seattle with his wife Pam Cahn, continued working with me through the final sorts, and formatting programs to convert the results from DOS to WordPerfect 4, then WordPerfect 8, the dictionary reached a stage where it was ready for final proofing and editing. Having gotten a professorship in 1988 at Saskatchewan Indian Federated College (now First Nations University of Canada in Regina, Saskatchewan), complicated matters a bit, leaving less time for editing. In 1991 the English-to-Halkomelem sort was done. As I got to stages where the whole thing was printed out, I made copies available to the Stó:lō Shxweli for use in classes from 1999 on. In summer 2002, the Nooksack Tribe funded recording of the English-to-Halq'eméylem portion with Mrs. Elizabeth Phillips, on digital camera. Much editing is required to get those files into shape for a CD. The 2004 edition was the first copy completely printed in WordPerfect. I gave copies of that print-out to the both the Stó:lō Shxweli and the Nooksack language department. Bob Hsu's Lexware program, his cross-referencing program, and formatting program, which he taught me to use and helped me program, debug, and fine-tune for Halq'eméylem, have produced a dictionary I am satisfied with and have allowed me to search for and correct inconsistencies, formatting errors caused by inconsistent data entry, etc. Galloway 1984c, 1985a, 1985b, 1986d, 1987a, 1989c, 1991d, and 1992a describe the use and progress of these programs and my dictionary projects. Thanks also to the Social Sciences and Research Council of Canada for several grants to allow the conversion of all my reel-to-reel and cassette tapes of Halkomelem, Nooksack, Samish, and some of Nakoda to CDs and presentation of these to the Stó:lō Nation Archives, the Nooksack tribe, the Samish tribe, and the First Nations University Indian Languages department, respectively. Thanks also to my research assistants, Mary Wilde, Darren Okemaysim, and Sonja van Eijk, who computerized all the Nooksack data and Sonja who converted all the tapes to CD's, allowing the start of the revival of the Nooksack language and the Samish language.

About the elders

A dictionary of this scope would not have been possible without the wonderful knowledge, help, and good humor of the elders I was able to work with on both sides of the border and the elders who contributed information to earlier linguists before I began my studies (for ex. "Captain John" Sualis of Soowahlie who worked with Charles Hill-Tout ca 1900-1902; Amy Cooper lived with Captain John when she married his son Commodore). Galloway 1980 and 1993 both have photos of most (if not all) of the elders whose knowledge contributed to this dictionary; Maud, Galloway and Weeden 1987 has photos of those elders whom Oliver Wells recorded, whose knowledge also contributed to this dictionary.

What follows are several lists of elders I worked with or transcribed tapes of: 1) alphabetically by last name with their affiliations and Indian names, 2) a compilation, organized by subdialect, of which elders spoke which subdialects of Halq'eméylem, 3) a list alphabetized by abbreviations used for them, abbreviations used (basically their first initial and last initial), and 4) a list of all the sister languages of Halkomelem, classified into branches and showing their dialects and the abbreviations used for their names in this dictionary and in the field of Salishan linguistics in general.

Then follows a brief technical section for those trained in linguistics on how to use the dictionary. After that, follows a list of abbreviations for each different type of information, then a list of syntactic abbreviations used in the syntactic analysis sections of each entry. After that is a section giving a key to convert from the Stó:lō writing system or orthography to the IPA. Finally is a bibliography of the references used (plus a few referred to but not actually seen by me on Downriver and Island Halkomelem).

COQUALEET7A ELDERS GROUP:

INDIAN NAMES (SO FAR AS KNOWN)

Louise Bolan
Tillie Bordon
Danny Charlie

Xwiyéym
Tísele, nickname Sp'éqw'oya from sp'éqw
'proud'

Madeline Charlie
Wilfred Charlie
Mandy Charnley
Amy Cooper
Amelia Douglas
Dolly Felix
Rosaleen George*
Al Gutierrez
Tillie Gutierrez

Temitátkwō, Thompson name
Kwethómet
Tá:wtelót, Katzie name
Óyewòt
Siyamíya, nickname Táneki
Tselxát, a Boothroyd Thompson name
Yamelót
Swolésiya
Xwiyálemot, from xwayólem 'gift one
really makes use of'
Ts'ats'elexwót

Elizabeth Herrling*
Lucy Jackson
Lawrence James
Lizzie Johnson
Flora Julian
Agnes Kelly
Francis Kelly
Philornena Kelly
Ed Leon Sr.

Teméxwtel
Siyámíya

Joe Lorenzetto
Jeanne McIntyre
Teresa Michell
Shirley Norris*
Hank Pennier
Maggie Pennier
Evangeline Pete
Bertha Peters
Mabel Peters
Mary Peters
Susan (Josh) Peters
Albert Phillips
Elizabeth Phillips
Nancy Phillips
Alice Point

Siyámiyò;t
Siyó:mót
Swelímeltxw, name from Soowahlie
Púlemqen, Port Douglas name
Páthiyetel
Selhámiya
Siyámtelòt, Tl'pá'a, Port Douglas name
Tselóyóthelwet
nicknames Swék'ten and Sende
T'esóts', Port Douglas name
Nickname Ta's

Roy Point
Jean Silver
Cecilia Thomas

Kweláxtelot
Málí
Siyámò:t, Th'atísiya

Henry Thomas

Siyámiyatéliyòt
Sí:le Qwet'óselwet
Th'ith'exwemlómét, name from Soowahlie,
her grandmother's name
Siyólewethet
Slóxiya, Ow'elóxwelwet (name of Thunder too),
Ts'símteló:t (daughter of Mt. Cheam)
Chewóteleq

(*joined group after it was no longer called Coqualeetza Elders Group; this group still meets weekly)

STALO HERITAGE PROJECT ELDERS GROUP: (besides most of those already listed)

Peter Bolan	Has 2 names: Xwelíkw'eltel and one other
Mary Charles	Láime', Thompson name
Seraphine Dick	Ts'esqílwet
Adeline Lorenzetto	Ow'et'ósiya, Xéyelwet, Tesyákw'ō (Thompson name)

OTHERS WHO CONTRIBUTED HALKOMELEM AT ELDERS MEETINGS AT SARDIS

Joe Alec	
Andy Alex	
Clara Campbell	
Annie Grace Chapman	
Ben James	
Flossie Joe (dau. of Isaac Joe, Bob Joe's brother)	
Rose Jones	
Stanley Jones	
Delphine Kelly	
Ed Kelly Sr. (Sumas/Matzqui dial.)	
Richie Malloway Sr.	Th'eláchiyatel
Jimmy Peters (Katz subdial.)	
P.D. Peters (Katz subdial.)	
Mary Lou Sepass	
Johnny Williams Sr. (Scowlitz subdial.)	

HALKOMELEM WORKSHOP ELDERS GROUP (NOOKSACK TRIBE)-,

Martha Castillo	Ts'etósiya
George Cline	Lexé:ym (Nooksack name)
Martha Cline	Siyamelhót (Tzeachten name)
Norma Cline	Thxwólemòt (Tzeachten name)
Mamie Cooper	Ts'átsesamíya (Musqueam name)
Esther Fidele	Sthó:nelh (Nooksack name)
Louisa George	Tsishwísalh, Tsisyúyud (Skagit name)
Mabel Hicks	Sló'met (Deroche name)
Alice Hunt	Gyi'xdémqe (a Cape Mudge Kwakwala name), Soyó:lhéwet, Siyáame (name of Agnes James)
Sindick Jimmy	Xá:xwemelh (a Nooksack name)
Susan Jimmy	Chúchowelwet (Yakweakwioose name from Squamish)
Joe Louie	Sákwelti, spelled Sacquilty by him
Ernie Paul	Gwítsideb (Skagit name)
Helen Paul	Tsetósiya (Shxway or Skway name)
Ella Reid	Xó:lelh
Bill Roberts	Snúlhem'qen (Nooksack name)
	lyésemqel (Stó:lō name)
Matilda Sampson	Xwélhiya
Philoniena Solomon	(name not remembered)
Dan Swanaset	Selhámeten (Nooksack name)

-xxiii-

Elizabeth Jane Swanaset	Lísepet
Maria Villanueva	Siyémchesót (Yakwekwioose name)
Clara Williams	lyálh (Soowahlie name)
Ollie (Olive) Williams	Swolesót (Soowahlie name)
Walt Williams	Dedíchbed (Skagit name from "Dutchman")

ELDERS ON WELLS TAPES:

Bob Joe	Xwelxwé:yleq
Dan Milo	Lhó:kw'elàlèxw
Mrs. Margaretta Jim (Mrs. August Jim)	Sqewóthelwet
Edmund Joe Peters (husband of Mary Peters)	
Harry Edwards	
Albert Louie	(wasn't given an Indian name)
John Wallace	
Mrs. Lena Hope	
Mrs. Maggie Emory	

Chilliwack dialect: Mrs. Amy (Mary Amy Lorenzetto) Cooper (1886-1975), Vedder Crossing, Soowahlie Reserve (AC); Mrs. Nancy Phillips, Sardis, late of Chehalis (NP); Lawrence James, Chilliwack Landing (LJ1); Danny Charlie, Sr., Chilliwack Landing (DC); Mrs. Susan Jimmy, Sardis, late of Everson, Washington (SJ1); Mrs. Marie Villanueva, Sardis, late of Everson (MV); Mrs. Mamie Cooper, Sardis, late of Everson (MC); Roy Point, Sardis (RP); Richard Malloway, Sr., Sardis (RM); Mrs. Philomena Solomon, late of Everson (PS1); Dan Milo, Sardis, Scowkale Reserve (DM); Bob Joe, Sardis, Tzeachten Reserve (BJ), Albert Louie, Yeqwyeqwiws Res. (AL), Ben James (some Chill.) (BJ2), Bill Roberts (BR), Esther Fidele (also some Nooksack)(EF), Elizabeth Herrling* (EH), Flossie Joe (FJ), Joe Louie, John Wallace, Soowahlie (JW), Louisa George, (also Skagit & Nooksack)(LG), Martha Cline (MC), Mabel Hicks (MH), Mabel Peters some Chilliwack and Downriver, Olive ("Ollie") Williams (dau. of AC)(OW), Shirley (Julian) Norris, (also Cowichan & some Chehalis) (SN), Wilfred Charlie, some Chilliwack, late of Scowkale, Martha Castillo* (Nooksack Tribe), Francis Kelly of Soowahlie, Tillie Bordon late of Chilliwack (TB).

Chehalis dialect: Ed Leon, Sr., Chehalis (EL); Mrs. Dolly Felix, Scowlitz, late of Chehalis (DF); Hank Pennier, Scowlitz (HP) and wife Mrs. Maggie Pennier, formerly from Chehalis (MP1); Mrs. Lizzie Johnson, late of Seabird Island (LJ2); Mrs. Edna Bobb, Chehalis, late of Seabird Island (EB); Mrs. Teresa Michell, Chehalis, late of Cheam Reserve (TM); Mrs. Philomena Kelly, Deroche (PK), Adeline Lorenzetto, Ohamil (AL), Albert Phillips, Chehalis (AP), Alice Point, Chehalis, Rosaleen George (RG), Seraphine Dick, Scowlitz (SD).

Tait dialect: Mrs. Cecilia Thomas, Cheam, late of Seabird Island (CT); her husband Henry Thomas, Cheam, late of Seabird Island (HT); Mrs. Susan (Josh) Peters, Union Bar, late of Seabird Island (SP); Mrs. Amelia Douglas, American Bar, late of Cheam Reserve #2 (AD); Mrs. Tillie Gutierrez* and husband Al Gutierrez, both of Katz (TG, AG); Mrs. Agnes Kelly, Laidlaw (AK); Joe Lorenzetto, Laidlaw, late of Boston Bar (JL); Mrs. Mary Peters, American Bar, late of Chilliwack (MP2); Mrs. Philomena Seymour, late of Seabird Island (PS2); Mrs. Maggie Emery, Yale (ME); Stanley Jones, Laidlaw, some Tait (SJ2); tapes of Mrs. Margaret Jim, Laidlaw (MJ), Adeline Lorenzetto, Ohamil (AL), Edmund Joe Peters (husband of Mary Peters), Skw'átets (EJP), Elizabeth Phillips* (also some Chehalis) (EP), Harry Edwards, Cheam (HE), Mrs. Lena Hope, Spuzzum (also Thompson, some Tait

(LH), P.D. Peters (Peter D. Peters), Katz (PDP), Rose Jones, Ohamil, some Tait (RJ)

Sumas/Kilgard dialect: Mrs. Jeanne Silver, Kilgard (JS); Peter "Speedy" Bolan (PB); Mrs. Ella (Cline) Reid, Kilgard, late of Everson (ER); Mrs. Alice (Cline) Hunt, Matsqui, of Everson, late of Bellingham (AH), Ed Kelly Sr. (EK), Delphine Kelly (DK).

Downriver Halkomelem dialects: GC George Cline, Matqui (GC), Norma Cline, Matsqui, Alice Hunt some Chilliwack (AH), perhaps Matilda Sampson, also some Lummi, Mandy Charnley, Katzie, Evangeline Pete, some Katzie, some Tait.

All those in the dialect list above but RM, DM, and BJ are or were members of the Coqualeetza Elders Group (more recently the Stó:lō Elders Group) or the Halkomelem Workshop at Deming. All of those listed were or are fluent speakers (except where "some" appears before the dialect), but this is not a complete list of the members of the two groups, nor of all the fluent speakers. It is a list of those from whom I have had specific forms or with whom I have had interviews. MP2 and her sister ME spoke Halkomelem and Thompson but little or no English. MJ spoke only Halkomelem and no English. Only those with asterisks by the names in the list above were still alive in 2008.

Elders' names by abbreviations in dictionary

AC Amy Cooper
AD Amelia Douglas
AG Al Gutierrez
AH Alice Hunt
AK Agnes Kelly

80 names in this list

*not cited in dictionary by abbreviation but by full name to prevent ambiguity with abbreviations of those cited more often.

Abbreviations of related Salish languages and dialects cited in the dictionary

(where no abbreviation was used in dictionary none is given here)

I Bella Coola Division

1) Bella Coola (BC)

II Central [Coast] Division (Central Salish)

2) Comox (Cx) (Island Comox [ICx], Mainland Comox [MCx])

3) Pentlatch (Pt)

4) Sechelt (Se)

5) Squamish (Sq)

6) Halkomelem (Hk)(3 dialect groups listed below)

a) Upriver Halkomelem (UHk) (Chilliwack [Chill.], Chehalis [Cheh.], Tait)

b) Downriver Halkomelem (DHk)(Musqueam [Ms], Kwantlen, Katzie)

c) Island Halkomelem (IHk)(Nanaimo, Chemainus, Cowichan [Cw])

7) Nooksack (Nk)

8) Northern Straits (Saanich [Sn or Saan], Sooke [So], Songish [Sg], Lummi [Lm], Samish [Sm or Sam][with subdialects Sma Samish-a[Suttles], Smb Samish-b) (Galloway)], Semiahmoo)

9) Southern Straits (SSt) = Clallam or Klallam (Cl)

10) Lushootseed [Puget (Sound) Salish] (Ld) (Northern incl. Skagit, etc., Southern)

11) Twana (Tw)

III Tsamosan [Olympic] Division

12) Quinault (Queets, Quinault)

13) Lower Chehalis

14) Upper Chehalis

15) Cowlitz

IV Oregon Division

16) Tillamook (Tillamook, Siletz)

V Interior Division

A) Northern

17) Lillooet [St'át'imcets] (Lill.)(Upper [Lillooet-Fountain], Lower [Mount Currie-Douglas])

18) Shuswap (Sh) (Western, Eastern)

19) Thompson

B) Southern

20) Colville-Okanagan (Ok) (Northern, Southern)

21) Columbian (Cb)

22) Spokane-Kalispel-Flathead (Spokane, Kalispel, Flathead ["Selish"])

23) Coeur d'Alene (Cd)

How to Use the Dictionary (an introduction for those with linguistic training)

The Quick-Start section in the beginning of this introduction shows how to use the dictionary, how it is set up, and gives some simple and complex examples of entries and how to read and use them. It is written for those wishing to use the dictionary who aren't linguists. A few more details are given here in technical language for linguists.

The Halq'eméylem-to-English section is a root dictionary, with cross-references to show each word and which root it has (where more information is given about that word). All affixes are also given with examples of words in which they occur. I have tried to discover the root of every word, but some resist further analysis (unanalyzed stems). Cognates have assisted with this derivation.

Each headword (or entry) begins with a transcription of the word in the Stó:lō orthography, which I developed in 1975 from slight modifications of the Bouchard orthography. Then the morphological category (abbreviation in table below) come next. IPA transcriptions, morphophonemic (with all affixes segmented), then sometimes phonemic and/or phonetic transcriptions, where notable, follow next. All variant meanings are given (allosemes) and semantic domains and subdomains are given for each in all-caps; these domains and subdomains also provide the semantic environment of allosemes of surrounding words in the sentence or nearby text or conversation, which help speakers and learners to predict which alloseme is most likely for each word. Full information is given about any dialect limitations of forms or variants. The source of each word (the speaker or speakers) is given for each word and example sentence. Most entries have example sentences obtained in linguistic field-work. I have not included any forms I have made up, except for a handful (less than 15) which have been verified by named speakers. Other sources are given for words obtained by earlier linguists from Gibbs (1858-1863) to as late as data from Su Urbanczyk in 2002. Cognates have been found for a huge number of words and are given; many were obtained from the work of Aert Kuipers and others before his published Salish Etymological Dictionary. I have not rechecked all those, but obtained many from other published sources or the linguists themselves by personal correspondence in the 1970's.

There is a wide range of phonological processes, morphological comments, syntactic comments, and semantic comments, the latter including cultural information. The morphological and syntactic categories of each word are given as well. Since the Proto-Central Salish stative prefix /ʔas-/ has become /s-/ in Upriver Halkomelem, and since the nominalizer /s=/ has the same shape, there are a huge number of words beginning with <s> (angle brackets enclose graphemes). I have put them all under their roots but have also cross-referenced them all under the letter <s>. The nominalizer <shxw=> also has many words cross-referenced to the roots where the words are found in more detail. A similar process was followed with all other words with prefixes. Scientific names are given for all flora and fauna (based on earlier work I did and aided by work on other languages by Nancy Turner, Randy Bouchard, Dorothy Kennedy, and others, see References).

There is an extensive English-to-Halkomelem section after the Halkomelem-to-English section just discussed; it is a finder-list or index (some 667 pages or so) for looking up each meaning of each morpheme, affix, word, and idiom. Thus it doesn't have detail on the analysis of the Halkomelem forms except to list what root or stem they may be found under; since they are cross-referenced one can just look up the word directly in the first section of the dictionary to find the root where more information is given.

