Background

- CARB's Tractor-Trailer GHG regulation
 - Requires aerodynamic technologies and low-rolling resistance tires on 53-foot or longer box-type trailers traveling in California.
 - Does not apply to other trailer types.
- CARB is considering to expand the regulation to include other trailer types.
 - Container chassis
 - Flatbed
 - Tanker
 - Curtainside

Study Objectives

- Collect real-world activity data from heavy-duty tractors hauling specific trailer types in California.
 - Container chassis, flatbed, tanker
- Evaluate potential GHG (and fuel saving) benefits from aerodynamic technologies
 - Annual mileage
 - Fraction of vehicle miles traveled (VMT) at speeds greater than 45 mph

Source: National Research Council, 2010

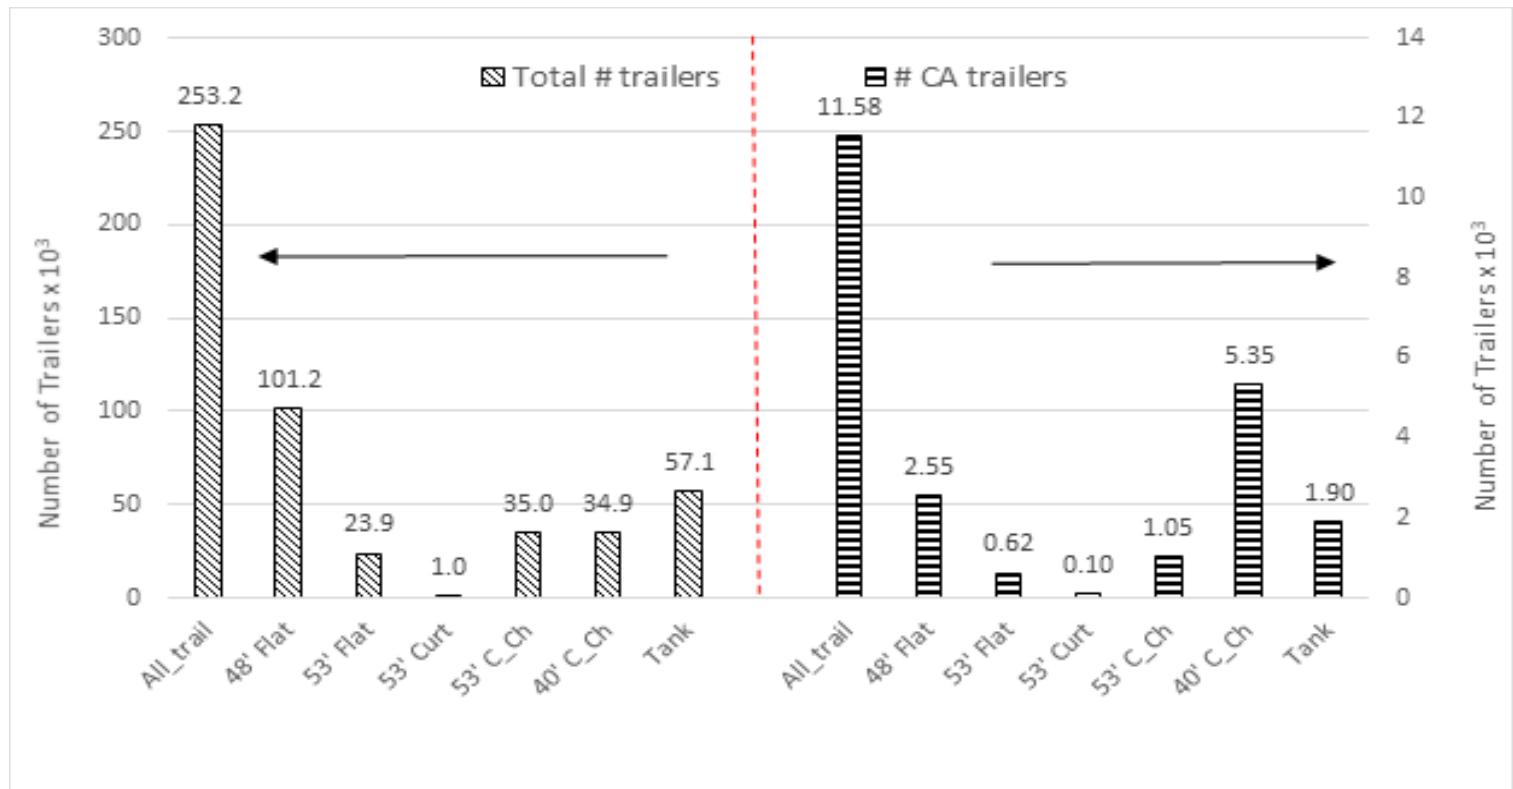

Scope of Study

- Evaluate a trailer registration database.
 - IHS registration database 2000-2015
 - Container chassis, flatbed, tanker, and curtainsides
- Fleet survey for fleets with registered trailers of interest.
 - # of different types of trailers, the applications and types of loads these trailers carry, and how these trailers are typically used
- Collect activity data from trucks that haul trailers of interest.

Trailer Registration Database I

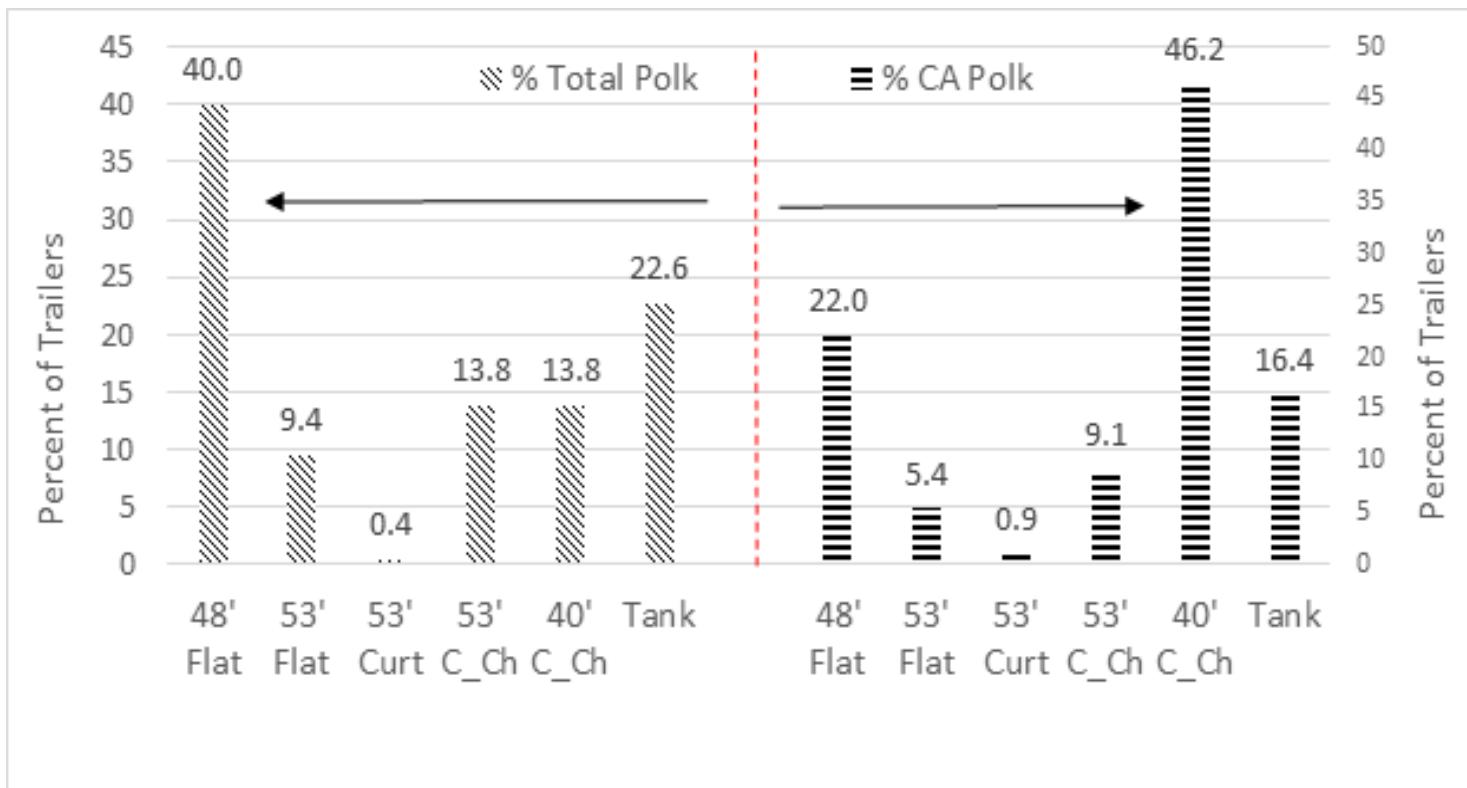

- 253,000 records IHS trailer registration database for 2000-2015 in the U.S.
- 11,575 trailers registered in California.

Trailer Registration Database II

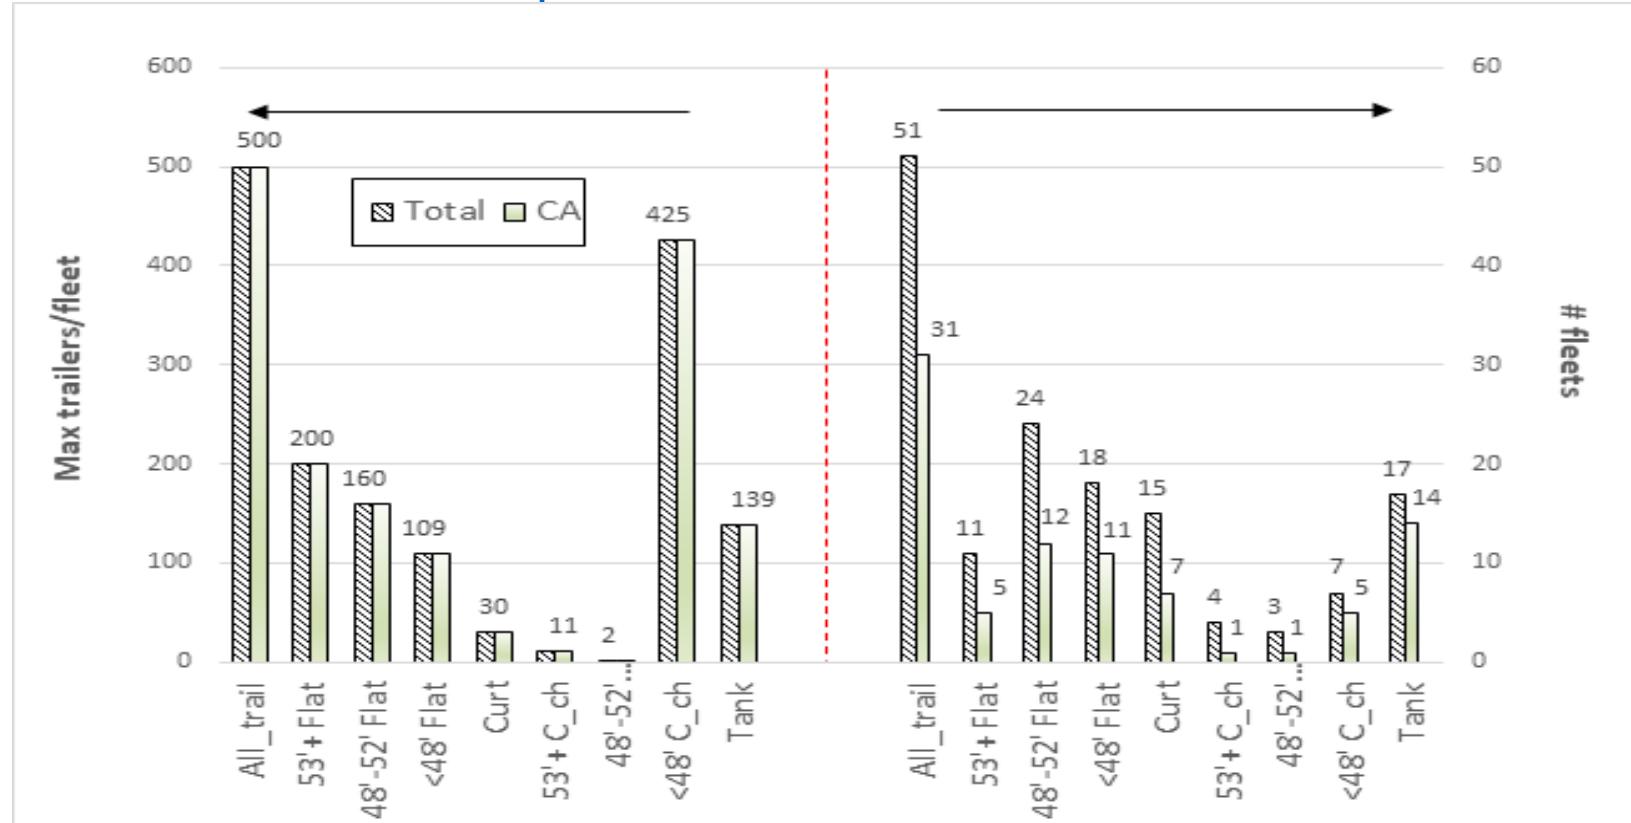

- California had a higher fraction of container chassis.
- Flatbeds and tankers also had appreciable populations.
- Only 103 curtainsides registered in California