The Halq'eméylem-to-English section is arranged in alphabetical order by the Stó:lō or Halq'eméylem orthography (**a, ch, ch', e, h, i, k, k', kw, kw', l, lh, m, n, o, ō, p, p', q, q', qw, qw', R** (reduplication), **s, sh, t, t', th, th', tl', ts, ts', u, w, x, xw, x, xw, y, ')**). I have found the articulatory order used in dictionaries by some Dutch linguists to be more difficult to use myself, and it would require additional linguistic training for beginning students of the language who have not yet studied linguistics. Angle brackets (for graphemes) show that an entry or example is in the Halq'eméylem orthography. Square brackets enclose phonetic transcriptions, single slashes enclose phonemic transcriptions, double

slashes enclose segmented morphophonemic transcriptions and allomorphs—all of these are in the International Phonetic Alphabet or IPA. Violin brackets sometimes enclose morphemes. Square brackets with single quotes enclose allosemes, the semantically similar, variant meanings of a morpheme, word, or idiom which are predictable in degree of likelihood from the semantic environment (especially from matching subdomains of the allosemes) of the surrounding words, sentences, or speech event and shared culture and other shared information between speaker and hearer. Slashes with single quotes enclose sememes (shortened summaries or lists of all or the most common meanings of a morpheme, word, or idiom). Each sememe (as in the work of Bloomfield and Nida separately) is the sum total of all the allosemes or variant meanings of a morpheme, word, or idiom. Double slashes plus single quotes enclose morphosememic transcriptions (which show alternations of sememes, much as double slashes alone show alternations of phonemes). These levels and notations are discussed in my work on Three-Dimensional Semantics (for ex. Galloway 1971, 1977a, 1987b, 1989b, c, d, 1992a, 1993a, b, c), more recently called Multidimensional Semantics or Integrated Cognitive Semantics (Galloway 2000b, 2001a).

The types of information included in the Halq'eméylem-to-English portion are included in the following order:

- 1) roots, affixes, or words in the orthography;
- 2) after some affixes come the International Phonetic Alphabet (Americanist) phonemic transcription,
- 3) second in the other entries is the morphemic class (abbreviated) of the head entry (free root, da = derivational affix, ia = inflectional affix, iecs = indirect effect control stem, etc., see below for list with all these);
- 4) the semantic domain or subdomain of the first alloseme (in all caps, abbreviated in most cases, PRON = PRONOUNS, ABDF = ANIMAL BODY DYSFUNCTIONS, SPRD = SPIRIT DANCING, etc., see below for a complete list);
- 5) the alloseme or sememic transcription of the first meaning of the entry;
- 6) sometimes another domain or subdomain name where the alloseme has membership in more than one domain (domain names show the semantic context which makes the alloserne most likely in that context);
- 7) where there are allosemes in different domains the new domain name is next followed by the alloseme;
- 8) a phonetic or phonological comment, if any;
- 9) morphological comment, if any;
- 10) syntactic comment, if any;
- 11) other sources of this word or affix in any dialect of Halkomelem;
- 12) cognates in related languages (with abbreviated language name, IPA transcription, abbreviation of source for this word)
- 13) dialect variants, if any, with initials of the elders or elders groups which attested the entry (for ex., AC = Mrs. Amy Cooper; IHTTC = Intermediate Halq'eméylem Teacher Training Course with ten elders, etc., see lists above);
- 14) examples of the morpheme (in words or sentences) or examples of the word (in phrases or sentences, whenever available, first in the Halq'eméylem orthography, then in the IPA (Americanist) transcription;
- 15) the translation of the word, phrase or sentence;
- 16) the initials of the elder or elder's group that attested the word, phrase, or sentence;.
- 17) after the root entries are complete, next come derivations of the root, with the 16 types of information just listed for roots listed for each derivation, each derivation is indented once from the entry it derives from;
- 18) next come derivations of the previous derivation with information in the same order--if there are no such subderivations then the next derivation from the root or word follows.

The following is a list of abbreviations used for all semantic domains and subdomains and other abbreviations (in all cases these were labels for particular types of information). All abbreviations in all-capital letters are for information in English; most are domain or subdomain names. All abbreviations in

all-small letters have information in Halq'eméylem. A number of these abbreviations have been replaced by the full terms throughout the dictionary. Although this may add a few pages, it makes the dictionary much easier to use; a dictionary where every other term has to be looked up in charts of abbreviations is difficult to use. Since the language is so endangered, I hope it will be used extensively by learners and teachers, so ease of use is crucial if the language is to survive. Even if the dictionary can't be used all the time by learners, it will hopefully serve to document and preserve the large amount of knowledge the elders have passed on here.

Labels used for each different type of information (fields or bands, Band labels)

A	attested by
ABDF	animal body dysfunctions (incl. human)(subdomain)
ABFC	animal body functions (incl. human)(subdomain)
ABI	animal (incl. human) body insults (subdomain)
ACL	acculturated (post-contact) meaning
alt	alternative name
ANA	anatomy
ANAA	anatomy--animal (subdomain)
ANAB	anatomy--bird (subdomain)
ANAF	anatomy--fish (subdomain)
ANAH	anatomy--human (subdomain)
ANAR	anatomy--reptile (subdomain)
ant	antonym
asin	as in (example of affix in a word)
ASM	alloseme
ASP	aspect (subdomain of TIME)
bens	benefactive stem
BLDG	buildings (names, parts, functions, how to make them)(subdomain)
BOT	botanical scientific name (in Latin)
BSK	basketry (types, parts, functions, how to make)(subdomain)
CAN	canoes and other transportation (types, parts, functions, verbs for making, repairing and canoeing [strokes, etc.]) (subdomain)
caus	causative control stem
cdia	see dialect form (fewer dialects have this form or dialects which are not the original source of the main form)
cf	compare with form
cfr	compare with root
cfs	compare with stem
CH	Christianity (subdomain)
chrs	characteristic stem
CJ	conjunctions and logical operators
ck	check Indian form
CK	check English form
CLO	clothing and ornaments (names, parts, functions, how to make, may incl. WV as subsubdomain)(subdomain)
CM	linguist's commentary
cmdf	see main dialect form (this form is found in more dialects or in a dialect which is the original source of the word)

CONV	conversation and speech (domain)
cpds	compound stem
cpvs	comparative stem
CST	change of physical state (inanimate)(domain?)
CSR	constructions other than buildings (names, parts, functions, how to construct them)(subdomain)
ctr	contrast (with following word or words of similar meaning)
cts	continuative stem
D	dialectal limitation
DEM	demonstrative (domain)(prob. subsumed under DIR)
DESC	descriptive words (incl. diminutive)(domain)
df	derived form (root or derivational affix unclear)
di	derivational infix
DIR	directions (general adverbs, prepositions and demonstratives)(domain)
dmn	diminutive nominal
dms	diminutive stem
dmv	diminutive verb
dnom	derived nominal
dp	derivational prefix
drs	derivational suffix
ds	derived stem
durs	durative stem
EB	ethnobotany (common names)(domain of flora)
EFAM	emotions, feelings, attitudes, mental processes, interjections (domain)
ETH	ethnographic information
EZ	ethnozoology (common names)(domain of fauna, incl. man)
FIRE	fire features and functions (domain)
FOLK	folk classification (groupings and hierarchies)
FOOD	food (domain)
FR	borrowed from (lists language name, then ^Indian word^)(^ = cap6)
FRP	possibly borrowed from
frqs	frequentative stem
FSH	fishing (devices, parts, functions, processing the catch, making the devices)(subdomain)
G	gloss (of single-word example)
GA	grammatical analysis
GAM	games (domain)
GC	grammatical comment (incl. morphological categories)
HARV	harvesting (devices, parts and functions, techniques, how to make the devices, processing the harvest)(subdomain)
HAT	human age terms (subdomain)
HHG	household goods (names, parts, functions, how to make)(subdomain, prob. subsubdomain under BLDG)
HUMC	categories of humans (domain)(includes subdomains: HAT, KIN, SOC, N)
HUNT	hunting (devices, parts, functions, techniques, how to make devices, processing the catch) (subdomain)
IC	informant's commentary
IDOC	Indian doctoring (subdomain)
ie	in-context example (phrase or sentence)
iecs	indirect effect control stem

ii	inflectional infix
IL	illustration (to show source)?
incs.	inceptive stem
inss	instrumental stem
ip	inflectional prefix
irg	irregular form(s)
is	inflectional suffix
its	iterative stem
izs	intransitivized stem
KIN	kinterms (subdomain)
LAND	land features and functions (domain)
LIT	(=SMM) literal meaning (triggers sememic notation /' '/)
LO	loanword (probably not needed, FR band will suffice)?
LT	qualities of light (subdomain)
lx	lexical affix (not to replace semological band as main entry)
MC	material culture (domain)(incl. subdomains: BLDG, BSK, CAN, CLO, CSR, FSH, HARV, HHG, HUNT, MUS, TOOL, WV)
mdls	middle voice stem
MED	medical information (techniques, medicines, functions, how to prepare, mainly secular) (subdomain, merges at edge with REL:IDOC)
MOOD	moods: interrog., subjunct., imperative, declarative (domain)
mos	motion stem (in ye-)
mpcl	modal particle
MUS	music (names, parts, functions, devices, techniques, techniques for making the devices and using them)(subdomain)
MYC	myth character name (subsubdomain of N)
N	personal names (inherited, nicknames)(subdomain of HUMC)
nca	numeral classifier affix
ncr	non-control root
ncrs	non-control reflexive stem
ncs	non-control stem
NOG	no gloss
NUM	numerals, their functions, and plurals (domain)
numc	numeral compound ?
numr	numeral root
nums	numeral stem
o	orthography
OS	other sources (gives source ref. and form)
pbf	probable form
PBG	probable gloss
pbr	probable root
PC	phonological comment (incl. phonological processes: backing or fronting (bof), consonant alternation (ca), consonant merger (cmrg), glottalization and deglottalization (gl), labialization and delabialization (lab), metathesis (M), ablaut (A), vowel merger (vmrg), stress-shift (-´- or =´=), lengthening (-:-, =:=), stressed transitivizer (stz), stressed intransitivizer (siz), etc.)
pcr	purposeful control root
pcrs	purposeful control reflexive stem
pcs	purposeful control stem

phm	phonemic transcription
phn	phonetic transcription
pln	plural nominal
PLN	place name (subdomain)
plr	plural root
pls	plural stem
plv	plural verb
pncs	psychological non-control stem
posf	possible form
POSG	possible gloss
posr	possible root
POW	spirits and powers
prcs	Proto-Central Salish
PRON	pronouns (definite, indefinite, etc.)(domain)
prr	perhaps related to root
psal	Proto-Salish
Q	questionable ?
QUAL	qualifiers (general adverbial)(domain)
r	root (bound root form)
rcps	reciprocal stem
rej	rejected form
REL	religion (domain)(incl. subdomains: CH, IDO, POW, SPD)
rfls	reflexive stem
rsls	resultative stem
rf	root form (free root form)
S	source reference
sas	structured activity stem
SCG	Salish cognate
SD	sound (subdomain)
SENS	senses and perceptions (domain)(incl. subdomains: LT, SD, SM, TAST, TCH)
SM	smell (subdomain)
SMC	semantic comment
SME	semantic environment (which conditions allosemes)(=old SMC band)
SMM	morphosememic development (triggers // ' // notation; used only where a combination of sememes (meanings of morphemes or words or phrases) produces a meaning different that the sum of its parts)
SMN	semantic transcription (narrow semantic info., semantic components, triggers semantic notation [' '])(allosemes could be listed here but are usually listed under domains as subentries)
SPRD	spirit dancing (subdomain) (could use SPD)
SQ	posited source
STA	syntactic analysis
SOC	social terms (status, occupational, tribal, national, social transactions, etc.) (subdomain)
STC	syntactic comment
stca	stative causative control stem
stie	stative indirect effect control stem
stnc	stative non-control stem
stpc	stative purposeful control stem
stpn	stative psychological non-control stem

stvi	stative intransitive verb stem
strs	stative resultative ? stem
su	see under stem
syn	synonym
TAST	taste (subdomain)
TCH	touch (subdomain)
TIB	transitivizers, intransitivizers, benefactives (subdomain)
TIME	time periods and tenses (domain)
tlcs	translocational? stem
TN	translation of sentence example
TOOL	tools for making things (names, parts, techniques for making and using)(subdomain)
TVMO	travel and motion (domain)
uf	underlying form (morphophonemic, triggers // // notation)
us	unanalyzable stem
US	usage (sociolinguistic comments, etc.)
UX	unexplained form or problem
UXB	unexplained botanical identification or info.
UXG	unexplained grammatical detail
UXH	historical or comparative notes
UXP	unexplained phonological detail
UXPN	unexplained place name info.
UXQ	adjustments required between files ?
UXZ	unexplained zoological identification or info.
VALJ	value judgements (domain)
vir	intransitive verb root
vis	intransitive verb stem
VOIC	voice (active, middle, reflexive, reciprocal, passive)(subdomain)
WATR	water features and functions
WETH	weather features and functions
WV	weaving (techniques, devices, parts, dyeing, designs, functions) (subsubdomain)
ZOO	scientific zoological name (in Latin)

SYNTACTIC ABBREVIATIONS

adem	adverbial demonstrative
apas	ambiguous past
apcl	adverbial particle
aug	augmentative
avop	active verb object pronoun
avps	past adverbial
cau	causative control (purposeful)
chr	characteristic
cj	conjunction
cptv	completive aspect
cpv	comparative
ct	continuative aspect
dema	demonstrative article
demc	demonstrative conjunction
demp	demonstrative pronoun

dm	diminutive
drv	directive (may only be in Nooksack)?
dst	distributive
dur	durative aspect
frq	frequentative aspect
fut	future tense
hbt	habitual aspect
hpas	historical past tense
icsp	independent clause subject pronoun
iec	indirect effect control
ij	interjection
imp	imperative
inc	inceptive aspect
ind	indirective ?
inom	indefinite nominal
inp	independent nominal pronoun
ins	instrumental (creates words for devices, etc.)(need better label) ?
iopv	independent object of prepositional verb
ipp	independent possessive pronoun
it	iterative aspect
ivp	independent verbal pronoun
mdl	middle voice
ncm	non-control middle ?
nct	non-control transitive
nctv	non-continuative aspect
ndem	nominal demonstrative
nmps	nominal past
nom	nominal
np-a	nominal phrase minus article
npa	nominal phrase with apposition
npas	negative habitual past
npc	nominal phrase with conjoining
npm	nominal phrase with modifier(s)
nps	simple nominal phrase
nqps	negative interrogative past
oc	out-of-control
pasf	past affixed
pass	passive
pcl	particle
pcsa	purposeful control structured activity
pcsi	purposeful control stem inanimate object preferred
per	persistent
pers	persistent stem
pl	plural
pnc	psychological non-control
ppl	participle (=stative)
pres	present tense
prof	professional

psv	possessive
psvf	possessive pronoun affix
qaf	interrogative affix
qpas	interrogative past
rcp	reciprocal
rfl	reflexive
rlcl	relative clause
rpt	repetitive aspect
rsl	resultative
sa	structured activity
sbcl	subordinate clause
scjs	sentence + coordinating conjunction + sentence
scpv	sentence comparative
sij	sentence with interjection
siz	stressed intransitivizer
sjsp	subjunctive subject pronoun
sna	sentence with nominal in apposition
spp	sentence with prepositional phrase
ssjp	sentence with subjunctive phrase
sspv	sentence superlative
st	stative aspect (=ppl)
stz	stressed transitivizer
svpa	sentence with verb phrase in apposition
tlc	translocational ?
vadv	adverbial verb
vaj	adjectival verb
vaux	auxiliary verb
vdem	demonstrative verb
vpad	verb phrase with adverbial verb, adverbial particle, or adverbial demonstrative
vpmd	verb phrase with modal particle
vpn	verb phrase with negative
vppa	verb phrase with past tense
vpq	verb phrase with yes/no interrogative
vpro	pronominal verb, = verbal pronoun
vprp	prepositional verb
vpx	verb phrase with auxiliary
vq	interrogative verb
xpas	auxiliary past

Spelling and orthography

The Key below gives the International Phonetic Alphabet (Americanist) equivalents for each symbol in the Stó:lō orthography. Orthographic symbols which are made up of two or three characters (digraphs and trigraphs resp.) are always pronounced as a single sound, a unit and almost never occur as clusters to two or more sounds. When they do (as in *éts-'ets stutter*), a hyphen separates them. Notice that the writing system is phonemic in almost every case. Only /c/ and /s/ have allophones which are written differently from each other in the Stó:lō orthography.

Key to the Official Orthography of Upriver Halkomelem

<u>Stó:lō</u>	<u>IPA equivalents</u>
<u>Orthography</u>	
<a>	= /ɛ/ [æ] before length or under high or mid tone (<a:, á, à>) with rare exceptions
<a>	= /ɛ/ [ɛ] elsewhere, i.e., under low tone (unmarked) and short (<a>)
<ch>	= /c/ [ç]
<ch'>	= /c'/ [ç']
<e>	= /ə/ [ɪ] between or next to palatal sounds <l, lh, x, y, s, ts, ts'> [l, ʎ, xʎ, y, s, ç, ç']
<e>	= /ə/ [ʊ] between or next to labial(ized) sounds <m,w, kw, kw', qw, qw', xw, xw'> [m,w, kʷ, k'ʷ, qʷ, q'ʷ, xʷ, x'ʷ]
<e>	= /ə/ [ʌ ~ ə] elsewhere
<h>	= /h/ [h]
<i>	= /i/ [i]
<k>	= /k/ [k ~ kʎ] after <s>
<k>	= /k/ [k ^h ~ kʎ ^h] elsewhere (aspirated except after /s/)
<k'>	= /k'/ [k']
<kw>	= /kʷ/ [kʷ] after <s>
<kw>	= /kʷ/ [kʰʷ] elsewhere (aspirated except after /s/)
<kw'>	= /k'ʷ/ [k'ʷ]
<l>	= /l/ [l]
<lh>	= /ʎ/ [ʎ]
<m>	= /m/ [m]
<n>	= /n/ [n]
<o>	= /a/ [a]
<ō>	= /o/ [o]
<p>	= /p/ [p] after <s>
<p>	= /p/ [p ^h] elsewhere (aspirated except after /s/)
<p'>	= /p'/ [p']
<q>	= /q/ [q] after <s>
<q>	= /q/ [q ^h] elsewhere (aspirated except after /s/)
<q'>	= /q'/ [q']
<qw>	= /qʷ/ [qʷ] after <s>
<qw>	= /qʷ/ [qʰʷ] elsewhere (aspirated except after /s/)
<qw'>	= /q'ʷ/ [q'ʷ]
<s>	= /s/ [s] everywhere except before <xw>
<sh>	= /s/ [š] only before <xw> except in a few loan words from French or English
<t>	= /t/ [t] after <s>
<t>	= /t/ [t ^h] elsewhere (aspirated except after /s/)
<t'>	= /t'/ [t']
<th>	= /θ/ [θ]
<th'>	= /θ/ [t ^θ ']
<tl'>	= /ʎ'/ [ʎ']
<ts>	= /c/ [ç]
<ts'>	= /c'/ [ç']
<u>	= /u/ [u]
<w>	= /w/ [w]
<x>	= /xʎ/ [x̣ ~ xʎ]

<xw>	= /x ^w / [x ^w]
<x̣>	= /x̣/ [x̣]
<x̣w>	= /x̣ ^w / [x̣ ^w]
<y>	= /y/ [y]
<ʔ>	= /ʔ/ [ʔ] except after stops (<p, t, k, q> where the mark glottalizes the consonant)
<: >	= /:/ [·] (length, one mora)
<˥ >	= /˥/ [˥] (high tone, usually a pitch 5 whole tones above low tone)
<˩ >	= /˩/ [˩] (mid tone, usually a pitch 3 whole tones above low tone)
no mark on vowel	= / / [˧] (low tone)

Galloway: Upriver Halkomelem Dictionary

Halkomelem to English

A

- <**á**>, free root //ʔé ~ ʔé//, TIME ['recent past tense'], phonology: free variation, free variant: <é>, //ʔé//, syntactic comment: subject pronouns are suffixed to this verb to form ambiguous past, example: <**átst álhtel**>, //ʔé-ct ʔéʔtəl//, 'we ate', attested by AC, <**échap mókʷ' álhtel cheláqelh(elh)**>, //ʔé-cɛp mókʷ' ʔéʔtəl cəlÉqəʔ(-əʔ)//, 'you all ate yesterday', <**étsel lhíts**>, //ʔé-cəl ʔíc'//, 'I got cut', <**ét'wólh lám**>, //ʔé-t'wə-wəʔ lém//, 'he must have gone' (grammatical analysis: t'we must, I guess, evidential; -welh already), <**átsel totí:lt**>, //ʔé-cəl tá·[-C₁ə-]l=í·l=T//, 'I used to think', syntactic analysis: auxiliary verb, attested by AC.
- <**-á**>, (/ -é/), MOOD ['interrogative'], phonology: combination of -e interrogative with e at end of preceding morpheme (by regular morphophonemic rule, e-e → á or //ə-ə// → é), vowel merger, syntactic analysis: interrogative affix; found in <**ówáchap lámelep ~ ówáchap lámelep**>, //ʔéwə-ə-c-ɛp lém-əlp//, 'Aren't you folks going?', attested by IHHTC, <**ówálh**>, //ʔéwə-ə-ʔ//, 'didn't he (or she) ?' (syntactic analysis: negative interrogative past), <**ówá:ta**>, //ʔéwə-ə-tɛ//, 'is it none?, is it nobody?, didn't anybody?', <**lewá:, Lópet**>, //ləwə-é, lápəʔ//, 'Is it you, Robert?'
- <**-à**>, // -è//, TIME ['later'], usage: found in the speech of a few older monolinguals as well as that of SP, prob. archaic, phonology: appears as a suffix though not a tense suffix, syntactic comment: semantically similar to the class of adverbial particles and used like them but suffixed unlike them, syntactic analysis: suffixed adverbial particle, dialects: *Tait only so far*, attested by SP, MP, MJ (Mrs. August Jim); found in <**maythométsta**>, //mɛy=T-amé-cət-è//, 'we'll help you later' (grammatical analysis: root -purposeful control transitivizer-2so-1ps-adverbial particle), attested by SP.
- <=**á**:>, da // =é//, QUAL ['overly ?'], MOOD, syntactic analysis: lexical suffix, derivational suffix; found in <**kw'esá**:>, //k'wəs=é//, 'overheated' (contrast <**kw'ó:kw'es**> hot, contrast <**kw'és**=> get burned), perhaps <**selá**:>, //səl=é· (but more likely that is s=hə=lé·)//, 'tight' (contrast possibly <**sí:l**= ~ **sel**> spin).
- <**-a ~ -a'**>, ia & fr // -ɛ(?) ~ ʔɛ//, PRON 'your (sg.), second person sg. possessive pronoun, second person sg. subordinate subject pronoun', syntactic comment: affixed to the word (usu. demonstrative article) which precedes the nominal possessed or verb subordinated, syntactic analysis: possessive pronoun affix, dialects: *Sumas, Tait, and Cheh. speakers seem to prefer -a', Chill. speakers seem to prefer -a*, see dialect form <**-a (Chill.)**>, also <**a**>, //ʔɛ// occurs sentence initial or following li interrogative or li or i verbal auxiliaries or tl'ó that's, and in some other constructions, -a(') occurs elsewhere, also <**-a**>, // -ɛ//, dialects: *Chill.*, example: <**lí a stl'í kw'e tí**>, //lí ʔɛ s=ë'í k'wə tí//, 'do you want some tea?' (grammatical analysis: yes-no question your want some tea), <**ta(') má:l**>, //t-ɛ(?) mé:l//, 'your father', <**tha(') tá:l**>, //è-ɛ(?) tɛ:l//, 'your mother', <**tl'ó a swá**>, //ë'á ʔɛ swé//, 'that's yours', <**skw'áy kw'a(')s kw'étslexw**>, //s=k'w'áy k'w-ɛ(?)-s k'w'éc=l-əx'w//, 'you can't see it', literally 'it's impossible that you see it' (syntactic analysis: nominal.-impossible demonstrative article-possessive pronoun affix-nominal./subord. see-non-control transitive-3o), <**li a sqwá:lewel kwes xwe'ís wáy:eles**>, //li ʔɛ s=qɛ-l=əwəl k'wə-s x'wə=ʔí-s wɛy:əl=əs//, 'Do you think they'll come tomorrow?', literally 'is it your thought that they arrive tomorrow?', attested by AC.

<-a -elep ~ -a' -elep>, (/ε -əl-əp ~ -εʔ -əl-əp/), PRON /'your (pl.), you folks's, second person plural possessive pronoun, second person plural subordinate subject'/, (the <-el> portion is probably the same as the infix <=el=> plural), syntactic analysis: is, syntactic comment: also used as subordinate subject by possessing a nominalized clause, the -a is suffixed to the first element of the nominal phrase or clause (usually the demonstrative article) and the -elep is suffixed to the next word in the clause or phrase, example: <ta má:elep>, //t-ε mÉ-l-əl-əp//, /'you folks's father'/, <a' stl'íyelep kw'a's lámelep.>, //ʔεʔ s=ë'í-y-əl-əp k'ʷ-εʔ-s lÉ=m-əl-əp//, /'You folks want to go.'/, literally /'(it) is you folks' want that you folks go'/.

<ahíw>, free root //ʔεhíw//, DIR /'(be) upstream, east (in some contexts)'/, semantic environment ['going east for a speaker anywhere on the Fraser River from Vancouver, B.C. to about Laidlaw, B.C., since the river flows east to west on this stretch'], syntactic analysis: adverb/adverbial verb, also <ehí(:)w>, //ʔεhí(:)w// in faster speech, example: <lám kw'e ahíw>, //lém k'ʷə ʔεhíw//, /'he's going upstream'/, attested by EB, <lámtsel kw'e ehí:w>, //lém-c-əl k'ʷə ʔεhí:w//, /'I'm going east.'/, attested by EB.

<xwehíwel>, incs //xʷə=əhíw=əl//, DIR ['go upstream'], literally /'get=upstream=go'/, (<xwe=> get, become), (<=el> go, come), syntactic analysis: intransitive verb, adverb/adverbial verb.

<ák'>, free root //ʔék'//, probably /'cute.'/, EFAM, usage: expression when playing with a baby and the baby is cute, phonology: diminutive fronting (yielding k'), syntactic analysis: interjection, dialects: Tait; unknown whether in other dialects, attested by AD.

<ákwelex>, HUNT ['shooting'], see kwél.

<-ál>, is, //-él//, PRON ['first person singular subjunctive subject'], syntactic comment: can be suffixed to forms prefixed with <we-> when, if or to the first subordinate verb after a negative verb, can also add the when/if meaning even without the we- prefix being present, also <-l>, //-l// after auxiliary verbs ending in i (í, lí, mí, lhí); as in <welámàl>, //wə-lÉ=m-él//, /'if/when I go'/, phonology: downstepping, example: <yó:swe welámàl.>, //yá:swə wə-lÉ=m-él//, /'I might go., I don't know if I could go.'/, <éwetsel lámàl.>, //ʔəwə-c-əl lÉ=m-él//, /'I don't go., I won't go.'/, <chexw maythóx kw'els éwe líyemál.>, //c-əxʷ məy=T-áxʷ k'ʷ-əl-s ʔəwə líy=əm-él//, /'You helped me not to laugh.'/, <éwetsel lí:l lám.>, //ʔəwə-c-əl lí-l lÉ=m//, /'I didn't/don't go.'/.

<=á:l> ds, //É:l//, DESC ['similar to, -like, or part/portion']; found in <xaweqá:l>, ds //xəw(=)əq=É:l//, EB /'yarrow, also parsely fern'/, ['Achillea millefolium, also Cryptogramma crispá'], lit. "carrot like, similar to a carrot", <sxwewál>, df //s=xʷəwél or s=xʷéw=ə[=M2=]l or more likely xʷ[=F=]əw(=)ə=É:l//, EZ ['fox'], ['Vulpes fulva cascadiensis'], most likely lit. "cougar-like, similar to a cougar".

<'ál ~ ál>, bound root, //ʔél(=)əm//, root could mean pole/shaft/length

<s'álem>, dnom //s=ʔéləm//, [sʔéləm], FSH /'spear, shaft (of spear/harpoon/gaff-hook), gaff-hook pole'/, HUNT /'spear, shaft of spear'/, (<s=> nominalizer), probably root <'ál> pole/shaft/length?, possibly <=em> place to have/get, syntactic analysis: nominal, attested by BHTTC, (compare with <s'aléts> bottom of a tree, trunk of a tree with same possible root (=lets 'on the bottom')), also <s'álem>, //s=ʔéləm//, [sʔéləm], dialects: Cheh., attested by EL.

<s'aléqs ~ s'eléqs>, dnom //s=ʔél=ə[=´]qs//, MC ['point'], (<s= nominalizer>), probably root <'al> pole/shaft/length?, lx <=eqs> on the nose, on the point, probably <=´=> derivational, phonology: vowel-reduction, stress-shift, geminate consonant (unusual word finally), syntactic analysis: nominal, attested by DM (Chill.), example: <s'eléqs: te lháts'tel>, //s=ʔél=əqs-s tə ʔéc'=təl//, [sʔéléqs- tə ʔéc'təl], /'point of a knife'/, attested by DM.

- <**s'álqsel**>, dnom //s=ʔél=qəšə//, [sʔélqəšə], ANA ['tip or point of one's nose'], LAND ['point of land'], semantic environment ['semantic environments determine which alloeme is selected (those with components of ['land'] select the second, those with ['animate'] select the first listed)], (<**s=**> nominalizer), probably root <'ál> pole, shaft, length?, lx <=**qsel**> on the nose, on the point, syntactic analysis: nominal.
- <**s'aléts**> dnom //s=ʔɛ(1)=léç//, EB ['bottom of a tree, trunk of a tree'], (<**s=**> nominalizer, <=**lets**> on the bottom), syntactic analysis: nominal, attested by BHTTC
- <**s'alétsmel**>, dnom //s=ʔélç=mə//, BLDG ['foundation of a house, bottom of a tree'], EB ['bottom of a tree'], (<**s=** nominalizer>), (<=**mel**> part, portion; prob. also =lets on the bottom), syntactic analysis: nominal, attested by BHTTC, also <**alétsmel**>, //ʔélç=mə//, phonology: free variant.
- <**shxw'állhelh**>, dnom //sx^w=ʔél=ʔəʔ//, [šx^wʔélʔəʔ], ANA ['front of the neck'], (<**sxw=**> nominalizer), probably root <'ál> pole/shaft/length, lx <=**lhelh**> (or poss. =**llhelh**)> on the throat, on the front of the neck, syntactic analysis: nominal.
- <=**á:lá** ~ =**álá** ~ =**àlà** ~ =**ela**>, da //=**é:lé** ~ =**əɛ**//, SH ['container for, receptacle for'], MC, numc, syntactic analysis: lexical suffix, derivational suffix; found in <**shxwhéyqwala**>, //sx^w=hé=yəq^w=éɛ//, ['firepit'], literally 'container for burning', <**shxwetl'qelá:lá**>, //s=x^wəë'=qəl=é:lé//, ['pillow case, container for pillow, pillow'], literally 'container for rolled thing under head', <**sqelxwá:lá**>, //sqəl^{xw}=é:lé//, ['throat, gullet'], literally 'greedy + container', <**shxwiyamála**>, //s=x^wiy=əm=é:lé//, ['store'], literally 'nominal + sell + container for', <**shxwlamála**>, //sx^wlém=é:lé//, ['bottle'], <**shxwmálaha:lá**>, //sx^w=mélɛ=hé:lé//, ['fishing basket, bait basket'], literally 'nominal + bait + container for', <**lhà:ts'telála**>, //ʔè·c'=təl=é:lé//, ['knife handle'], literally 'cutting + device + container for', <**sp'òtl'emála**>, //s=p'äë'əm=é:lé//, ['(tobacco) pipe'], literally 'smoke + container for', <**sp'otl'emá:látel**>, //s=p'äë'əm=é:lé=təl//, ['smokehole'], <**smòkw'e'á:lá**>, //smok^wə=ʔé:lé//, ['graveyard'] (compare <**smòkw'a**> grave), <**spotelála**>, //spatəl=é:lé//, ['mast'] (compare <**s=pót=(t)el**> sail), <**sts'axtála**>, //sc'ɛx^t=é:lé//, ['knothole'], literally 'branch + container for', <**Sxwá:yehà:là**>, //sx^wé·yə=hè·lè//, ['Squia=a=ala (Chilliwack Indian Reserve #7, a village in pre-contact times also)'] (compare <**xwá:y**> many people perished together), <**səxwe'álá**>, //səx^wə=ʔé:lé//, ['bladder'], literally 'urine + container for', <**kw'él(:)a**>, //k^wél(·)ɛ//, ['stomach'], <**xelwéla**>, //xəlw=é:lé//, ['horn rings for dip nets'] (compare <**xálew**> spoon).
- <**Alámex**>, us //ʔéléməx^y//, PLN ['the whole Agassiz (B.C.) area (JL), Agassiz Mountain (AK), place near Agassiz where Hamersley Hopyards were'], syntactic analysis: nominal, attested by JL, AK, possibly other speakers, other sources: Duff 1952 /élémix/, example: <**lámtsel te Alámex kwsetst lhím te hóps.**>, //lém·cəl tə ʔéléməx^y k^wsə·ct ʔím tə háps//, ['I'm going to Alámex so that we (can) pick hops.'], attested by JL.
- <**Alámex Smámelt**>, //ʔéléməx^y s=mé·[=C₁ə=]lt//, PLN ['Agassiz Mountain'], syntactic analysis: nominal phrase with modifier(s), attested by JL, AK.
- <=**ále**>, da //=**élə**//, HUMC ['people'], semantic environment ['with numerals 3-99, kw'í:l'], syntactic comment: obligatory, syntactic analysis: lexical suffix, derivational suffix; found in <**lhq'á:tsále**>, //ʔq'é·c=élə//, ['five people'].
- <**álel**>, chrs //ʔélə//, [ʔélə], EZ ['black-billed magpie'], ['Pica pica'], possibly <=**eC2**> out-of-control, probably old <=**R2**> characteristic in BJ's pronunciation, phonology: old reduplication, syntactic analysis: nominal, dialects: Tait + other elders, attested by ME, AD, others, also <**ál'el**>, //ʔél=C₁əC₂//, [ʔélʔə], dialects: Chill., attested by BJ.
- <**alelí'**>, us //ʔéləlíʔ//, EFAM ['yipes., eek.'], usage: said to oneself or to someone else when scared, syntactic analysis: interjection.

<**-àlèm**>, is, // -èlèm or -èl=əm//, PRON ['first person singular patient or object of passive'], VOIC, comment: historically may be connected with **-ál** first person sing. subject, probably <**-em**> passive, phonology: possible updrifting, syntactic analysis: inflectional suffix; found in <**ó:thàlèm**>, //ʔá=T-èlèm//, 'I was called.', <**kw'étslálèm**>, //k'w'óc=l-èlèm//, 'I was seen.', <**éysthàlem**>, //ʔéy=sT-èlèm//, 'I was liked.', example: <**éwe lí s yésthàlèm**>, //ʔéwə lí-s yéè=sT-èlèm//, 'I wasn't told.', syntactic comment: note the third person subordinate subject/agent in lí-s.

<=**á:leq** ~ =**e leq**>, da // =é:ləq ~ =əleq//, WATR ['waves'], SH, syntactic analysis: lexical suffix, derivational suffix, also <=**e leq**>, // =əleq//; as in <**thithehá:leq**>, //èièəh=é:ləq//, 'waves are getting bigger' (compare <**thithe**> bigger, <**-h**> epenthetic), dialects: *Seabird Island dialect*; found in <**smá:yeleq**>, //smé-y=əleq//, 'wave', root meaning unknown unless sméya bay, <**xetáléqetel**>, //x'ət=élóq(ə)=təl or x'ət=élóq(ə)(l)=təl//, 'sinker line' (compare <**xá:t**> a sinker, lead weight, lead), <**stl'epá:leq**>, //sə'əp=é:ləq//, 'underskirt, underslip', literally 'underwaves'.

<**aleqá:y**>, EZ 'slow-worm ("a slow-moving foot-long snake"), actually a species of blind legless lizard', compare <**álhqey** ~ **álhqay**> snake from which it derives.

<=**áléqel**>, da // =élóqəl//, ANA ['(in) the head'], syntactic analysis: lexical suffix, derivational suffix; found in <**xelháléqel**>, //xət=élóqəl//, 'headache', <**tesáléqel**>, //təs=élóqəl//, 'bump one's head', <**smeltáléqel**>, //sməlt=élóqəl//, 'kidneys', root probably <**smált**> stone, literally 'stone in its head'.