Fleet Survey Results I

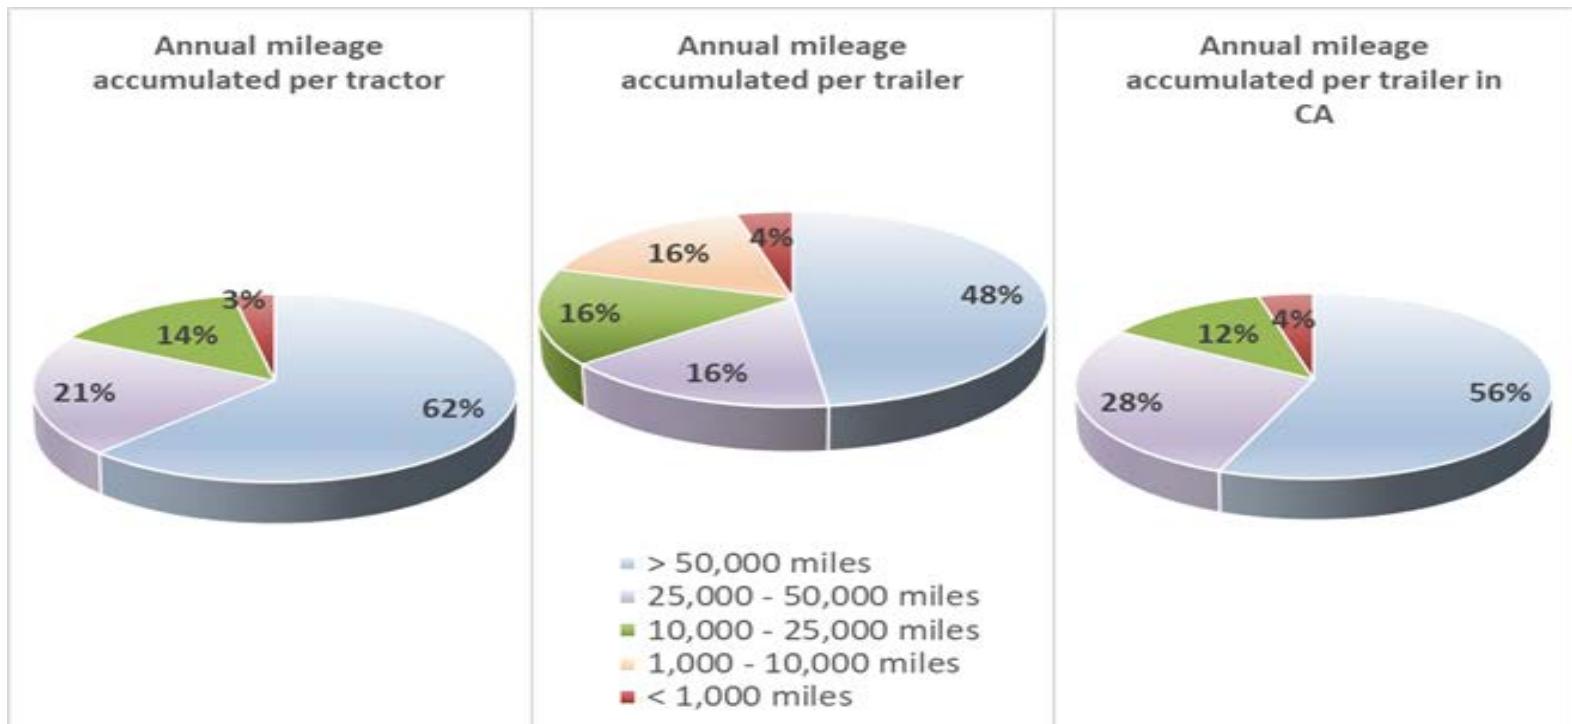

- Sent out 6,000 trailer surveys plus phone calls
 - Mostly from the IHS database
 - Received 59 responses, 51 of which owned trailers of interest.

Fleet Survey Results II

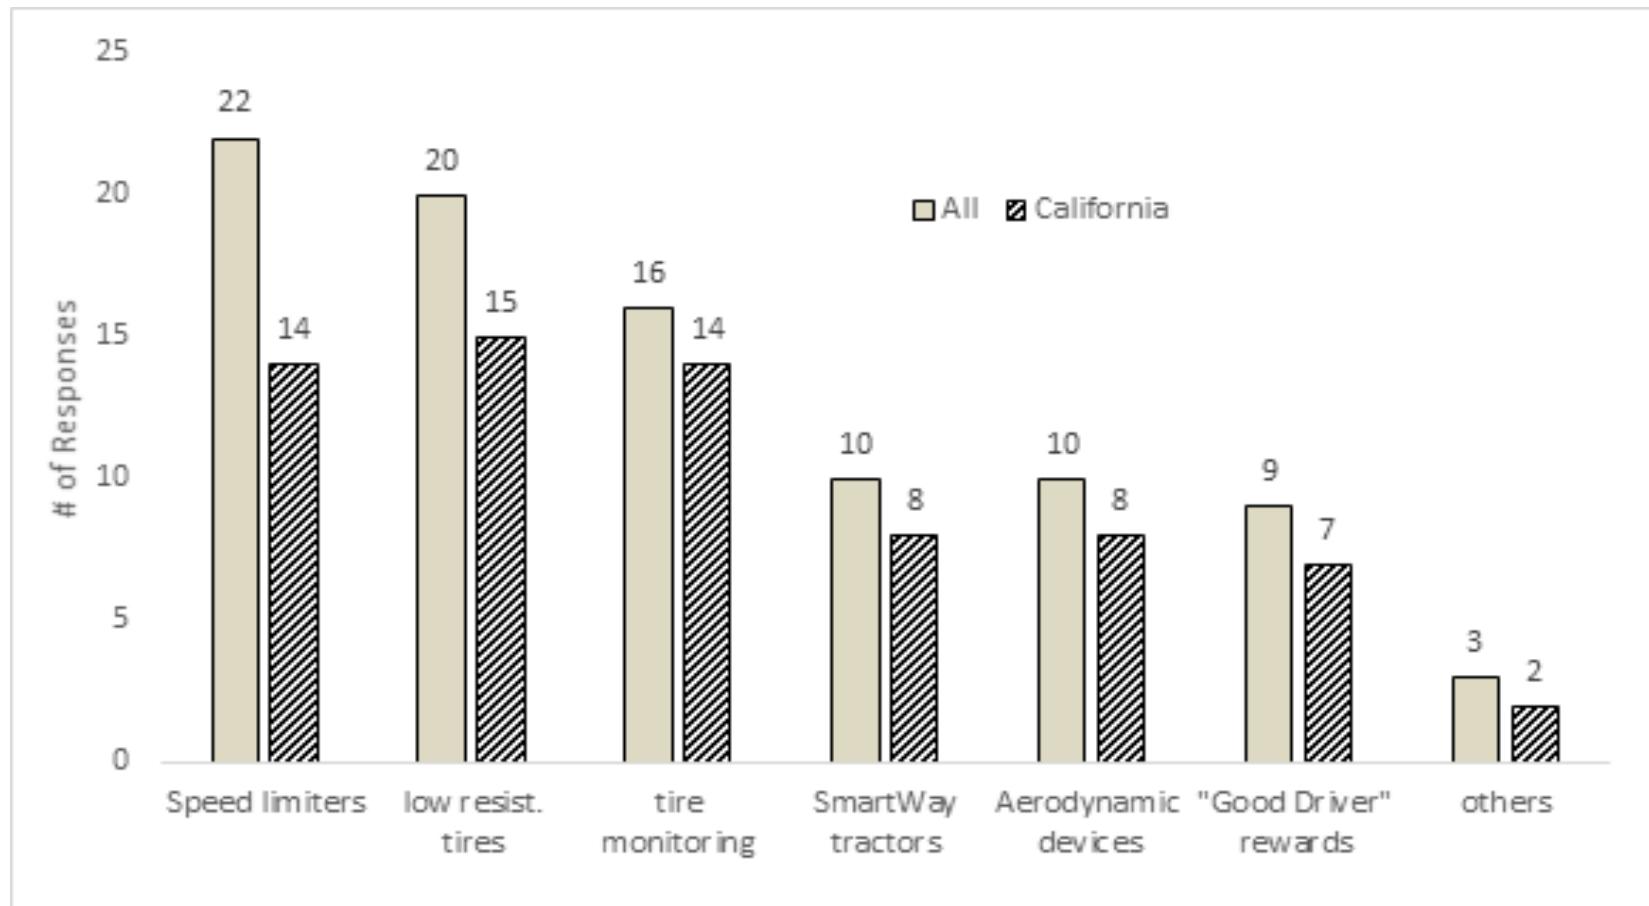

- Majority of fleets used trailers for more than 25,000 miles per year
 - Majority (56%) of CA fleets had ave. trailer mileages >50,000 miles.
 - 84% of trailers in CA had mileages >25,000.

Fleet Survey Results III

- Many (81%) of California fleets already using fuel saving device or are in fuel savings program

Activity Data Collection

- Real-world vehicle and engine activity data from 153 tractor-trailers for a minimum of one month each.
 - GPS & ECU data loggers
 - 1 Hz data frequency
 - 170+ engine parameters
- Vehicle and engine information
 - Vehicle make, model, year
 - Engine make, model, year
 - Emission control equipment
 - GVWR
 - Odometer
 - Etc.

Vehicle Samples

No.	Trailer Type	Primary Revenue Service	Location	Code Name ^b	Number of Vehicles	
					Installed	Completed
1	Container Chassis	Goods Movement	Northern California	CC-NC-1	4	4
2	Container Chassis	Goods Movement	Northern California	CC-NC-2	20	14
3	Container Chassis	Goods Movement	Southern California	CC-SC-1	44	43
4	Container Chassis	Refuse Transfer	Southern California	CC-SC-2	11	11
<i>Container Chassis subtotal</i>					79	72
5 ^a	Flatbed	Agricultural Products	Central Valley	FB-CV-1	65	65
6	Flatbed	Construction Materials	Southern California	FB-SC-1	4	4
<i>Flatbed subtotal</i>					69	69
7	Tanker	Petroleum Fuels	Northern California	TK-NC-1	6	6
8	Tanker	Dairy Products	Central Valley	TK-CV-1	8	6
<i>Tanker subtotal</i>					14	12
Grand Total					162	153

^aData for this fleet is from a commercial source.

^bCC = container chassis; FB = flatbed; TK = tanker

NC = Northern California; SC = Southern California; CV = Central Valley

Example Vehicles

Container Chassis - NoCal

Flatbed - Central Valley

Tanker - NoCal

Container Chassis - SoCal

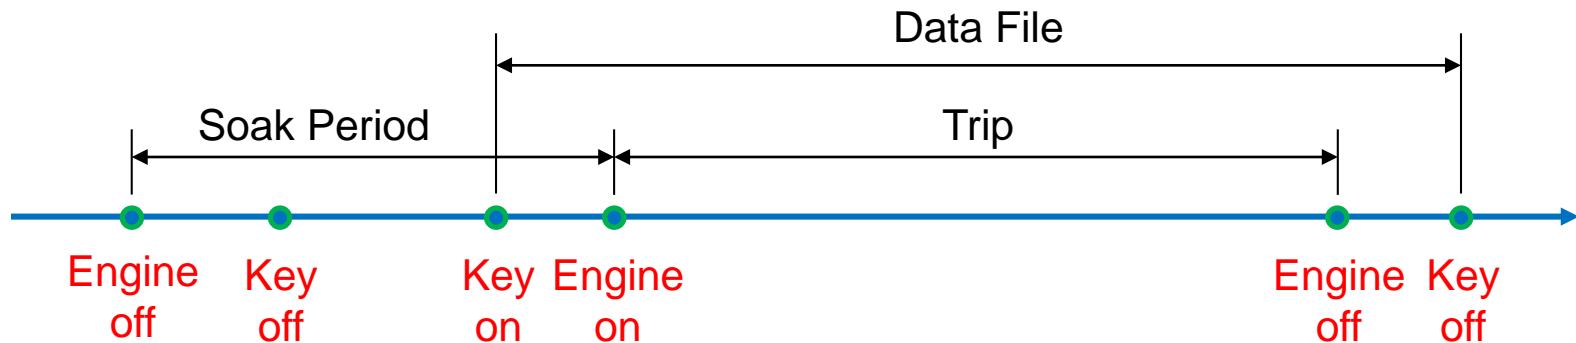

Flatbed - SoCal

Tanker – Central Valley

Trip Identification

- A data file:
 - Is created when the key is switched on, powering up the logger.
 - Is ended when the key is switched off, powering down the logger.
 - Has no trip if key on is followed by key off.
 - Has multiple trips if engine off is followed by engine on.
- Engine on when RPM > 300
- Idle trip → trip speed < 5 mph and trip distance < 5 miles
 - Idle trips are between 25 and 74% of trips depending on fleet