<=**áléqep** ~ =**áleqep**>, da // =élóqəp ~ =ələqəp//, SM 'fragrance, smell, odor', SD ['sound'], syntactic analysis: lexical suffix, derivational suffix, phonetic & semantic comment: it seems most likely there has been a recent phonological convergence of two separate morphemes here, perhaps {=(**ál**)**e qep**} 'fragrance, smell, odor' and {=**áleqep**} 'sound' since the former examples (smell) rarely have the next to last <e> with high tone while the latter examples (sound) almost always have the next to last <e> with high tone (<é>), but there has been some phonological and synthesesethic convergence where examples of each have // =**áleqep**//; as in <**eyáleqep** ~ **iyáleqep**>, //ʔey=ələqəp//, 'good smell', <**qéleqep**>, //qəl=əqəp//, 'bad smell', <**selchímáléqep**>, //səlçím=élóqəp//, 'how does it smell?;' (compare <**selchím**> how is it?, how?), <**qelqéyláléqep**>, //qəlqéyl=élóqəp//, 'turn bad in smell' (compare <**qelqéyl**> turn bad), <**simáléqep** ~ **simáleqep**>, //s=(?)əy=əm=élóqəp or s=(?)i(y)=(ə)m=ələqəp//, 'bad stink' (compare <**ey=ém**> strong, with <**s=**> nominal or stative), <**stáléqep**>, //sət=ələqəp//, 'a distant sound', <**sasetáléqep**>, //sɛ[=C₁ə]=t=ələqəp//, 'keep on hearing a distant sound' (compare <**stáléqep**> a distant sound), <**eháléqep**>, //ʔəh=ələqəp//, 'a faint sound carried by the air, sound within earshot or hearing range or distance' (compare <**eh=ó:t**> wrap s-th up), <**thxwáléqep**>, //təx^w=ələqəp//, 'a steady sound that's been stopped for a while' (compare <**théxw**> disappear), <**théxweleqep**>, //tə[-']x^w=ələqəp//, 'sound getting softer', example: <**welóy théxweleqep**>, //wə=láy èə[-']x^w=ələqəp//, 'sound getting softer'; also found in <**chqwáléqep**>, //cq^w=ələqəp//, 'a loud sound', example: <**mí xwe chqwáléqep**>, //mí x^wə cq^w=ələqəp//, 'sound getting louder'; found in <**iyotháléqep**>, //ʔey=aè=ələqəp//, 'sharp sound' (compare <**iyóth**> sharp), <**xwemxwemaléqep**>, //x^wəm=C₁əC₂=ələqəp//, 'talks fast (perhaps also for "fast sounds"?)' (compare <**xwém**> fast, hurry).

<**alétsa**>, free root //ʔəlécə//, DIR ['where (is it)?'], syntactic analysis: interrogative verb, dialects: *Chill., Sumas, Tait, most Cheh.*, other sources: ES /lik^wɛʔəlécə/ (but Musqueam /əñəcə/) where?, also <**létsa**>, //lécə//, attested by EB (of Cheh.), example: <**alétsa ta' lálém?**>, //ʔəlécə tɛʔ lélém//, 'where's your house?', attested by Deming, <**alétsa kw'as lé thiyt?**>, //ʔəlécə k^w-ɛ-s ló èiy=T//, 'where did you make it?', attested by AC, <**létsa kw'asé thiyt?**>, //lécə k^w-ɛ-s-é èiy=T//, 'where did you make it?', attested by EB, <**kwe elétsa?**>, //k^wə ʔəlécə//, 'where is he?', attested by EB, <**chel**

ôlhq'élexw we'ís létsa.>, //cəl ʔəw-ʔ=q'əl=l-əx^w wə-ʔí-s léce//, 'I know where it is.', attested by EB, <í:lhchexw alétsa?>, //ʔí-ʔ-c-əx^w ʔélécε//, 'where have you been?/', attested by AC.

<**alétsesxwes**>, caus //ʔélécε=sT-əx^w-əs//, DIR ['wherever he's got it'], (<=st> causative control transitivizer, <-exw> third person object, <-es> third person subject), syntactic analysis: transitive verb, attested by AD.

<**tel'alétsa**>, ds //təl=ʔélécε ~ təl=ʔəlécε ~ təl=écε//, DIR 'where is he/she/it from?, from where?/', (<tel=> from), phonology: tel'elétsa and tel'étsa are variants at increasing speed, syntactic analysis: interrogative verb, also <**tel'écha ~ te'elécha**>, //təl=écε ~ tə=ʔəlécε//, dialects: EB of Cheh., example: <**tel'alétschexw**>, also <**tel'étschexw**> is found in faster speech, //təl=lécε-c-əx^w ~ təl=ʔélécε-c-əx^w//, 'where are you from?/', attested by IHTTC, <**tel'elétsa tútl'ò?**>, //təl=ʔəlécε t=ú=ë'á//, 'where is he from?/', attested by CT, HT, <**chel ôlhq'élexw we'ís te'elécha kwes xwe'í.**>, //cəl ʔow=ʔ=q'əl=l-əx^w wə-ʔí-s tə=ʔəlécε k^w-s-əs x^wə=ʔí//, 'I know where he came (arrived) from.'/ (syntactic analysis: sentence with subjunctive phrase, also with relative indefinite pronoun) attested by EB.

<**álex**>, free root //ʔéləx^y//, HUMC, KIN 'sibling, brother, sister', (semological comment: sex gender is indicated in the demonstrative article or other semantic context external to this word), syntactic analysis: nominal, usage: this word has a limited distribution; more speakers use only forms meaning either *elder sibling* or *younger sibling*, i.e., they must specify the relative age, dialects: Chill., attested by AC, other sources: ES //ʔéləx^y/ sibling, S82pc 'sibling of opposite sex', Salish cognate: Squamish //ʔáyiš/ 'cousin or sibling of opposite sex W73:68, K67:394, also 'brother', dialects: Tait (and poss. Cheh.), example: <**lí: skwetáxw kwtha álex?**>, //lí s-k^wətəx^w k^w-è-ε ʔéləx^y//, 'Is your brother/sister in?/', attested by AC, <**álexs**>, //ʔéləx^y-s//, 'her brother', attested by AC.

<**el'álex**>, pln //C₁əC₂-ʔéləx^y//, HUMC, KIN '(siblings), brothers', (<R3-> plural), phonology: reduplication, syntactic analysis: nominal, dialects: Chill., attested by AC.

<**shxw'álex**>, dnom //sx^w=ʔéləx^y//, HUMC, KIN 'sister-in-law, husband's sister, brother's wife, wife's sister (EB)', syntactic analysis: nominal, dialects: Cheh., Chill., attested by EB, AC, other sources: ES //šx^wʔéləx^y/ husband's sister, woman's brother's wife, also <**shxw'áléx**>, //sx^w=ʔéləx^y//, dialects: Tait, attested by CT, also 'wife's sister', attested by EB, example: <**tl'ól shxw'álex**>, //ë'á-l šx^w=ʔéləx^y//, 'That's my sister-in-law.', attested by AC.

<**shxw'el'álex**>, pln //sx^w=C₁əC₂-ʔéləx^y//, HUMC, KIN ['sisters-in-law'], phonology: reduplication, syntactic analysis: nominal, example: <**tl'ó: a shxw'el'álex**>, //ë'á-: ʔε šx^w=C₁əC₂-ʔéləx^y//, 'Are those your sisters-in-law?/', attested by AC.

(said when surprised), goodness., gee whiz./, phonology: The stressed vowel is subject to emphatic lengthening with : and :: as in **á:tsele** and **á::tsele**. Most speakers have an unusual [ɛ̃] here, even when lengthened; JL has [æ̃] when lengthened., syntactic analysis: interjection, example: <**átsele méle.**>, //ʔɛcələ mələ//, /'Goodness, child., Gee whiz, child./, syntactic comment: notice the vocative where the nominal is not preceded by an article. An interesting possible etymology might relate this word to the root in <**átslexw**> /'hear about it, (hear about s-o)'/, with lx <=**ele**> /'lack of'/, thus expressing surprise through "lack of hearing about s-th/s-o" or less likely with lx <=**éla**> /'on the side of the head, on the temples, around the ear, on the cheek'/. Salish cognates: Lushootseed /ʔəèədá/, Nooksack /æèəná/ *oh my what a pity, alas, gee whiz* (PAC715, 717).

<**átslexw**>, ncs //ʔɛc=l-əx'w//, LANG /'hear about it, (hear about s-o)'/, syntactic analysis: transitive

verb, attested by Deming.

<éts-'ets>, chrs //ʔé̄c=C₁əC₂//, LANG ['to stutter'], ABDF, (<=R2> characteristic or iterative), perhaps <áts>, bound root //ʔé̄c//, ABFC /'hear/, phonology: reduplication, syntactic analysis: intransitive verb, Elder's comment: "AC said it has this form because you can't stutter just once" (compare probably <áts=l-exw> *hear about s-th/s-o*, Salish cognate: Lushootseed /ʔé̄ʔə̄/ *stutter*, *stammer* H76:655, Sechelt /ʔá̄ʔə̄/ *to stutter* T77:34, B77:93 Squamish /ʔəs-ʔé̄-ʔə̄/ *stuttering* W73:257, K67:387, see <áts>).

CH

<ch>, comment: The Stó:lô orthography uses both <ch> ([è]) and <ts> ([c]), for two allophones of a single Halkomelem phoneme, /c/. This has the advantage of showing phonetic preferences of the speakers which are difficult to predict purely from environments; in linguistic terms [è] and [c] are evolving from a state of free variation to conditioned variation (or vice versa)(see Galloway 1993:18-20 for a statement of the environments, dialects, and idiolects conditioning these two sounds). As it happens, few cases of initial <ts> [c] occur except when it is a prefix. Therefore if a reader is looking up a word spelled or sounded with an initial <ts>, he should be sure to check under ch as well, as more speakers may pronounce it with <ch>.

<ch=>, da //c=//, SENS, LT /'stative (with color terms), have/get (elsewhere)/, phonology: since most roots begin with a consonant and there is a phonemic rule that /c/ → [c] <ts> between word boundary and a consonant, this suffix is only rarely found as [è] <ch>, see main dialect form <ts=>.

<-cha>, //-cɛ//, [-èæ ~ -èɛ ~ -cɛ], TIME ['future tense'], ASM ['not immediate future but after a while; immediate future is expressed by the present non-continuative'], syntactic analysis: is, syntactic comment: this suffix follows all others in a verb; it is word-final; found in <p'ékwha>, //p'ók^w-cɛ//, /'it will float/, syntactic analysis: intransitive verb, <tl'ócha>, //è'á-cɛ//, /'that will be, it will be (him/her/them/that)/, syntactic analysis: demonstrative verb, conjunction, <selchí:mcha>, //səlčí-m-cɛ//, /'how shall it be?, how should it be?/, syntactic analysis: interrogative verb, example: <lhwélepcha lám>, //ʔw=əl=əp-cɛ lɛ=m//, /'It will be you folks that go./, syntactic analysis: pronominal verb/verbal pronoun, attested by AC, <skw'áytsa kw'els málqles>, //s=k^wéy-cɛ k^w-əl-s mɛlq=ləs//, /'I'll never forget him/her/it/them./, syntactic analysis: nominal phrase minus article, literally /'it's impossible that I forget him/her/it/them/, <lítsa sp'ap'ákwa>, //lí-cɛ s=C₁ɛ=p'ók=[AÉ=]k^w//, /'Will it float?/, syntactic analysis: interrogative verb, stvi, <líy-e-tsa lám>, //lí(y)-ə-cɛ lɛ=m//, /'Will he go?/, grammatical analysis: interrogative verb-interrogative affix-future tense auxiliary verb=itz, <éwetsa me kw'étslálémèt>, //ʔəwə-cɛ mə k^wéc=l-ələm-ət//, /'I won't be seen., Nobody will see me./, grammatical analysis: vneg-future tense auxiliary verb r=non-control transitive-1spass-passive sbor to neg, <wátsa lamál yewá:>, //ʔəwə-ə-cɛ lɛ=m-él yəwé.//, /'Will you take me along?, Can I go along?, (Won't you take me along?)/, grammatical analysis: vneg-interrogative affix-future tense auxiliary verb=itz-1ssbj adverb/adverbial verb; found in <sta'ástexwescha>, //s=tɛʔé=sT-əx^w-əs-cɛ//, /'They will follow him., They will do like him./, grammatical analysis: stative=intransitive verb=causative-3object pronoun-3sj-future tense, <el'éliyamethométselcha>, //C₁əC₂-ʔəliyə=məT-ámə-c-əl-cɛ//, /'I'll dream about you (repeatedly)/, phonology: stress-shift on object pronoun due to suffixation with subject, grammatical analysis: pl-intransitive verb=indirect effect control-2soj-independent clause subject pronoun-1ssj-future tense, <lhíts'elhtsthométselcha>, //ʔíc'-əʔc=T-ámə-c-əl-cɛ//, /'I'll cut it off for you./, grammatical analysis: r-ben-pc-2soj-independent clause subject pronoun-1ssj-future tense, <malqí:wsemtselcha>, //mɛlq=í-ws=əm-c-əl-cɛ//, /'I'll faint./, grammatical analysis: r=lexical suffix=middle voice-independent clause subject pronoun-1ssj-future tense, <xéywethò:mcha>, //xíw-əT-à-m-cɛ//, /'You'll be warned., Someone will warn you./, grammatical analysis: r-pc-2spass-future tense, example: <líchxw slhéq'el:exw welámescha>, //lí-c-əx^w s=ʔéq'əl=l-əx^w wə-lém-əs-cɛ//, /'Do you know if he'll go?/, grammatical analysis: interrogative verb-independent clause subject pronoun-2ssj stative?=r-nc-3object pronoun sb-auxiliary verb=itz-3subordinate subject pronoun-future tense.

<chácha>, us //cécɛ//, EFAM ['be tender (in emotions)'], phonology: perhaps an old characteristic reduplication, syntactic analysis: adjective/adjectival verb, dialects: *Tait only*, attested by TG, some

where he is going today'], attested by AD, EB, AC, others; found in <**xwchókwelchexw**>, //x^w=cák^w=əl-c-əx^w//, 'Where are you travelling?, Where are you going?/', attested by EB, also <**xwchó:kwelchexw**>, example: <**echxw ye xwchókwel**>, //ʔə-c-x^w yə x^w=cák^w=əl//, 'Where are you headed for?/', attested by EB, <**echxw yálh xwchókwel ~ échxw kw'e úlh xwchókwel**>, //ʔə-c-x^w yéʔ x^w=cák^w=əl ~ ʔə-c-x^w k^wə ʔúʔ x^w=cák^w=əl//, 'Where are you going now (this time)?/', attested by EB, <**li xwechókwel**>, //li x^w(ə)=cák^w=əl//, 'Where is he going?/', attested by AC.

<**chó:lqem**>, mdls //cĕ[=Aa=]-l=q=əm or cá(·)=əl=(ə)q=əm//, TVMO 'follow, follow along after (the one ahead knows)!', possibly <**ó(-)ablaut**> derivational, possibly <=q> meaning uncertain, possibly <=el> go, come, get, become, inceptive, possibly <=eleq> occupational, (<=em> middle voice or intransitivizer), phonology: derivational ablaut, syntactic analysis: intransitive verb, attested by IHTTC, EB, Salish cognate: Squamish /éáy-aq-m/ follow, pursue (intr.) has -aq as a formative suffix with no clear meaning (Kuipers 1967:133); the cognate confirms the connection of the above root with that in xwchà:l /x^w=cĕ:l/ where is s-o going? because Squamish /a/ corresponds to Halkomelem /ɛ/ and /ɛ/ is attested in the Halkomelem root; the Squamish /y/ here corresponds to Halkomelem /l/ (as do a number of Squamish /y/'s, see Galloway 1982:59-64); also cf. Squamish /éáy-n/ follow, pursue, chase (transitive) with Halkomelem chó:lt /èá-l-t/ follow s-o/s-th below, where Squamish -n and Upriver Halkomelem =T are both purposeful control transitivity markers. Halkomelem now has derivational ablaut of the vowel from /ɛ/ to /a/; historically that may be influence or borrowing from neighboring languages such as Nooksack, Squamish, Lushootseed, or Thompson, which didn't undergo the historical sound shift from PCS *a to /e/ or /ɛ/ as did Halkomelem and Straits., example: <**me chó:lqem**>, //mə cá:lqəm//, 'come along after (the person followed is aware of it)!', attested by EB, <**latsel chó:lqem.**>, //lɛ-c-əl cá:l=q=əm//, also <**lamtsel chó:lqem.**>, //lé=m-c-əl cá:lq=əm//, 'I'll go follow., I'm going to follow.', attested by IHTTC, also <**látselcha choléqem.**>, //lé-c-əl-cĕ cal[-é-]q=əm//, (<=é-> continuative), phonology: stress-shift, infix, attested by EB.

<**chelchó:lqem**>, pls //C₁əC₂=cĕ[=Aa=]-l=q=əm//, TVMO ['lots following'], (semological comment: note that pluralizing a verb automatically makes it continuative in most cases), (<**R3**=> plural), (<**ó-ablaut**> continuative or derivational), phonology: reduplication, attested by IHTTC.

<**chichelóqtel**>, pcs //C₁í=cá=lə[=M2=]q=T-əl//, dms, TVMO ['walking single-file'], (<**R4**= (here **chi**)> diminutive), lx <=eleq> occupational, lx <=metathesis2> (switches preceding two vowels) continuative, (<-t> purposeful control transitivity marker, <-el> reflexive), phonology: reduplication, phonology: metathesis, syntactic analysis: transitive verb-reflexive, literally 'following after each other purposely', attested by IHTTC.

<**chó:lt**>, pcs //cĕ[=Aa=]-l=T or cá(·)=əl=T//, TVMO 'follow s-th/s-o (on foot, in a car, or on a horse, for ex.), follow behind s-o', (<=t> purposeful control transitivity marker), syntactic analysis: transitive verb; found in <**chó:lthóxes**>, //cá:l=T-áx^y-əs//, 'he's following me (on foot or in a car)(continuative prob. wrong here)', attested by Elders 3/15/72, 'he followed me', attested by IHTTC, example: <**lechxw chó:lt**>, //lə-c-x^w cá:l-t//, 'You follow something (on foot or horse)', attested by EB.

either a rare survival from PCS or borrowed with the form from another Salish language, lx <=**ta**> *thing* appears to be clipped or dropped, the root of this word may be related (or identical) to that in **chó(:)=kw** *be far away, distant*, syntactic analysis: adjective/adjectival verb, example: <**tl'ól schókwelelh**>, //è'á-l s=cák^w=əl=əʔ//, '*That's what I borrowed.*', attested by EB, <**schókwelelh ò te skwí:xs**>, //s=cák^w=əl=əʔ ʔà tə s=k^wí·x^y-s//, '*He's borrowed his name.*', attested by EB.

<**chélhtat ~ chélhtet**>, pcs //cəʔ=tε=T ~ cəʔ=tə=T//, SOC '*lend it to s-o, let s-o borrow it*', see **chélhta** <**chemlexw ~ chemléxw**>, ncs //cá[=Aə]=m=l-əx^w ~ cá(=)m=l-ə[=']x^w//, SOC '*elope with s-o or meet up with s-o*', TVMO, KIN, literally possibly '*manage to get s-o away from the river*', see **chó:m**

<**chémq ~ tsémq**>, us //cəmq//, [èmq ~ címq], WETH '*stop blowing (of the wind)*', syntactic analysis: intransitive verb, dialects: *Cheh.* (*Chill.* uses **líqwel** *get calm*), example: <**lí le chémq ~ lí le tsémq**>, //lí lə cəmq//, '*Is the wind stopped?*', <**chémq te speháls**>, //cəmq tə s=pəh=él//, '*The wind has stopped.*', dialects: *Cheh.* (*Chill.* uses **Líqwel te speháls** *The wind has stopped.*), syntactic analysis: historical past tense, <**le chémq te spehá:ls**>, //lə cəmq tə s=pəh=é·ls//, '*The wind stopped.*', (semological comment: note the contrast in past tenses in the last two examples: the ambiguous past with <**le**> seems here to indicate a more sudden action than the historical past without <**le**> in the next-to-last example), syntactic analysis: ambiguous past.

<**chew ~ cháv**>, bound root //cəw ~ cəw//, LAND '*beach, shore*'.

<**cháchew ~ cháchu**>, dnom //cə[=C₁ə]=w or C₁ə=cəw//, LAND '*beach, shore*', (<=**R1**> (may be an old) *stative*) or more likely <**R7**> *augmentative*, phonology: reduplication, syntactic analysis: nominal, also <**tsá:tsô**>, //cəcəw//, dialects: *Chill.*: AC, other sources: ES /cə·cəw/, JH /cə·cu/.

<**chúchu ~ chówchuw ~ chéwchew**>, ds //cəw=C₁əC₂//, LAND '*away from the shore, toward the river*', WATR, (<=**R2**> *characteristic*), phonology: reduplication, syntactic analysis: adverb/adverbial verb, example: <**lámset kwe chúchu**>, //lám=c-əʔ k^wə cəw=C₁əC₂//, '*We'll go down to the river (near but out of sight).*', <**lám kwe chúchu [qesésu] lhó:s**>, //lám k^wə cəw=C₁əC₂ [qə-s-əs-əw] ʔá·s//, '*He's going to the river to drift-net.*'.

<**Chuchuwálets**>, dnom //cəw=C₁əC₂=éləc (or possibly? C₁əC₂=cəwé=ləc)//, PLN '*Fraser River (way out at the end), mouth of the Fraser River*', phonology: reduplication, attested by *Cheh.*, other source: place name file reference #107, also <**Chôchô'álets**>, //cəwcəwʔéləc//, [èøøʔələc], dialects: *Sumas*.

<**chuchuwáxel**>, dnom //cəw=C₁əC₂=éxə//, BLDG '*front end of a house (inside or outside)*', literally '*side of a house/building toward the river*', lx <=**áxel**> *side (of a building, a square, or a river)*, phonology: reduplication, syntactic analysis: nominal.

<**chuchuwó:ythel**>, ds //cəw=C₁əC₂=á·yèə//, WATR '*out in the middle of the river*', literally '*toward the river from the lip/edge*', lx <=**ó:ythel**> *on the lip, on the jaw*, phonology: reduplication, attested by BHTTC.

<**chewélhem ~ tsewélhem ~ tsówélhem**>, mdls //cəw=ə[-']-ə-m//, cts, ABFC '*to spawn*', literally '*to beach one's offspring*', lx <=**elh**> *offspring, child*, (<=**em**> *middle voice*), syntactic analysis: intransitive verb, dialects: *Deming* (report meaning as *be spawning*), example: <**chewélhem te sth'óqwi**>, //cəw=ə[-']-ə-m//, '*The fish are spawning.*', attested by *Deming*, also <**thewélhem**>, //èəw=əʔ-ə-m//, ABFC '*to spawn*', dialects: AD, also <**thówélhem**>, //èəw-əʔ-ə-m//, ABFC '*a fish that's going to spawn*', dialects: *IHTTC*, phonology: the form given here can be analyzed in two ways: AD and the *IHTTC* speakers here have a weak-grade root with the derivational suffix required to take the stress or there is inflection for the non-continuative form here by stress-shift (less likely). The stress-shift patterns for aspect are reversed from those of the *Deming* speakers for this word. Another difference between dialects/speakers is that AD and *IHTTC* speakers reporting

this form have a th /è/ where Deming speakers have ch /c/. The Squamish cognate is /ʔa-è-éáwam/ *to spawn*. Halkomelem ch /c/ corresponds to Squamish /è/ and Halkomelem th /è/ corresponds to Squamish /c/. Unless the Squamish root /éáwam/ had an initial /c/ which assimilated to the preceding /è/ prefix, it seems like the Halkomelem form with ch corresponds to the Squamish form., syntactic analysis: intransitive verb, <**chowlh tu thewélhem kw'e sth'elóth'qwi**>, //cɛ-əwʔ tu èəw=éʔ-əm k'wə s=è'[-ə1-]á[-C₁ə-]q^wi//, /'Soon the fishes will spawn.'/, grammatical analysis: future tense-already really beach=offspring-one's own(middle voice) the (remote) nominal-fish[-pl.-][[-pl./dim.?-], attested by AD.

<**théwelhem**>, cts //cə[- ˘]w=əʔ-əm//, ABFC ['*spawning (in action when you see them)*'], grammatical comment: AD was specific that this was a continuative form; she was correcting a word list entry where it was listed as non-continuative; at the same time she also said that thewélhem should be listed as *spawn (non-continuative)*, attested by AD, syntactic analysis: intransitive verb, also <**thówelhem**>, //èə[- ˘]w=əʔ-əm//, ABFC ['*spawning*'], attested by IHTTC.

<**chewô:lhþ**>, dnom //c[=əC₂=]éw=(ə)ʔp//, EB ['*black cottonwood tree*'], ['*Populus balsamifera trichocarpa*'], ASM ['the sweet cambium, **sxá**:meth or ts'its'emá:welh, was scraped or licked off of the peeled bark and eaten fresh; the cotton from the catkins was gathered and mixed with dog and goat wool to whiten it and make it go further'], literally /'many shores tree or little shore tree (so named since it grows mainly on the shores of rivers or lakes)'/, (<=**R6**= (**here =ew**)> either *plural* or *diminutive*), phonology: reduplication, syntactic analysis: nominal, other sources: ES /cəw-éw-ʔp/, JH /cəwú-ʔp/, H-T <tcEwólþ> all *cottonwood*.

CH'

<ch'>, comment: The Stó:lô orthography uses both ch' ([è']) and ts' ([c']), for two allophones of a single

Upriver Halkomelem phoneme, /c'/. ts' occurs more frequently in initial position than ch', so for most forms look under ts' first. Those forms which have a frequent variant in ch' will also be found here. In Musqueam and Cowichan dialects of Halkomelem Wayne Suttles informs me that both /c/ and /è/ must be set up as phonemes (Suttles 1982 p.c.), contrary to Elmendorf and Suttles 1960; he did not mention both /c'/ and /è'/ being required. Kava 1969 and Jones 1976 both give /c/ and /è/, but Kava has only /c'/ while Jones sets up both /c'/ and /è'/ (the latter in only one root)., comment: Leslie 1979 has a very brief section on Cowichan phonology with four phonemes here, /c, è, c', è'/ but derives this analysis from Jones 1976 and Hukari 1977. None of these sources, however, contains a tabulation of the environments in which the four sounds [c, è, c', è'] occur. Galloway 1977 & 1993 do have such a tabulation and show that for Upriver Halkomelem [c] and [è] are allophones of /c/ and [c'] and [è'] are allophones of /c'/ all predictable in part from the environments in which they occur and in part in free variation.

<ch'á: ~ ts'á:>, bound root //c'É· on top of//, several derivations from this root are only attested with ts' pronunciations, all are listed under ts'; those given here show frequent ch' attestations.

<**i'oyóm** or **i'eyóm**>, TVMO [*'to walk slow'*], *see* óyé*m*.

K

<k>, phonology: The sound k is found mainly in borrowings from English, French, Chinook Jargon, and other Indian languages; it is also found in some words which normally have q in the same position in the word but have undergone a process of sound symbolism to produce diminutives or pet names.

Where borrowings are found, the source word and source language will be listed, where known; where sound symbolism is identified that will be shown. The sound k often is palatalized ([kʲ]), and the most consistently palatalized are sometimes spelled with ky in the orthography..

<ká:k ~ kyá:ky>, KIN ['younger sibling (pet name)'], see sqá:q.

<kalipóli>, free root //kɛlipóli//, PLN ['California'], borrowed from English /kælɪfórnyə/ *California*, syntactic analysis: nominal, attested by IHTTC, source: place names file reference #191a.

<kálti>, free root //kɛlti//, FOOD ['candy'], borrowed from English <candy>/kændi/ or Chinook Jargon <kánti> /kánti/ *candy* (Johnson 1978:285), syntactic analysis: nominal, attested by EK,DK.

<kápech>, free root //kɛpɛc//, [kápɛtɛ], EB ['cabbage'], ['*Brassica oleracea*'], borrowed from Chinook Jargon /kápac/ *cabbage* (Johnson 1978:284), syntactic analysis: nominal.

<mémeles kápech>, EB, FOOD *brussel sprouts* (lit. many little children of + cabbage), (attested by RG,EH 6/16/98 to SN, edited by BG with RG,EH 6/26/00)

<p'éq' sp'áq'em kápech>, EB, FOOD *cauliflower* (lit. white + flower + cabbage), (attested by RG,EH 6/16/98 to SN, edited by BG with RG,EH 6/26/00)

<tsqwá:y p'áp'eq'em kápech>, EB, FOOD *broccoli* (lit. green + flowering/flowered + cabbage), (attested by RG,EH 6/16/98 to SN, edited by BG with RG,EH 6/26/00)

<ká(t) ~ ke'át>, df //kɛ(t) ~ k(=)əʔɛ(=)t//, TIME ['wait, be later'], possibly <=e'á> comparative, possibly <fronting> diminutive, phonology: possible fronting, syntactic analysis: adverb/adverbial verb, attested by EB, Deming, AH; found in <káchxwò>, //kɛ-c-xʷ=à//, 'Wait a while.', possibly root <qa> /qɛ/ and, syntactic analysis: imperative, attested by EB, example: <ke'áts el>, //k(=)əʔɛ(=)t-s ʔəl or k(=)əʔɛ(=)c ʔəl//, 'Wait a bit.', attested by Deming 1/18/79.

<keke'át>, ds //C₁ə=kəʔɛt//, TIME ['a little later (??)'], (<reduplication> diminutive), phonology: reduplication, syntactic analysis: adverb/adverbial verb, attested by AH (Deming 2/8/79).

<katkasyéthem>, us //kɛtkɛsyéðəm//, [kætəkæsyíðəm], CH ['catechism'], borrowed from French catéchisme /katešism/ *catechism*, syntactic analysis: intransitive verb?, nominal?, attested by IHTTC, also <katesíth'em>, //kɛtɛsîð'əm//, attested by EB.

<Káthlek>, free root //kɛ̀lɛ̀lɛ̀k//, CH ['Catholic'], borrowed from English /ká̀lɛ̀lɛ̀k/ *Catholic*, syntactic analysis: nominal, adjective/adjectival verb.

<Kateseló:y>, df //kɛcɛslá:y or kɛt=cɛs=əl=ɛ[=Aá=]y or q[=K=]ɛt=cɛs=əl=ɛ[=Aá=]y//, PLN ['Kateseslie, a spring-water stream east of Coqualeetza, part of the Kw'eqwá:líth'a [property or stream?] that went through Sardis and came out to the Cottonwood Corner'], possibly root <kát> wait, be later or possibly root <qát> cook or heat with steam, put on a poultice, possibly <fronting> diminutive, possibly <=tses> on the hand, possibly <=el> get, become, come, go, possibly <=á(:)y> bark, covering, possibly <ó(:)-ablaut> on <á> in suffix resultative, phonology: possible fronting, possible ó(:)-ablaut on á in suffix, possible vowel-loss in suffix before stressed suffix, syntactic analysis: nominal, attested by DM (1/8/62)(new p.5 of transcripts), other sources: Wells 1965 (1st ed.):13.

- <**káwpôy**>, free root //kɛ́wɔy//, SOC ['cowboy'], borrowed from English /kɛ́wbɔy/ *cowboy*, syntactic analysis: nominal, adjective/adjectival verb.
- <**kawpôyóweq(w)**>, dnom //kɛwɔy=áwəq(w)//, CLO ['cowboy hat'], lx <=óweqw> *hat* (incl. <=eqw> *on the top of the head, on the hair*), contrast <yóseqw> *hat*, syntactic analysis: nominal phrase with modifier(s), Salish cognate: Musqueam /=áw'əqʷ/ *hat* Suttles ca1984:14.5.86.
- <**kéchel**>, free root //kécəɬ//, [kíɛɬ], BLDG ['kitchen'], borrowed from English /kíɛən/ *kitchen*, syntactic analysis: nominal, attested by Elders Group, EB, example: <alétsa te kéchel>, //ʔɛ́lɛ́cɛ tə kécəɬ//, /'Where's the kitchen?'/, attested by AD.
- <**keke'át**>, TIME ['a little later (??)'], see **ká(t)** ~ **ke'át**.
- <**kelchóch ~ kyelchóch**>, ds //kəl=các ~ k'əl=coc//, SOC /'Englishman, English, Canadian, Canada, Anglican'/, CH, borrowed from Chinook Jargon /kin cóc/ *English, Scotch, Irish, Canadian* (Johnson 1978:311-312), syntactic analysis: nominal, adjective/adjectival verb, attested by Elders Group, Deming 3/15/79 (SJ, MC, MV, LG), ASM ['English, Englishman'], semantic environment ['in Canada'], ASM ['Canada, Canadian'], semantic environment ['speaker living in the United States'], <telí kw'e Kelchóch>, //təlí k'w'ə kəl=các//, /'from Canada'/, attested by Deming 3/15/79 (SJ, MC, MV, LG), ASM ['Anglican'], semantic environment ['religion'], <Kyelchóch ts'ahéyelh>, //k'əl=các c'ɛ́hɛ́yəʔ//, /'Anglican church (institution)'/, also compare <Kíl Chóch>, ds //kíl cóc//, N ['King George'], borrowed from Chinook Jargon /kin cóc/ *King George*.
- <**kelchochéleqw**>, ds //kəl=cac=éləqʷ//, ANAH /'part the hair on the right side (left side as people look at you), have the hair parted on the right side'/, lx <=éleqw> *hair, top of the head*, syntactic analysis: adjective/adjectival verb, attested by IHTTC.
- <**kemí'**>, possible root //kə́mí(?)//, meaning unknown
- <**skemí'ia**>, dnom //s=kə́míʔ=iyɛ//, EZ /'a white-headed duck, [could be bufflehead, snow goose, emperor goose, poss. oldsquaw, or hooded merganser, other duck-like birds with white heads do not occur in the Stó:lô area and the emperor goose would be only an occasional visitor]'/, (<s=> *nominalizer*), (<=ia> *diminutive*), (possibly <fronting>, i.e., **q** → **k** *diminutive*), phonology: possibly fronting, syntactic analysis: nominal, source: JH:DM.
- <**ke'át ~ ká(t)**>, df //kɛ́(t) ~ k(=)əʔɛ́(=)t//, TIME /'wait, be later'/, possibly <=e'á> *comparative*, possibly <fronting> *diminutive*, phonology: possible fronting, syntactic analysis: adverb/adverbial verb, attested by EB, Deming, AH; found in <káchxwò>, //kɛ́-c-xʷ=à//, /'Wait a while.'/, possibly root <qa> /qɛ/ *and*, syntactic analysis: imperative, attested by EB, example: <ke'áts el>, //k(=)əʔɛ́(=)t-s ʔəl or k(=)əʔɛ́(=)c ʔəl//, /'Wait a bit.'/, attested by Deming 1/18/79.
- <**keke'át**>, ds //C₁ə=kəʔɛ́t//, TIME ['a little later (??)'], (<reduplication> *diminutive*), phonology: reduplication, syntactic analysis: adverb/adverbial verb, attested by AH (Deming 2/8/79).
- <**kíks**>, free root //kíks//, FOOD ['cake'], borrowed from English /kéyks/ *cakes*, syntactic analysis: nominal, attested by Elders Group, also /'cakes'/, attested by EB, <t'át'ets'em qwíqwòyèls kíks seplíl>, FOOD *lemon cake* (lit. lemon (itself from sour little yellowish fruit) + cake + bread), (attested by RG,EH 6/16/98 to SN, edited by BG with RG,EH 6/26/00), <xáweq kíks seplíl>, FOOD *carrot cake* (lit. carrot + cake + bread), (attested by RG,EH 6/16/98 to SN, edited by BG with RG,EH 6/26/00)
- <**Kíl Chóch**>, ds //kíl cóc//, N ['King George'], borrowed from Chinook Jargon /kin cóc/ *King George*, syntactic analysis: nominal, attested by EB.
- <**Kíl Ítewet**>, ds //kíl ʔítəwət//, N ['King Edward'], borrowed from back-formation from Chinook Jargon /kin cóc/ *King George* with Ítewet *Edward*, the common name, from British English /ʔédwəd/

Edward, syntactic analysis: nominal, attested by EB.

<**klekleklék**> perhaps, df //klək=klək=klək// [klək=klək=klək], SD ['glug glug glug'], syntactic analysis: intransitive verb, prob. borrowed from English, attested by Elders Group.

<**klép**>, free root //klép//, PLAY ['club (in cards)'], semantic environment ['cards'], borrowed from English [klAb] *club*, syntactic analysis: nominal.

<**kópi**>, free root //kápi ~ kʷápi//, FOOD ['coffee'], borrowed from Chinook Jargon <kau'py>/kópi/ *coffee* or English /kófi/, syntactic analysis: nominal, attested by Deming, Elders Group, AD, example: <**éy te kópitset**>, //ʔéy tə kápi-c-ət//, 'We have good coffee, Our coffee is good.', attested by Deming.