Container Chassis

Distribution of VMT by speed and time of day

- 72 vehicles
- 433,946 miles
- 4,487 vehicle-days
- Projected annual mileage per vehicle = 35,000 miles
- Fraction of VMT faster than 45 mph = 65%

Sum	100																		100	

Container Chassis Fleet CC-NC-2

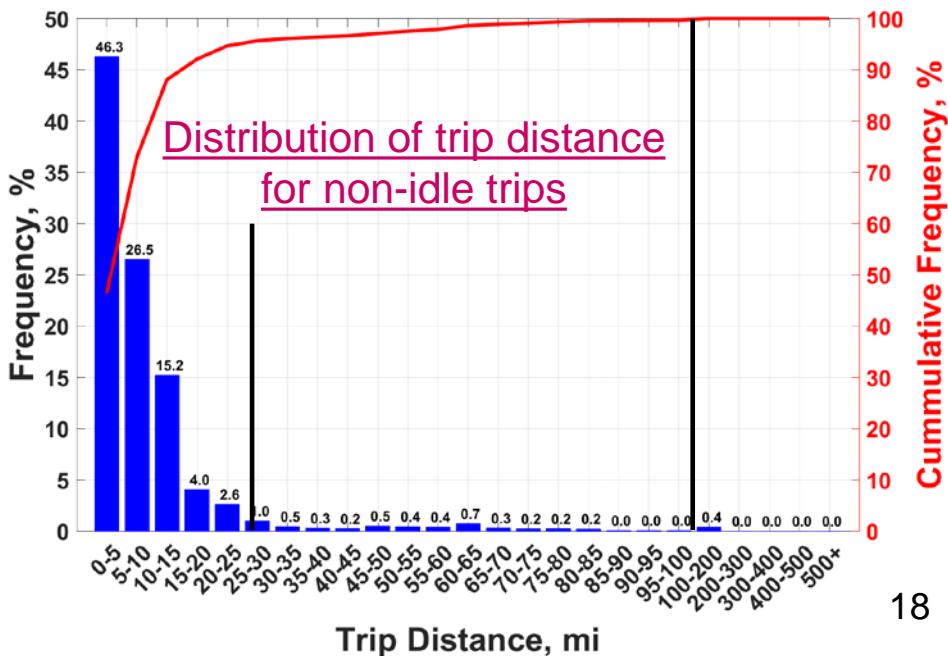

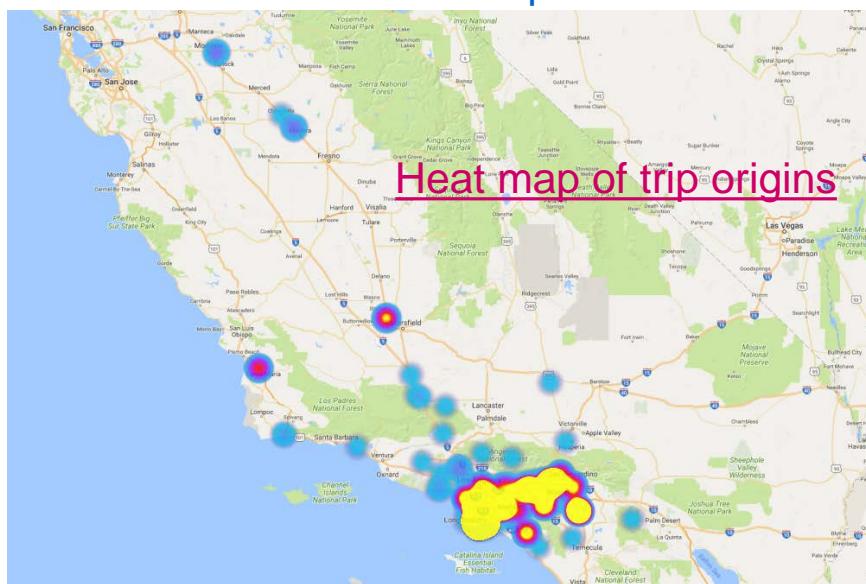

- Primarily long-distance haul
 - Services Port of Oakland, Greater Sacramento region, and locations in Nevada
- 75% of all trips were non-idle trips.
 - 40% of these were shorter than 25 miles.
 - 40% of these were longer than 100 mile
 - 91% of VMT >45 mph