<**kópi'álá**>, dnom //kápi=éíé//, HHG ['coffee-pot'], FOOD, lx <=**álá**> *container of*, syntactic analysis: nominal, attested by AD, example: <**alétsa te kópi'álá**>, //ʔélécə tə kápi=éíé//, 'Where is the coffee-pot?', attested by AD.

<**kopú**>, free root //kapú//, CLO ['coat'], borrowed from Chinook Jargon <kapo> /kapó/ *coat* itself from French <capote> *hooded cloak*, syntactic analysis: nominal, attested by EB, AC.

<**kúkumels**>, EB /'cucumber'/, see **kwúkwemels**.

<**kú:l**>, free root //kú:l//, LAND ['gold'], borrowed from Chinook Jargon <gold>/kól/ *gold* or English /góld/, syntactic analysis: nominal, attested by Elders Group 5/28/75, Deming, also <**kô:l**>, //kó:l//, attested by Elders Group 3/72, example: <**atsel kwéléxw te kô:l**>, //ʔe-c-əl kʷél=ləxʷ tə kó:l//, 'I discovered gold.', attested by Elders Group 3/72, <**tsel thexláxw te kô:l**>, //c-əl èəx=lə[=Aé=]xʷ//, 'I discovered gold.', attested by Elders Group 3/15/72.

<**Kúshen**>, free root //kúšən//, PLN ['Goshen'], ASM ['name of a small town near Deming, Wash. in Nooksack territory'], borrowed from English /góšən/ *Goshen*, syntactic analysis: nominal, attested by Deming, example: <**li te Kúshen Xálh**>, //li tə kúšən xʷéʔ//, 'on Goshen Road', attested by Deming.

<**kyá:ky ~ ká:k**>, KIN ['younger sibling (pet name)'], see sqá:q.

<**kyal:ám**>, free root //kʷəl-ém//, [kʷəl-ém], CH /'fasting for Lent, prob. also *Lent*/, borrowed from French **carême** *Lent*, Elder's comment: "all Catholic people over 21 used to have to abstain from meals for Lent; now they just fast one hour before", syntactic analysis: intransitive verb?, attested by Elders Group 1/30/80.

<**kyépe**>=, bound root //kʷépə=//, borrowed from possibly Thompson or Lillooet, Salish cognate: Shuswap /kʷep/ *sick* (Kuipers 1974:205).

<**kyépetses**>, df //kʷépə=cəs//, [kʷépɪcɪs], ABDF ['in-grown finger-nail'], lx <=**tses**> *on the hand*, syntactic analysis: intransitive verb, attested by BHTTC.

<**kyépexel**>, df //kʷépə=xʷél//, [kʷépəxɪl], ABDF ['in-grown toe-nail'], lx <=**xel**> *on the foot*, borrowed from possibly Thompson or Lillooet, Salish cognate: Shuswap /kʷep=xʷén/ *to have a sore leg* (Kuipers 1974:205), syntactic analysis: intransitive verb, attested by BHTTC.

<**kyépetses**>, ABDF ['in-grown finger-nail'], see **kyépe**=.

<**kyépexel**>, ABDF ['in-grown toe-nail'], see **kyépe**=.

<**kyó**>, free root //kʷá ~ kʷá://, CAN /'car, automobile'/, borrowed from English /kár/ *car*, syntactic analysis: nominal, attested by EB, Elders Group, example: <**xwá:lq i tós te kyó**>, //xʷé:lq yi-tás tə kʷá//, 'He almost got hit by a car.', literally 'he almost got hit by something moving the car', attested by EB, <**sle'ó:lwelhs te kyó**>, //s=ləʔ=á:lwəʔ-s tə kʷá//, 'It's on the other side of the car.', attested by EB, <**tsel sle'ólwelh te kyó**>, //c-əl s=ləʔ=álwəʔ tə kʷá//, 'I'm on the other side of the car.'.

<**kyóxàlh**> or better <**kyó xàlh**>, cpds //kyá=xʷèʔ// or better //kyá xʷèʔ//, CAN ['*railroad*'], literally /'car road'/, syntactic analysis: nominal phrase with modifier(s), attested by Elders Group 3/2/77, *also see* xálh ~ xá:lh.

K'

<k'>, phonology: The sound k' /k'/ is found in borrowings from Interior Salish Indian languages (Thompson, perhaps Lillooet and Okanagan) and perhaps in words with *diminutive* fronting of q' /q'/ → k' /k'/. As with the sound k, these origins will be indicated in each entry, where known. Unlike k, k' is not palatalized often with a glide, i.e. [kʷ]; it is more often velar or palatal and less often palatalized.

<k'áxwe>, possible bound root or stem //k'Éxʷ(=)ə// from Thompson language, the borrowed word may have been borrowed with or without the s= nominalizer, research into older records of UHk is needed (Boas, Hill-Tout, etc. have not been checked yet)

<sk'ak'áxwe>, df //s=C₁É=k'Éxʷə//, EB [*dried saskatoon berries*'], [*Amelanchier alnifolia*'], ASM [*ripe in July, the best ones are found north of Hope, B.C.; fresh berries are eaten and have a separate name; the dried berries are obtained in cakes or sheets from the Thompson and other Interior Salish Indians; saskatoons can be mixed with bulbs of the s_xameléxw_{thel}h tiger lily and kw'épan [k'ʷÓpɛn] (a Thompson word, a white root, like a sweet potato in taste) and then either with sugar or with fish eggs*'], borrowed from Thompson /s=k'Éx=əm/ *dried berries* (Thompson /x/ is velar and corresponds to Upriver Halkomelem velar /xʷ/ in this word), (<R8=> *diminutive* or *resultative* or *derivational*), possibly <=e ~ =a>, da //ə ~ =ɛ//, EZ [*living thing*'], phonology: reduplication, syntactic analysis: nominal, attested by Elders Group, Deming (M.H.), AC, DM 12/4/64; unclear whether borrowed with the reduplication and s= nominalizer from Thompson or borrowed as the root <k'axwe> or stem <k'axw> and then these were added from UHk.

<k'ák'elha>, df //k'É[=C₁ə]=†ɛ//, EZ [*pill-bug*'], [*class Crustacea, order Isopoda, Armadillidium vulgare*'], semantic environment [*sowbug that rolls up [therefore a pill-bug, since they and not true sowbugs, roll up], found in damp areas and on bacon and dried fish, black and grey striped bug with lots of legs, real tiny bug found with decayed meat, oval-shaped bug smaller than a lady-bug*'], possibly <=R1=> *diminutive* or *continuative* or *resultative*, possibly <=a> *living thing*, phonology: reduplication, syntactic analysis: nominal.

<k'ámets ~ k'ámeth>, possible bound root //k'Éməc ~ k'Éməè//, the borrowed word may have been borrowed with or without the s= nominalizer, research into older records of UHk is needed (Boas, Hill-Tout, etc. have not been checked yet)

<sk'ámets ~ sk'ámeth>, dnom //s=k'Éməc ~ s=k'Éməè//, EB [*blue camas, yellow dog-tooth violet = yellow avalanche lily*'], [*resp. Camassia leichtlinii and Camassia quamash, Erythronium grandiflorum*'], semantic environment [*wild sweet potatoes, obtained in trade, don't grow here; camas, like sweet potatoes with little sausage-shaped potatoes on root; dried bulbs of both camas and avalanche lily were obtained in trade probably both from the Interior and the Coast Indian peoples*'], borrowed from Thompson /sk'ém'ec/ *dog-tooth violet, blue camas, white easter lily, Indian potato*, syntactic analysis: nominal, attested by Elders Group, also <sk'ámeth'>, //sk'Éməè//, attested by Deming, may have been borrowed with or without the s= nominalizer of Thompson.

KW

<**kw**>, free root //k^w//, DEM /'the (remote, not visible, abstract), some (indefinite)'/, phonology: may be a rapid speech alternant of kwe, syntactic analysis: demonstrative article, dialects: *EB uses both kw and kw'e, while AC prefers kw'e and only very rarely (if ever) uses kw.* attested by EB, also /'some (indefinite)'/, example: <**la há:we kw (s'álhtel, stámés).**>, //lɛ hɛ·wə k^w (s=ʔɛʔtəɫ, s=tɛm=ós)//, /'He went hunting for (some food, something)'/, attested by EB, contrast <**la há:we kw'e spá:th**>, //lɛ hɛ·wə k^wə s=pɛ·è//, /'He went hunting for bear.'/, attested by AC, contrast <**l stl'í kw'e qó:**>, //l s=ë'í k^wə qá·//, /'I want some water.'/, attested by AC, others, also /'the (remote, abstract, not visible, distant)'/, <**kw (spelwálh, cheláqelh(elh))**>, //k^w (s=pəl(=)w=ɛʔ, cəlɛq=əʔ(=əʔ))//, /'last year, yesterday'/, attested by EB, contrast <**kw'e (spelwálh, cheláqelh(elh))**>, //k^wə (s=pəl(=)w=ɛʔ, cəlɛq=əʔ(=əʔ))//, /'last year, yesterday'/'.

<**kws ...-s ~ kwses ~ kw'es ...-s**>, if //k^w-s ...-s ~ k^w-s-əs ~ k^w-əs ...-s//, CJ /'that he, that she, that it, that they'/, (the first <-s (-es after kw')> nominalizes following phrase, the second -s ~ -es third person subordinate subject), phonology: kws ...-s, kwses, and kw'es ...-s are in free variation for most speakers, syntactic analysis: demonstrative conjunction, sbsp (possessive pronoun affix), syntactic comment: used to attach (conjoin) subordinate phrases or subordinate sentences with third person subjects to main verbs; the -s closest to kw (or kw') is the nominalizer, since ...-s is attached to the first word in the su subordinate phrase or sentence in the same position as a third person possessive pronoun and since possessive pronouns are used in the same way to show first and second person subordinate subjects; syntactic comment: with first or second person subjects only kw'e (not kw) can be used to attach subordinate phrases or sentences with first or second person subjects to main verbs (example, **kw'-el-s** that I, **kw'-a(')-s** that you (sg.), **kw'-s ...-tset** that we, and **kw'-a(')-s ...-elep** that you folks; syntactic comment: often an adverb or adjective is focussed upon by being made the main verb and the rest of the phrase or sentence is subordinated; -u contrastive can also be attached at the end of any of these conjunctions, as in kwsu ...-s, kwsesu, kw'esu ...-s, kw'elsu, kw'a(')su, etc.; (-u is often not translated in English directly, more by tone of voice and implication; see under -u), attested by Elders Group, AC, EB, others, example: <**tsel slhéq'elewx kwses spá:th**>, //c-əl s=ʔəq'əɫəx^w k^w-s-əs s=pɛ·è//, /'I know (that) it was a bear.'/, attested by AC, also <**tsel slhéq'elewx kws spá:th**>, //c-əl s=ʔəq'əɫəx^w k^w-s s=pɛ·è-s//, attested by AC, <**laxwx tsesá:t kws las kwél:em kw s'álhtel**>, //lɛ-c-x^w cəs=ɛ·T k^w-s lɛ-s k^wəl=l-əm k^w s=ʔɛʔtəɫ//, /'Send him to get food.'/, literally /'go-you send-him that go-he get some food'/, attested by EB, <**xwém (kwses, kw'els, kw'as) me áyelexw**>, //x^wəm (k^w-s-əs, k^w-əl-s, k^w-ɛ-s) mə ʔɛyələx^w//, /'(He, She, It, They; I; you (sg.)) got well fast.'/, attested by AC, <**skw'á:y kw'els q'á:l kw'es léwes**>, //s=k^wɛ·y k^w-əl-s q'ɛ·l k^w-əs ləwə-s//, /'I couldn't believe it was you.'/, literally /'it can't be that I believe that is you-it'/, (semological comment: note the semantic focus), syntactic comment: note the second person pronominal verb/verbal pronoun with third person subject, attested by AC, <**wiyóth kwsu qéls te sqwálewels te lólets'e**>, //wiyáè k^w-s-u qəl-s tə s=q^wɛl=əwəl-s tə C₁á=ləc'ə//, /'a pessimist, a person whose thoughts are always bad'/, literally /'it's always that the thoughts of the one person are bad'/, attested by Elders Group, <**wiyóth kwsu éys te sqwálewels te lólets'e**>, //wiyáè k^w-s-u ʔɛy-s tə s=q^wɛl=əwəl-s tə C₁á=ləc'ə//, /'an optimist, a person whose thoughts are always good'/, attested by Elders Group.

<**kwe**>, ds //k^w=ə or k^wə//, DEM /'the (present, not visible, gender unspecified), the (remote, abstract)'/, poss. lx <=e> living thing, syntactic analysis: demonstrative article, example: <**li kwe í skwetáxw tha sísele**>, //li k^wə ʔí s-k^wətɛx^w (k^w)əə-ɛ sí[=C₁ə=]lə//, /'Is your grandmother in?, Is

your granny in?’, (<=R1=> affectionate diminutive), phonology: length-loss happens automatically before =doubling infix #1 with e= reduplication, attested by AC.

<**kwse**>, ds //k^w=sə//, DEM /'the (female, near but not visible), (female, near but not in sight) (translated by gender specific words in English, like aunt, etc.)'/, phonology: in fast speech kw is sometimes dropped (consonant-loss), leaving se /sə/, syntactic analysis: demonstrative article, attested by AC, CT, others, example: <**tseł kw'étslexw kwsa (sí:sele, stó:les, shxwemlí:kw, stí:wel)**>, //c-əł k^wétslexw k^w=s=ε (sí=[C₁ə=]lə, s=tá-ləs, s=x^wəmlí-k^w, s=tí-wəł)//, /'I saw (see, past) your (grandmother, wife, aunt, niece)'/, attested by AC, <**kwsel sí:selà:lh**>, //k^w=s=əł sí=[C₁ə=]lə-é(·)ł//, /'my deceased grandmother, my late grandmother'/, attested by CT, <**líye skwetáxw se Mary**>, //lí-ə s=k^wətéx^w sə mériy//, /'Is Mary inside?'/, attested by AC, <**lí í: sel tà:l**>, //lí ʔí- sə-l tē-l//, /'Is my mother here?'/, attested by AC.

<**kwsú:tl'ò**>, cpds //k^w=s=ú-ə'ə//, PRON ['that's her (absent)'], DEM, (<=s> (female near but not visible), <=ú:> contrastive, <(=)fló' that's), syntactic analysis: inp, attested by AC, others.

<**kwsú:tl'ò:lh**>, ds //k^w=s=ú-ə'ə-əł//, PRON ['that was her (deceased)'], DEM, (<-elh> past tense, deceased), phonology: vowel merger, syntactic analysis: inp, nominal past, attested by AC, others.

<**kwthe**>, ds //k^w=əə//, DEM /'the (male or gender unspecified, near but not in sight)'/, phonology: in fast speech kw is lost after xw and perhaps other labialized consonants, syntactic analysis: demonstrative article, attested by AC, EB, Elders Group, others, example: <**li í skwetáxw kwtha (màl, sí:le)**>, //li ʔí s-k^wətéx^w k^wəə-ε (mèl, sí-lə)//, /'Is your (father, grandfather) in?'/, literally /'is he? here inside the (male or gender unspecified near but not visible) (father, grandfather)'/, phonology: vowel merger, attested by AC, <**li í skwetáxw (tha selsí:le, kwthá í:méth, ta am'í:méth)**>, //li ʔí s-k^wətéx^w (k^wəə-ε C₁əC₂-sí-lə, k^wəə-ε ʔí-məè, tə-ε C₁əC₂-ʔí-méth)//, /'Are your (grandparents, grandchild, grandchildren) in?'/, ASM ['the grandparents and grandchild are near but not visible; the grandchildren are either present and visible or unspecified as to presence and visibility'], phonology: the first article, tha, shows consonant-loss in fast speech, the stress on the second article, kwthá, shows iterative aspect is hyper-slow speech since articles are not so stressed at normal speeds; all the articles show vmerg of e with -a (possessive pronoun suffix) → a, attested by AC, <**me stetís kwthe yewál**>, //mə s=C₁ə=tís k^wəə yəwél//, /'He came close to the first., (He was next to the first.)'/, attested by AC, <**li í tl'eláxw kwtha màl**>, //li ʔí ə'əléx^w k^wəə-ε mèl//, /'Is your father in (home)'/, usage: less formal than li í skwetáxw kwtha màl, attested by AC, <**etset tl'élexw li te shxwlís kwtha màl**>, //ʔə-c-ət ə'ələx^w li tə s(=)x^w=lí-s k^wəə-ε mèl//, /'We stopped at the place your father is at.'/, literally /'We stopped at the where he is your father'/, attested by AC, <**kwthel mà:l ~ kwthel màl ~ kwthel mál**>, //k^wə-əł mē-l (mē-l ~ mèl ~ mēl)//, [k^wéíłl mə̀l], /'my father'/, phonology: articles often get higher pitch than normal high stress, this is a fact of phrase- or sentence intonation and so is not written in the writing system or phonemically, attested by AC, <**lí: skwetáxw kwtha álex**>, //lí- s-k^wətéx^w k^wəə-ε ʔéləx^w//, /'Is your brother/sister in?, Is your sibling in?'/, phonology: length here may reflect vowel merger of li-e, attested by AC, contrast <**skwetáxw te lálem**>, //s=k^wətéx^w tə léləm//, /'in the house'/, attested by AC, also <**skwetáxw li te lálem**>, //s-k^wətéx^w li tə léləm//, /'inside the house'/, literally /'inside in the house'/, attested by EB, contrast <**líye skwetáxw se Mary**>, //lí-ə s-k^wətéx^w k^w=sə Mary//, /'Is Mary home?'/, literally /'Is she there? inside the (female near but not visible) Mary'/, semantic environment ['the speaker is near to Mary's residence'], (<-e> interrogative (yes/no question) (optional after sentence-initial li, as in examples below)), phonology: consonant-loss; se is short for kwse *the (female near but not visible)*; iterative aspect loses the kw here after xw (and perhaps after other labialized consonants) in rapid speech, attested by AC, <**lichxw we'éy el qwóqwel kw'es me kwetxwílem kwtha siyáya**>, //li-c-x^w wə=ʔéy ʔəl q^wε[-AáC₁ə-]l k^w-əs mə k^wət^w=íl=əm k^w=ə=ε si=yéyε//, /'Were you still talking when

your friend came in?’, attested by AC, contrast <li skwetáxw tha (màl, sí:le)>, //li s-k^wətéx^w k^w=èə-ε (mèl, sí:lə)//, /‘Is your (father, grandfather) in?’/, semantic environment [‘the speaker is outside the building’], phonology: consonant-loss; <tha>/èə-ε/ is short for <kwtha>/k^wè-ε/ *the (male or gender unspecified near but not visible)*; iterative aspect loses the kw here after xw (+ other labialized consonants?) in rapid speech; the article <tha>/èə-ε/ here cannot be from <the>/èə/ *the (female present and visible or presence and visibility unspecified)* because the nominals are male (for ex. *father*) and not visible; vowel merger is also present here (<ea> → <a>, /əε/ → /ε/), attested by AC, contrast <liye skwetáxw kw’e John>, //lí-ə s-k^wətéx^w k^wə ján//, /‘Is John home?’/, literally /‘is there - interrogative (yes/no) inside the (distant, remote) John’/, semantic environment [‘speaker is distant from John’s home’], phonology: vowel merger, attested by AC.

<kw'ók̄w'eq̄wet>, cts //k'á[-C₁ə-]q̄w=əT//, TCH /'beating s-o/s-th with a stick, hitting s-o/s-th with a stick, clubbing it/, (<-R1-> continuative), phonology: reduplication, syntactic analysis: intransitive verb, attested by EB, BHTTC, IHTTC; found in <kw'ók̄w'eq̄wetes>, //k'á[-C₁ə-]q̄w=əT-əs//, /'He is clubbing or hitting someone with a stick-like object/, attested by IHTTC, EB.

<kw'óq̄wlexw>, ncs //k'áq̄w=ləxʔ//, TCH /'hit s-o unintentionally, hit s-o accidentally/, syntactic analysis: transitive verb, attested by AC; found in <kw'eq̄wláxes>, //k'wəq̄w=l-áxʔ-əs//, /'He hit me unintentionally./, phonology: root allomorph //k'wəq̄w ~ k'wəq̄w// before stressed affixes, weak stress valence ~ zero grade, attested by AC, <kw'éq̄wlòmè>, //k'wəq̄w=l-ámə//, /'hit you accidentally/, phonology: downstepping, upstepping, high stress irregular on this root allomorph (/k'wəq̄w// expected unstressed), attested by AC.

<kw'elq̄wál>, plv //k'wə[-lə-]q̄w=él(s)//, TCH /'clubbing many times, hitting many times/, (<-le-> plural), (irregular) =ál for =áls structured activity, syntactic analysis: intransitive verb, Elder's comment: "(unsure)", attested by TM.

<Kw'eq̄wálíth'a>, df //k'wəq̄w=él=íè'ə//, PLN /'Coqualeetza stream esp. where it joins Luckakuck Creek, later Coqualeetza (residential school, then hospital, then Indian cultural centre and Education Training Centre)/, there are several versions of why the stream was so-named; the most plausible is that it was used for washing clothes and blankets, which were beaten with sticks in the process; another version is told in Hill-Tout 1902 as a wonderful long story, involving a famine, men discovering fish in Coqualeetza stream and deciding to eat them on the spot and not bring home any for their wives and families, a little boy sneaking home to tell his mother and the wives approaching en masse beating their husbands' blankets in anger;, as the wives approach one man throws paint on several men one-by-one and they change into different birds and fly away, finally he throws the remaining paint on the rest and they change and fly away; they then proceed to another adventure;, the third version says the stream was called Kw'eq̄wálíth'a because the fish were so numerous in it

that they could be clubbed and tossed into the boat; EL and Wilfred Tommy went with their grandfather and pitch-forked fish here, all kinds: coho, sockeye, even steelhead; they spawned on Hulbert's place and there were a few small Indian houses or sheds there; Lawrence James said many people from all over the Fraser Valley went there in the Fall to catch fish; this version is supported by the root kw'eqw *to club* but not by the suffix =íth'a *clothes not fish*, possibly <=ál> *plural affix?*, lx <=íth'a> *clothes, blankets used for clothing*, syntactic analysis: nominal, attested by Elders Group, EL (in Chill. dialect), source: place names reference file #89, also <Skw'ék'qwòs>, //s=k'w'á[-C₁ə-]q^w=ás//, phonology: downstepping, reduplication, literally /'place for clubbing (salmon) in the face'/, (semological comment: this name supports the clubbing fish etymology but is only reported by EL and no-one else), dialects: *Cheh.*, attested by EL.

<kw'ekw'xwós>, cts //C₁ə-k'x^w=ás//, WETH ['hailing (weather)'], (<R5-> continuative), phonology: reduplication, syntactic analysis: intransitive verb, attested by EB 3/11/76.

<skw'ekw'xwós>, dnom //s=C₁ə-k'x^w=ás//, WETH ['the hail'], (<s=> nominalizer), phonology: reduplication, syntactic analysis: nominal, attested by EB, BJ (5/64, 12/5/64), also

<kw'ekw'xwós>, //C₁ə=k'x^w=ás//, attested by Elders Group 3/15/72, EB.

<kw'íkw'xwòs>, dmn //C₁í=k'x^w=ás//, WETH ['hail when it comes in sheets'], literally /'little hail/, (<R4=> diminutive), phonology: reduplication, downstepping, syntactic analysis: nominal, perhaps intransitive verb, attested by Elders Group 3/15/72.

L

<1 ~ -1 ~ -el>, free root //l ~ -l ~ -əl//, [l (syllabic) ~ -l ~ -l ~ -əl ~ -əl], PRON ['my'], phonology: l occurs sentence initial, -l occurs after stressed vowel or (in fast speech) after a consonant, and -el occurs in slower speech after a consonant, -l occurs after alveolars or palatals, -əl occurs after labialized consonants, -əl occurs in free variation in those locations and occurs elsewhere, syntactic analysis: possessive pronoun affix, syntactic comment: occurs before a head nominal or suffixed to the word immediately before it, even between an adjective and the nominal it modifies, more often found suffixed to the demonstrative article before the nominal, attested by Deming, Elders Group, AC, others, also <n ~ -n>, //n ~ -n//, dialects: *Matsqui*, attested by AH, example: <siyám l siyáye>, //s=iy=ém l si=yéyə//, /'my dear friends'/, attested by Deming, <ts'áts'eltsel xwoyíwel tel sqwálewel kw'els me xwe'í sq'ó talhlúwep (éy l sí:yáye, l sí:yáye sí:yám)>, //c'éc'əl-c-əl x^w=ε[=Aa=]y=íwəl tə-l s=q'él=əwəl k^wə-l-s mə x^wə=ʔí s=q'á tε=tlúwəp (ʔéy l si[= ']=yéyə, l si[= ']=yéyə s=i[= ']=y=ém)//, /'I'm very happy to come here at this gathering (my good friends, my dear friends).'/, attested by Deming, <talhwélep l siyáye>, //tε=tlúwəp l si=yéyə//, /'you people my friends'/, attested by Deming, <lemlémetchxw mékw' ye tskwí:m l á:wkw'>, //C₁əC₂-lém=əT-c-x^w mək^w yə c=k'í-m l ʔé·wk^w//, /'Fold all my red clothes.'/, literally /'mild imperative fold them many all the (plural, human?) red my belongings.'/, syntactic comment: note that mékw' all precedes the article, that the article which is normally only human plural is used with inanimate objects, that the pronoun occurs between the adjective tskwí:m *be red* and the nominal á:wkw' *belongings*, attested by Elders Group, <lemlémetchxw mékw' yel á:wkw'>, //C₁əC₂-lém=əT-c-x^w mək^w yə-l ʔé·wk^w//, /'Fold all my clothes.'/, attested by Elders Group, <l stl'í>, //l s=é'í//, /'I want, my want'/, <n stl'í ten yóseqw>, //n s=é'í tə-n yás=əq//, /'I want my hat.'/, dialects: *Matsqui*, attested by AH.

<=l>, da //l//, TIB /'non-control transitivizer, accidentally, happen to, manage to do to s-o/s-th'/, comment: this suffix could also be shown as <=lexw> (/ləx^w/), cognate with Musqueam and Cowichan dialects /nəx^w/ (as in work of Suttles, Hukari, etc.), however -exw can just as well be segmented as *third person object* here and from <=stexw> (/sT-əx^w/, leaving //sT// *causative control transitivizer*), besides setting up object suffixes for all persons this also eliminates the need for a rule deleting the <exw> in all other persons (though such a rule may be historically motivated, it is synchronically uneconomical and unmotivated), syntactic analysis: derivational suffix; found in <kw'étslexwtsel.>, //k^wéts=l-əx^w-c-əl//, /'I see him/her/it/them.'/, <héqwlòxes.>, //hék^w=l-áx^y-əs//, /'It smelled me.'/, <kw'etslólétsel.>, //k^wéc=l-álə-c-əl//, /'I see you folks.'/, example: <líchxw slhéq'el:àx?>, //lí-c-x^w s=tlé=q'él=láx^y//, /'Do you know me?'/ and many more elsewhere in this work.

<la>, free root //lε//, TVMO /'go, go to, going, going to, (go somewhere else to do the action), going to (in future)'/, syntactic analysis: auxiliary verb, preposition/prepositional verb, syntactic comment: like another auxiliary, mi (come), la uses a special imperative -lh (see examples below), rather than -lha, attested by AC, EB, ASM ['go'], <lí welh la áyel>, //lí wəʔ lε ʔéy=əl//, /'Has he gone away?'/, attested by AC, example: <latst álhtel>, //lε-c-t ʔéʔtəl//, /'Let's go and eat.'/, attested by AC, <lalh (átl'qel, kwetxwílem, t'ó:kw', tl'epíl lám te qó:, áyel, áyeles te qó:, má:yt)>, //lε-ʔ (ʔé'q=əl, k^wətεx^w=íl=əm, t'á·k^w, é'əp=íl lε=m tə qá·, ʔéy=əl, ʔéy=əl=əs tə qá·, mē·y=T)//, /'Go (outside, inside, home, down to the water, away, away from the water, and help him). (imperative)'/, attested by AC, contrast <lámthl tl'epíl lám te qó:>, //lε=m-tʔ é'əp=íl lε=m tə qá·//, /'Go down to the water.'/, attested by AC, <lí welás mílha>, //lí wə-lé-s míʔε//, /'Is it when they go spirit-dance?'/, attested by AC, ASM ['go to'], <le kwetxwílem te spá:th la te láléms>, //lε kwətεx^w=íl=əm tə s=pé·è lε tə

lélém-s//, /'The bear goes into his den./, literally /'past 3rdperson get oneself inside the bear go in the his house/, syntactic comment: la functions as preposition/prepositional verb here, attested by EB, <la kwe sle'óthels te xó:t̥sa>, //lɛ kʷə s=ləʔɛ=áè=əl-s tə ɣá:cɛ//, /'He went across the lake./, literally /'(he) go to the (remote) nominal=across=edge=get-of the lake/, *<sle'óthels te stó:lô> across the river rejected by EB, syntactic comment: la is preposition/prepositional verb here, <íhtsel la q'íq kw'els e só:les.>, //ʔí-ʔ-c-əl lɛ q'íq kʷə-l-s ʔə sá:l=əs//, /'I went to jail when I was drunk./, literally /'I past go to get apprehended when/that I just be drunk/, attested by Elders Group, ASM ['going'], <latsel (xwehíwel, xwewqw'éyem)>, //lɛ-c-əl (xʷə=híw=əl, xʷə=wqʷ=íl=əm)//, /'I'm going (upstream, downstream)/, attested by AC, <latsel t'ó:kw' (wets'ímeles te Christmas, t'ókwsesó:kw' kwthel tále)>, //lɛ-c-əl t'á-kʷ (wə-c'ím=əl-əs tə krísməs, ɛ'a=kʷ-s-əs ʔó-kʷ kʷ=è-əl télə)//, /'I'm going home ((when it is) near Christmas, because my money ran out (run out))/, attested by AC, <la xwehíwel yithá>, //lɛ xʷə=híw=əl yi=èé//, /'They (those people) are going upstream./, attested by AC, ASM ['going to (displacement and/or future)(immediate future is unmarked, like present tense)'], <latsel (xwóyeqwem, lá:ts'ewtxwem)>, //lɛ-c-əl (xʷáy=əqʷ=əm, lé-c'=əwtxʷ=əm)//, /'I'm going to (wash my head, drop in [visit])/, attested by AC, contrast <lámtsel lá:ts'ewtxwem>, //lé=m-c-əl lé-c'=əwtxʷ=əm//, /'I'm going to drop in./, attested by AC, <lachxw xwehíwel>, //lɛ-c-xʷ xʷə=híw=əl//, /'You're going upstream./, literally /'you are going to go upstream./, attested by AC, ASM ['going to (future), will go and (do s-th)'], <latsel t'ókʷ wáy:élés>, //lɛ-c-əl t'ákʷ wéy.əl=és//, /'I'll go home tomorrow./, attested by AC, <(latsel, lámtsel) máythòme>, //lɛ-c-əl, lé=m-c-əl) méy=T-ámə//, /'I'll go and help you./, attested by AC.

<ley ~ lay>, df //lɛ=y <lɛ + yə-//, TVMO /'go travelling by way of, go via/, (<ye-> travelling by way of), phonology: the prefix combines phonologically with the preposed auxiliary and is no longer phonetically prefixed, syntactic comment: auxiliary verb, attested by Elders Group, others, example: <ley lhe'á kw'e Sq'éwlets ~ lay lhe'á kw'e Sq'éwlets>, //lɛ=y ʔəʔé kʷə s=q'əw=ləc//, /'He went via Scowlitz./, literally /'he went travelling by way of through Scowlitz./.

<lám>, mdls //lé=m//, TVMO /'go, go to, going, going to, go(ing) to (in future), be gone/, syntactic analysis: auxiliary verb, intransitive verb, preposition/prepositional verb, syntactic comment: a preposition/prepositional verb requires a following nominal phrase as its object and can be added right after another verb phrase without any subordinating conjunction, attested by AC, Elders Group, Deming, etc., ASM ['go'], example: <tsel lám.>, //c-əl lé=m//, /'I went./, syntactic analysis: ambiguous past, attested by AC, <tsel lám tseláqelhelh.>, //c-əl lé=m cəléq=əʔ=əʔ//, /'I went yesterday./, syntactic analysis: ambiguous past, attested by AC, <tsel lám kw'e látelh.>, //c-əl lé=m kʷə lét=əl//, /'I went early this morning./, attested by EB, <lhíl lám>, //ʔí-l lé=m//, /'when I go/, attested by Elders Group, <lhíl ulh lám t'ókʷ>, //ʔí-l ʔu=wʔ lé=m t'ákʷ//, /'it's time for me to go home., when I'm going home (already)/, attested by Elders Group, <ewá:lhtsel (l)í:l lám>, //ʔəwə=éʔ-c-əl lí-l (~ ʔí-l) lé=m//, /'I wasn't going to go (but did)/, Elder's comment: "possibly", attested by EB, <lámtselcha látelh(es) wáyélés>, //lé=m-c-əl-cɛ lét=əʔ(-əs) wéy.əl-és//, /'I'll go early tomorrow morning. M

- <ma>, free root //mè//, EFAM /'(meaning uncertain), (perhaps right, correct)/, syntactic analysis: particle?, attested by Elders Group, example: <lí mà?>, //lí mē//, /'Is that right?/, attested by Elders Group, Salish cognate: perhaps Nooksack /mæ/ /'(meaning uncertain), (perhaps then, until)/.
- <amá ~ má'->, free root //mê ~ mē?//, MC ['come off'], ANA, phonology: allomorph má' before vowels, syntactic analysis: intransitive verb, attested by Elders Group, example: <lí mà?>, //lí mē//, /'Did it come off?/, phonology: downstepping, attested by Elders Group, <me má te yélés.>, //mə mē tə yélés//, /'The tooth came out./, attested by EB,
- <ma'álésem>, mdls //mε? = élés = əm or mē? = ə[=M2 =]lós = əm//, [mæ?élism], ABDF /'pulled out (of tooth or teeth), (have one's tooth pulled out)/, lx <=élés ~ =elís> tooth, teeth, on the tooth/teeth, (<=em> middle voice), phonology: assimilation of the first vowel of the suffix (<é>) to the final vowel of the root (<á>), glottal-stop insertion after vowel-final root; another explanation of the first stressed vowel could be metathesis (that is, //mē? = ə[=M2 =]lós = əm//) which would account for the stress-shift from the root to the first syllable of a suffix which seldom (if ever) allows stress on the first syllable (only on the second) and which is not attested elsewhere with an initial <a> /ε/ vowel; or instead of processes one could say that <má> has allomorph <má'> before vowels (vowel-initial suffixes); a fourth possibility is that the root allomorph here is <ma'á> with an echo-vowel; historically the glottal stop is probably present in the root and lost except before vowels, syntactic analysis: intransitive verb.
- <ma'éléstem>, pcs //mε? = əléc(ə) = T-ə m//, ABDF /'castrated, he was castrated/, lx <=elétsel ~ =átsel> on the testicles, (<=t> purposeful control transitivizer), (<=em> passive), phonology: consonant-loss and vowel-loss of final <el> in any suffix or root by regular rule before <=(e)t> transitivizer and several other suffixes, syntactic analysis: transitive verb in passive > intransitive verb, attested by DF (on Banff trip 8/30/78), Salish cognate: Musqueam /-əlécəŋ ~ -élécəŋ ~ -écəŋ/ testicles (Suttles ca1984:14.5.68).
- <xwemá>, incs //x^wə = mē//, MC ['open'], semantic environment ['store, business, prob. box, door, etc.'], ECON, BLDG, SOC, (<xwe=> become, get), syntactic analysis: intransitive verb, attested by IHTTC, example: <li xwels xwemá te shxwiymáλέ?>, //li x^wəl-s x^wə = mē tə s = x^wiym = élé//, /'Is the store still open?/, dialects: Chill., attested by OW and AH (Deming).
- <shxwemá>, stvi //s = x^wə = mē//, MC ['it's open'], semantic environment ['box, store, business, building, door'], ECON, BLDG, HHG ['be open (at the top)'], SOC, DESC, (<s=> stative), syntactic analysis: intransitive verb, adjective/adjectival verb?, attested by IHTTC, EB.
- <xwema'à:ls>, sas //x^wə = mε? = è·ls//, BLDG ['open the door'], (<=á:ls ~ =à:ls> structured activity non-continuative), phonology: possible downstepping in the suffix stress if =à:ls is not an allomorph, syntactic analysis: intransitive verb, attested by IHTTV.
- <xwéma'à:ls>, dnom //x^wə = ' = mε? = è·ls//, BLDG ['doorman'], SOCT, (<= ' => nominalizer), phonology: stress-shift, syntactic analysis: nominal, attested by IHTTC.
- <shxwema'ámel>, dnom //s = x^wə = mε? = é m ə l//, HHG ['empty container (like bottles esp. if there's lots)'], (<s=> nominalizer, xwe = become, get), lx <=ámel ~ =ómel ~ =emel> part, portion, member, syntactic analysis: nominal, attested by IHTTC.
- <xwmá:m or lexwmá:m>, df //x^wə = mē(?) = əm or ləx^w = x^wə = mē(?) = əm//, DESC /'open (of a bottle, basket, etc.)/, MC, HHG, (<=em> intransitivizer or middle voice), possibly <lexw=> always or possibly the <le> may be a separate word (past tense third person subject), phonology: the

speaker who gave this word here dropped the glottal-stop even before a vowel which allowed vowel merger, or if the suffix took the form of =m here the glottal stop would either be dropped or converted to length; either way the result would be the same; if there is the lexw= prefix then consonant merger takes place; vowel-loss of the e in xwe= also, syntactic analysis: intransitive verb, attested by CT.