Container Chassis Fleet CC-SC-1

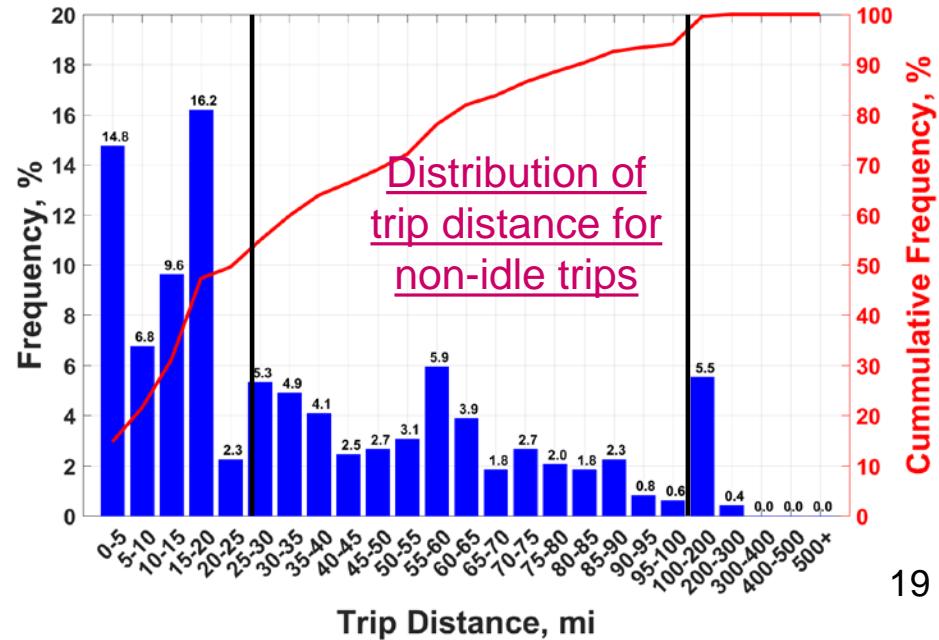

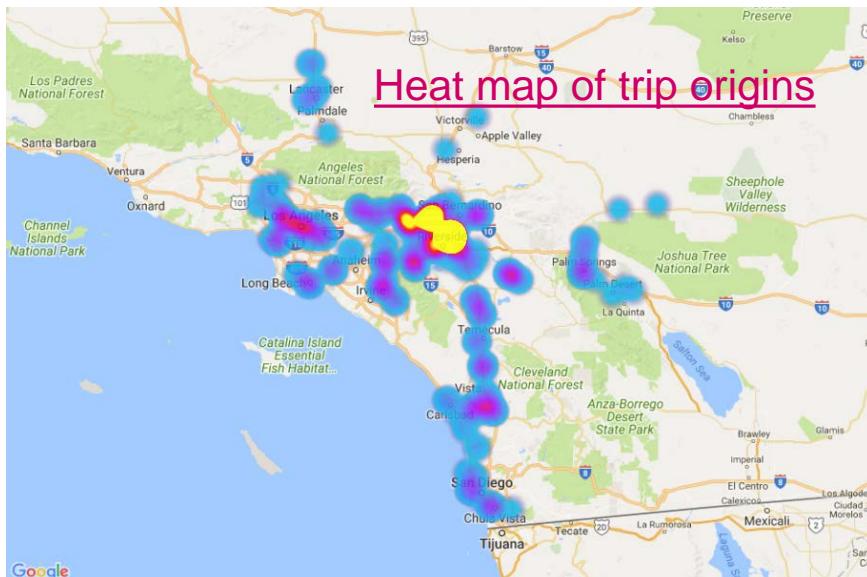

- Primarily drayage operation
 - Services San Pedro port complex, Greater L.A. Metro area, and Inland Empire area
- 52% of all trips were non-idle trips.
 - 88% of these were shorter than 25 miles.
 - 1% of these were longer than 100 miles
 - 42% of VMT > 45 mph.

Flatbed Trailer Fleet FB-SC-1

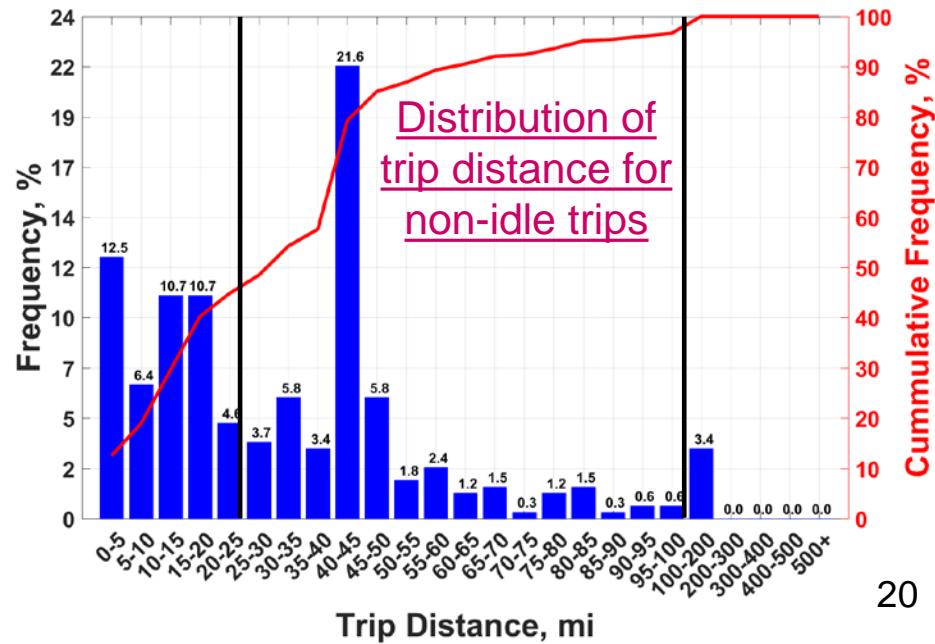

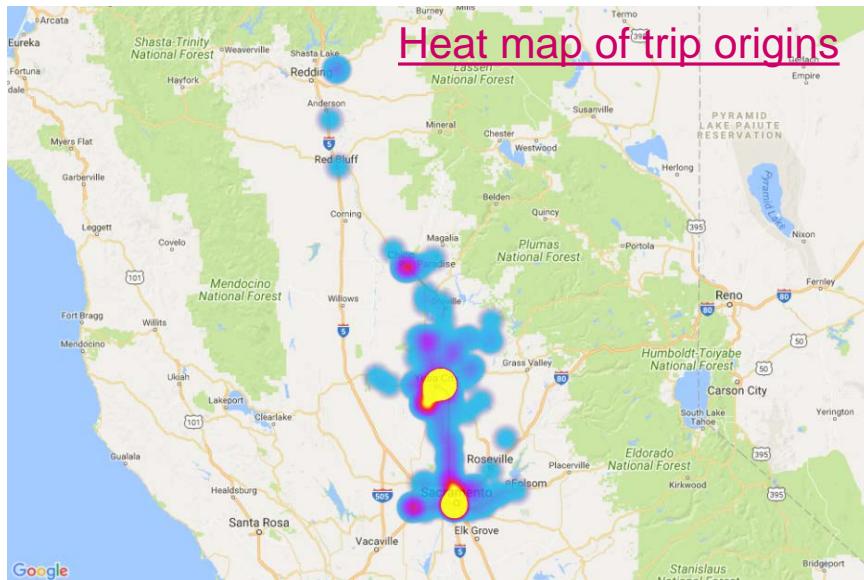

- Primarily short and regional haul
 - Services Inland Empire area, Greater L.A. Metro area, and San Diego County
- 44% of all trips were non-idle trips.
 - 48% of these were shorter than 25 miles.
 - 6% of these were longer than 100 miles.
 - 76% of VMT > 45 mph.

Tanker Trailer Fleet TK-NC-1

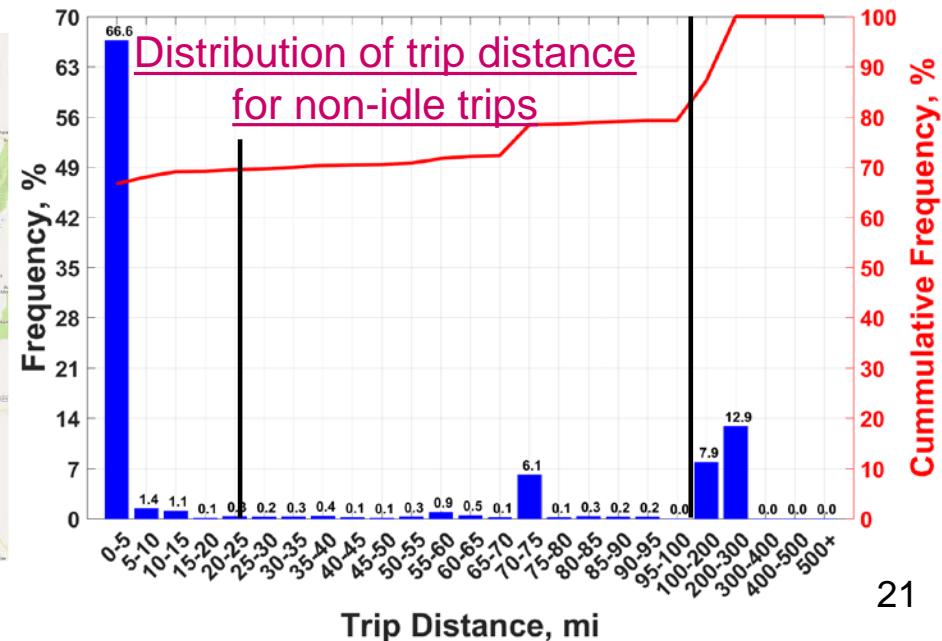

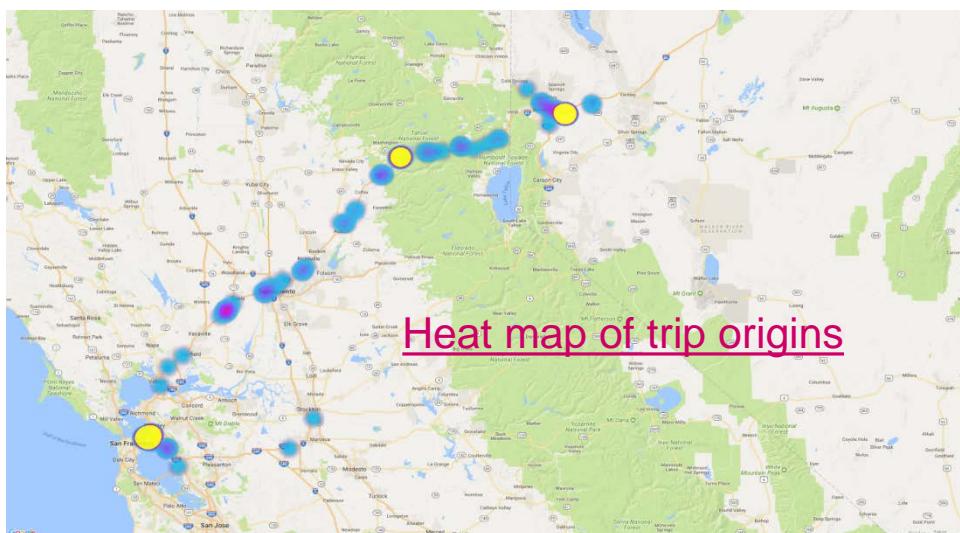

- Primarily short and regional haul
 - Services Greater Sacramento area with some operation further north
- 49% of all trips were non-idle trips.
 - 44% of these were shorter than 25 miles.
 - 4% of these were longer than 100 miles.
 - 77% of VMT > 45 mph.

Container Chassis Fleet CC-NC-1

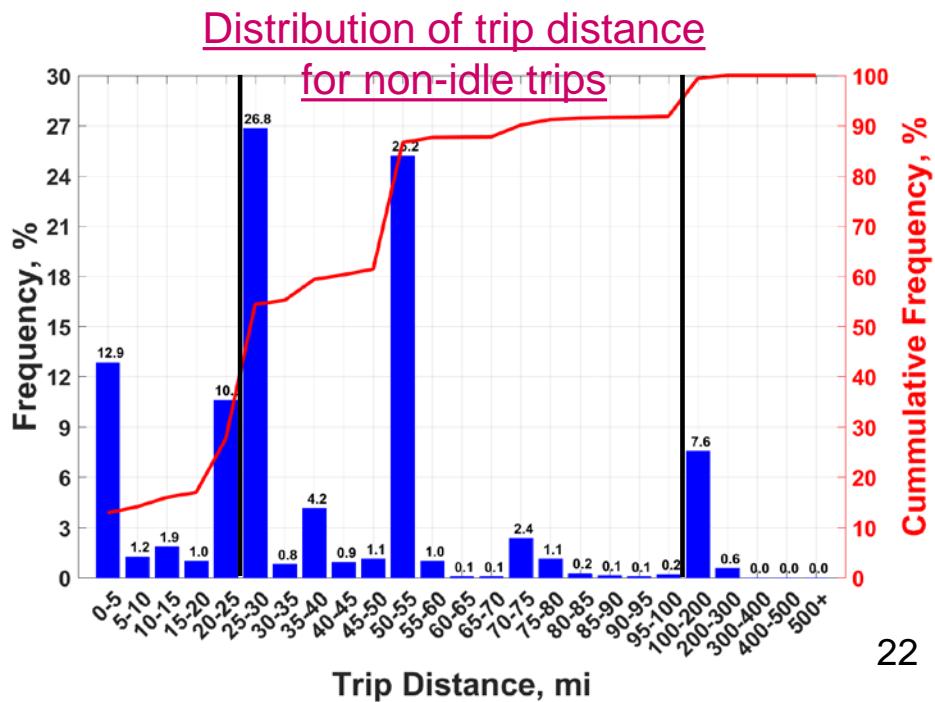

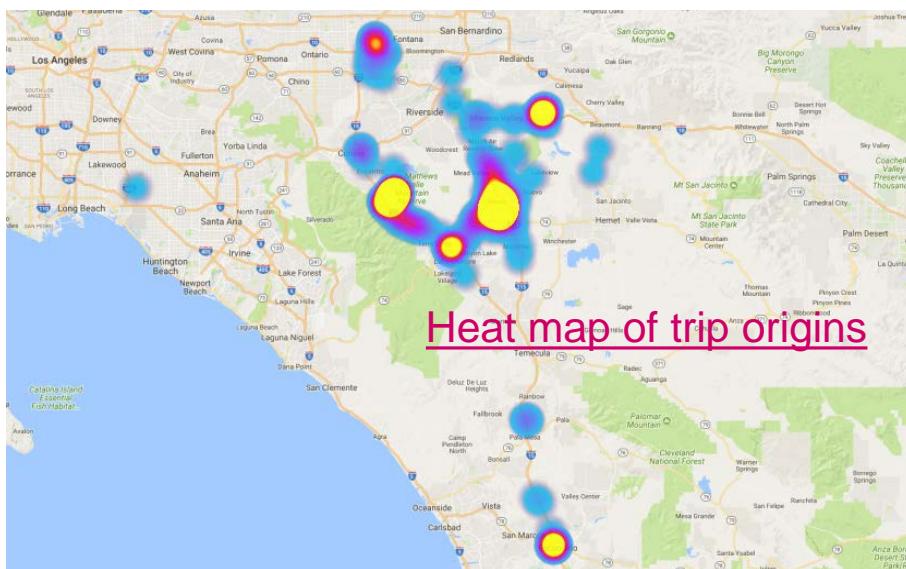

- Short, regional, and long-distance haul
 - Services Port of Oakland, Other Bay Area port locations, Greater Sacramento region, Tahoe, and locations in Nevada
- 34% of all trips were non-idle trips.
 - 67% of these were shorter than 25 miles.
 - 22% of these were longer than 100 mile
 - 90% of VMT >45 mph