<**shxwemám**>, stvi //s=x^wə=mé=m//, DESC ['be empty'], (<s=> stative, xwe= become, get), (<=m ~ =em> intransitivizer or middle voice), phonology: these speakers here lose the glottal stop without vowel merger, and apparently have =m rather than =em (other derivations show either glottal stop or length from vowel merger) (compare <**shxwema'ám**> an opener, syntactic analysis: adjective/adjectival verb, attested by IHTTC.

<**shxwéma'ám**>, dnom //s=x^wə=´=mεʔ=ə[=Aé=]m//, str, HHG /'an opener, can-opener, bottle-opener'/, ACL, (<á-ablaut> resultative, <=´=> nominalizer), (<=em> intransitivizer), phonology: ablaut, stress-shift, syntactic analysis: nominal, attested by IHTTC.

<**shxwémeqel**>, dnom //s=x^wə=´=mε=qəl//, HHG /'an opener, can-opener, bottle-opener'/, ACL, (<s=> stative or nominalizer), (<=´=> nominalizer), lx <=eqel ~ =qel> container, phonology: stress-shift, vowel-shift (of root vowel to schwa-grade), syntactic analysis: nominal, attested by AD.

<**shxwémeqèyls**>, sas //s=x^wə=´=mε=qə(1)=í:ls//, HHG /'an opener, can-opener, bottle-opener'/, ACL, (<=í:ls> structured activity (nominal?/resultative?)), phonology: stress-shift, downstepping of stress on suffix, consonant-loss of l before -í:l, -í:ls, -(e)t, and some other suffixes, vowel merger, syntactic analysis: nominal, attested by AD.

<**xwemá:qet**>, pcs //x^wə=mé=əqə(1)=əT//, HHG /'take a cover off, take it off (a cover of a container), open it (bottle, box, kettle, book, etc.)'/, (<xwe=> become, get), lx <=eqel> container, (<=et> purposeful control transitivizer), phonology: consonant-loss of l before =et, vowel merger (twice), (if =eqel has allomorph =qel here instead then length would have to be in an allomorph of root má', that is má: before consonants), compare <**xwemá:t**> open it for possible long allomorph also, syntactic analysis: transitive verb, attested by IHTTC, Deming, EB, Elders Group, example: <**xwemá:qet te kw'óxwe**>, //x^wə=mé=·qə(1)=əT tə k^wáx^wə//, /'open a box'/, attested by EB, <**xwemá:qetlha ta' pékw**>, //x^wə=mé=·qə(1)=əT-ʔε t-εʔ pək^w//, /'Open your book.'/, attested by Elders Group, <**xwemá:qet ta (skú:k, lhémkiya)**>, //x^wə=mé=·qə(1)=əT t-ε (s=kú:k, ʔəm=k=iyε)//, /'Open your (cooker, kettle).'/, attested by EB.

<**xwemá:t**>, pcs //x^wə=mé(·)=(ə)T//, MC ['open it'], (<=(e)t> purposeful control transitivizer), phonology: length either comes from vowel merger or from an allomorph of má' (/méʔ// > /mé:/ before consonants (glottal stop historically > length in Upriver Halkomelem before consonant; here the consonant is =t), syntactic analysis: transitive verb, attested by IHTTC.

<**xwemá:x**>, pcis //x^wə=mé=əx^y//, MC /'open it (door, gate, anything)'/, HHG, (<=ex> purposeful control transitivizer inanimate object preferred), phonology: vowel merger, syntactic analysis: transitive verb, dialects: Chill., attested by Deming, also <**xwemáx**>, //x^wə=mé=(ə)x^y//, attested by AC, also <**xwemá'x**>, //x^w(ə)=méʔ=x^y//, dialects: Sumas/Matsqui, attested by Deming (5/20/76), example: <**xwemáx te xálh**>, //x^wə=mé=(ə)x^y tə x^yéʔ//, /'open the door'/, attested by AC.

<**máx**>, pcis //mé=(ə)x^y//, MC /'take it off (of a table example), take it away (from something), take it off (of eyeglasses, of skin off an animal), take s-o off/away (from something), take s-th out (a tooth for ex.)'/, (<=(e)x> purposeful control transitivizer indefinite object preferred), phonology: vowel-loss (in suffix), syntactic analysis: transitive verb, attested by Elders Group, AC, EB, CT, HT, example: <**máx kw'e léts'e**>, //mé=x^y k^wə léc'ə//, /'take one off'/, attested by Elders Group, <**máx ta st'óle'oléstel**>, //mé=x^y t-ε s=t'álə=ʔaləs=tə//, /'Take off your eyeglasses.'/, attested by AC, <le

máxes te yélés.>, //lə mə=xʷ-əs tə yélés//, 'He went (go) to take out the tooth.', attested by EB, <le máxem te yélés.>, //lə mə=xʷ-əm tə yélés//, 'The tooth got taken out.', syntactic analysis: passive of pcis, attested by EB.

<**hámex**>, cts //hē-mɛ=xʷ//, MC ['taking s-th off'], HUNT, (<há-> continuative before resonants), phonology: vowel-reduction to schwa-grade of root after strong-grade stressed prefix, syntactic analysis: transitive verb, attested by EB, CT, HT, example: <**hámex te kw'eléws te sméyeth**>, //hē=mɛ=xʷ tə kʷəl=əws tə s=méyəè//, 'skin(ing) an animal, taking off the skin of an animal', attested by CT, HT.

<**mót'est**>, ANAH ['point at s-th'], see *mót'es*.

<**mót'estel**>, TVMO ['a pointer (a stick)'], see *mót'es*.

<**mót'estses**>, ANAH ['first finger, index finger'], see *mót'es*.

<**mótheqw**> or <**math**>, bound stem //mâè(=)əqʷ// *make/prepare fish oil* or root //mèè// *spread out*.

<**smótheqw**>, df //s=mâè=əqʷ or s=mɛ[=Aá=]è=əqʷ//, FOOD ['prepared fish oil (usually sockeye oil)'], FSH, ASM ['prepared by leaving sockeye heads and parts out in hot sun all day then in rock holes by the river with water and hot rocks; this brings out the oil which floats on top and is skimmed off'], (<s=> *nominalizer*), (<**ó-ablaut (esp. on á)**> *resultative*), lx <=**eqw**> *fish*, probably root <**máth**> *spread out* due to the method of preparing fish oil, phonology: probable ablaut, syntactic analysis: nominal, attested by IHTTC, SP and AK (at Fish Camp 8/2/77).

<**hemhémethew**>, df //C₁əC₂=hə-mâè=əqʷ or C₁əC₂=hə-mɛè=əqʷ//, FSH ['a group making (fish oil)'], FOOD, (<**R3**=> *plural agents*), (<**hé**-> *continuative* before resonants m, l, y, w), probably root <**máth**> *spread out*, lx <=**eqw**> *fish*, compare <**smótheqw**> *prepared fish oil*, phonology: reduplication of the prefix is very unusual, vowel-reduction to weak-grade (schwa-grade) of root after stressed full-grade of prefix, syntactic analysis: intransitive verb, possibly nominal, attested by IHTTC (9/2/77), also ['place where they make *smótheqw* (prepared fish oil)'], comment: prob. corrected by IHTTC (9/2/77), prob. refers to the place name which could be said to mean something like this, attested by SP and AK at Fish Camp (8/2/77).

<**Hemhémethew**>, df //C₁əC₂=hə-mâè=əqʷ or C₁əC₂=hə-mɛè=əqʷ//, PLN ['flat rocks (bedrock) with holes at Hill's Bar where they used to make *smótheqw* (prepared fish oil) from sockeye heads'], ASM ['Hill's Bar is on the east side of the Fraser River, the holes are a foot or more deep and several feet in diameter on average and there are a dozen or more'], literally ['many people making prepared fish oil'], phonology: reduplication, vowel-reduction, syntactic analysis: nominal, attested by SP and AK at Fish Camp (8/2/77), on raft trip (8/30/77), and in Elders Group reviewing raft trip slides (9/13/77), source: place names file reference #140a.

<**mótl'**>, probably root //mâë'//, EFAM ['(be) stumped'], syntactic analysis: adjective/adjectival verb, attested by Elders Group, example: <**mótl' te Hank.**>, //mâë' tə Hank//, ['Hank is stumped']./.

<**mótl'**>, probably root //mâë' ~ mǎë'//, WETH ['be dirty'], DESC, ASM ['(blowing dirt or dust?)'], syntactic analysis: adjective/adjectival verb, probably borrowed from Squamish /mâë'/ *be dirty*, comment: since *chmítl'* shows the Halkomelem root is *métl'* (as in one Squamish alternant) and since Halkomelem would have inherited *mátl'*, not *mótl'*, corresponding to the Squamish form /mâë'/. example: <**mótl' te swáyel.**>, //mâë' tə s=wéyəl//, ['It's a dirty day.'], Salish cognate: Squamish root /mâë' ~ mǎë'/ *be dirty* as in /mǎë'/ *get stained, get dirty* and /mâë'-n/ *make dirty (tr.)* W73:79,250, K69:45.

<**chmítl'**>, strs //c=mə[=Aí=]ë'//, BLDG ['(be) dirty'], DESC, (<**ch**=> *have, be*), (<**í-ablaut**> *resultative*), phonology: í-ablaut is the expected *resultative* on roots with e (schwa), syntactic analysis: adjective/adjectival verb, attested by EB (12/1/75), Salish cognate: Lushootseed /bîë' -il-dup/ *muddy, dirt* (derived from root /bîë'(i)/ *smash, crush* by Hess, H76:36-37 but may be a separate (or related) root as here and in Squamish, more cognates would be helpful.

<**móylhtel**>, SOC ['help out, go help, pitch in, help one another'], see *máy*.

<**mó:yt**>, pcs //má:y=T//, ABFC ['aim it'], (semological comment: not clear whether it also is a member of domains of HUNT, FSH, GAM, CAN, etc.), (<=**t**> *purposeful control transitivizer*), syntactic analysis: transitive verb, attested by EB, AD.

<**momí:yt**>, df //ma[-C₁ə-˘]y=T//, ABFC ['aiming it'], comment: one would expect *mómiyt* /má[-mə-]yt/ as a more regular continuative, (irregular)stress-shift onto infix reduplication, phonology: reduplication, irregular stress-shift, syntactic analysis: transitive verb, attested by EB (4/12/78).

<**môkweset**>, ABDF ['kiss s-o'], see mékw.

<**môkw'éthet**>, ABFC /'(take all of themselves, pick themselves all up)'/, see mékw' ~ môkw'.

<**môs**>, bound root //mós four//.

<**smôs**>, df //s=mós=s//, TIME ['Thursday (a less common name)'], lx <s=...=s> -th day, hour, phonology: consonant merger, syntactic analysis: nominal, attested by AD and SP (both in BHTTC 11/9/76), usage: AD's parents and SP's father and stepmother used this form.

<**môxwoya ~ môxweya ~ méxweya**>, df //móx^w=ayε ~ móx^w=əyε ~ məx^w=əyε//, ANA /'belly-button, navel'/, root meaning unknown, lx <=oya ~ =eya ~ =iya> affectionate diminutive, syntactic analysis: nominal, noun, attested by AC, BHTTC, others, other sources: ES /móx^wəyε/ navel, Salish cognate: Squamish /móx^w-ya/ navel (and /s-məx^w-íws/ small-pox) from root /móx^w/ dimple, mark (?) W73:183, K67:255, Mainland Comox /móx^wáju/ belly-button B75prelim:27, Sechelt /məx^wəyu/ belly-button T77:14, Samish dial. of N. Straits /móx^wəye?/ belly-button, navel G86:74, example: <**Híltu te môxwoya**>, //híltu tə móx^w=ayε//, /'The belly-button is a Hindu.'/, comment: comparison between the concentric wrapping of the turban and the concentric rings in some navels, usage: in the Híltu or Heel-toe song (sung to "Jimmy Crack Corn"), attested by BHTTC.

<**mímxwoya**>, dmn //C₁í=məx^w=ayε//, ANA ['little belly-button'], (<R4=> diminutive), phonology: reduplication, syntactic analysis: nominal, attested by BHTTC, example: <**Híheltu te mímxwoya**>, //C₁í=həltu tə C₁í=məx^w=ayε//, /'A little belly button is like a little Hindu.'/, usage: in the Híltu or Heel-toe song, attested by BHTTC.

<**múmesmes**>, EZ ['small adult cow'], see músmes.

<**músmes**>, free root //músməs//, EZ /'cow, bull, beef'/, ['genus Bovis'], FOOD ['beef'], ACL, phonology: reduplication from the donor language, thus further reduplicating in derivations is tolerated, syntactic analysis: nominal, noun, attested by AC, Elders Group, Deming, EB, others, borrowed from Chinook Jargon <moos-moos> /músmus/ cow, horned cattle, beef, buffalo itself variously from Chinook Proper, Klickitat, Yakima or Cree Johnson 1978:287, example: <**te ts'q'éyx músmes**>, //tə c[']=q[']íx músməs//, /'the black cow'/, attested by EB, <**p'ip'eth'élmet te músmes**>, //p[']i[-C₁ə-]è[']=ól məx^w=əT tə músməs//, /'milking the cow'/, literally /'squeezing s-th/s-o on the breasts the cow'/, attested by Elders at Fish Camp (7/19/78).

<**múmesmes**>, dmn //mú[=C₁ə=]sməs//, EZ ['small adult cow'], (<R1=> diminutive), phonology: double reduplication tolerated because the original reduplication was borrowed and not native, syntactic analysis: nominal, attested by IHTTC.

<**melúmesmes**>, dmpn //m[=əl=]ú[=C₁ə=]sməs//, EZ /'small adult cows, (small adult cattle)'/, (<=el=> plural), phonology: non-reduplicative infix, reduplication, syntactic analysis: nominal, attested by IHTTC (7/15/77).

<**músmesò:llh**>, dmn //músməs=á:lʰ//, EZ ['calf'], lx <=ó:llh> offspring, young, phonology: downstepping, syntactic analysis: nominal, attested by AC, CT, HT.

<**músmesò:llh**>, EZ ['calf'], see músmes.

N

<n>, comment: The sound /n/ appears only in borrowings, a few words of baby talk, and some very old place names. The place names may have been obtained by George Gibbs ca 1858-1863 through speakers of Downriver Halkomelem (thus Tzeachten and perhaps Skulkayn for places which all fluent Upriver speakers pronounce Ch'iyáqtel /è'yíéq=təl/ and Sq'ewqéyl /s=q'əw=qíl/), comment: Historically all Upriver Halkomelem n → l. It is so far not clear how recent that change was. There is a slight chance that it was still incomplete when Gibbs was gathering his information and that some of his Chilliwack and Tait word lists and place names may reflect real Upriver Halkomelem n's., comment: Until more work on comparative Halkomelem is done and records on Gibb's informants/speakers in the National Archives can be studied, the best guess is probably that Gibbs had a downriver speaker for some of the forms (possibly one from the Kwantlen dialect of Fort Langley). Words in baby talk are known to often tolerate sounds which are not phonemic in adult language. That seems the reason for the forms here..

<nána>, possibly root //nénε or R7=nε//, [nánæ], EFAM /'hurt, sore', ABDF, possibly <R7=> diminutive? or> meaning uncertain, possibly compare with <lá:la> Well!, phonology: possible reduplication, syntactic analysis: nominal?, intransitive verb?, usage: baby language, attested by AD, Elders Group (2/13/80), TG, example: <Where's your nána?>, //Where's your nénε//, /'Where's your hurt?, Where's your sore?/, usage: language switching, attested by TG.

<naníth>, possible root or stem, bound //nεní(=)èè or /nε(=)níè// root meaning unknown

<Snaníth>, df //s=nεníè//, PLN ['a village at the south end of former Sumas Lake on the mountain'], literally /'on the other side of the lake/, possibly <s=> stative or nominalizer, possibly <=eth> edge, possibly root <lóli(y)> be leaning, comment: this may have been the village with houses built out over the water on stilts for protection from mosquitoes (described by Boundary Survey records), in which case a meaning of "leaning on the edge" might be appropriate; the literal meaning given above ("on the other side of the lake") is provided by the Elders Group, phonology: possible reduplication, syntactic analysis: nominal, dialects: Sumas (thus the n's and the th - ts variation), attested by Elders Group (8/31/77), other sources: Wells 1965 (1st ed.):23 <nah-NEETS> in records as Saneats also, Wells 1966, source: place names reference file #258.

<Nesókwech ~ Nasókwach>, df //nə=sák^w=əc or nə=sák^w=əc//, PLN ['Middle Creek'], possibly <le= ~ lexw= (downriver ne= ~ nexw=)> always, possibly <=ech> on the back, possibly root <sókw'> inner cedar bark, possibly compare <Sókw'ech> a creek between Hope and Yale, syntactic analysis: nominal, source: Wells 1965 (1st ed.):13 <neh-SAK-wach.ch> , Wells 1966 <ne-SA-kwach>, also <Lóyeqw'e'áts or Lóyaqwe'áts' or Lóyaqwe'áth'>, df //láyə=q^wəʔéç or láyə=q^wəʔé·c' or láyə=q^wəʔéè'//, PLN ['Middle Creek'], possibly <lóye> only, possibly root <qw'e'á:ts> little sucker-fish with big salmon-like mouth (prob. the largescale sucker, Catostomus macrocheilus), syntactic analysis: nominal, source: Wells 1965 (1st ed.):13 <LIY-ah-quh-'AHT'z> from map by Billy Sepass where it is spelled <Lyaquaatz>.

O