Container Chassis Fleet CC-SC-2

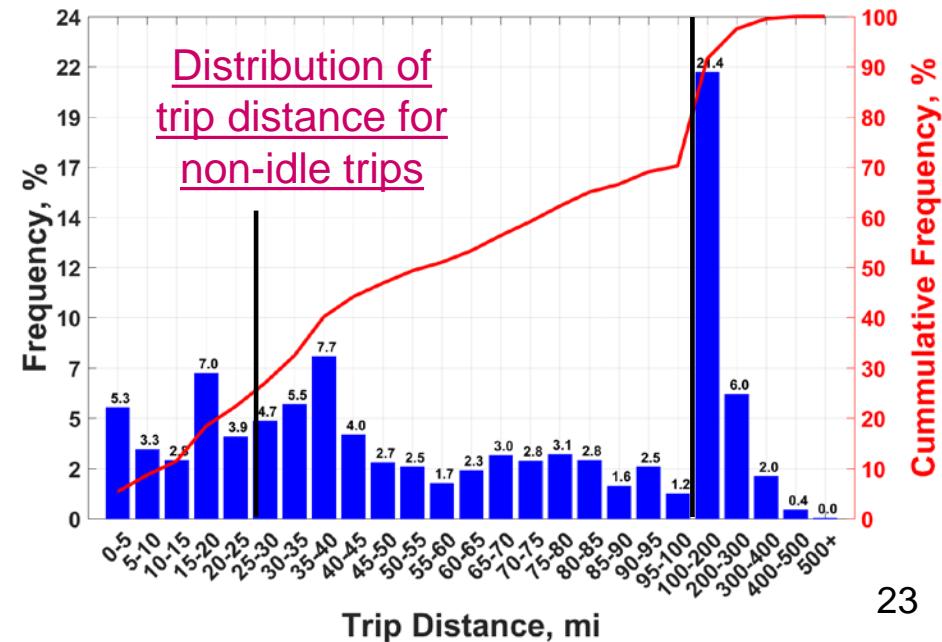

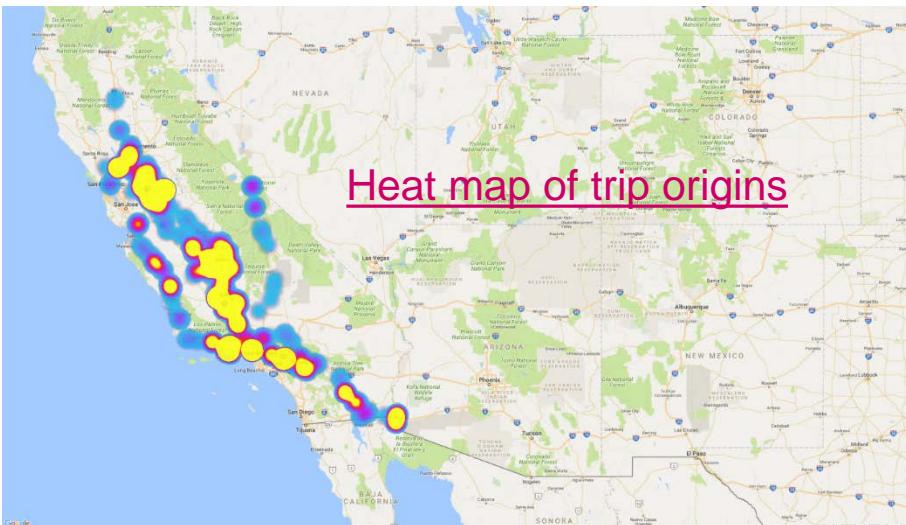

- Primarily local and regional hauling
 - Refuse Hauler in Inland Empire with some San Diego trips
- 48% of all trips were non-idle trips.
 - 27% of these were shorter than 25 miles.
 - 8% of these were longer than 100 mile
 - 67% of VMT >45 mph

Flatbed Trailer Fleet FB-CV-1

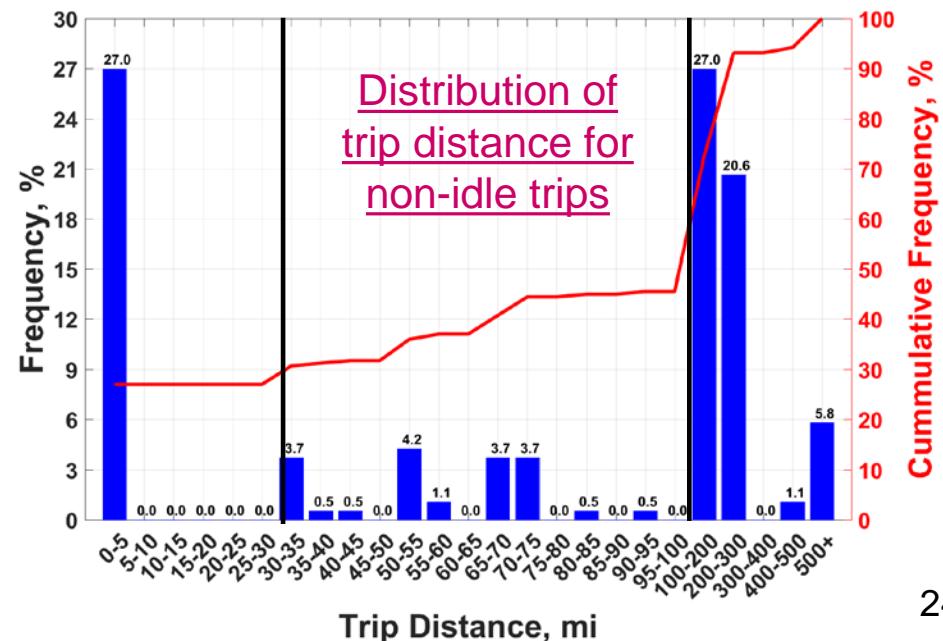

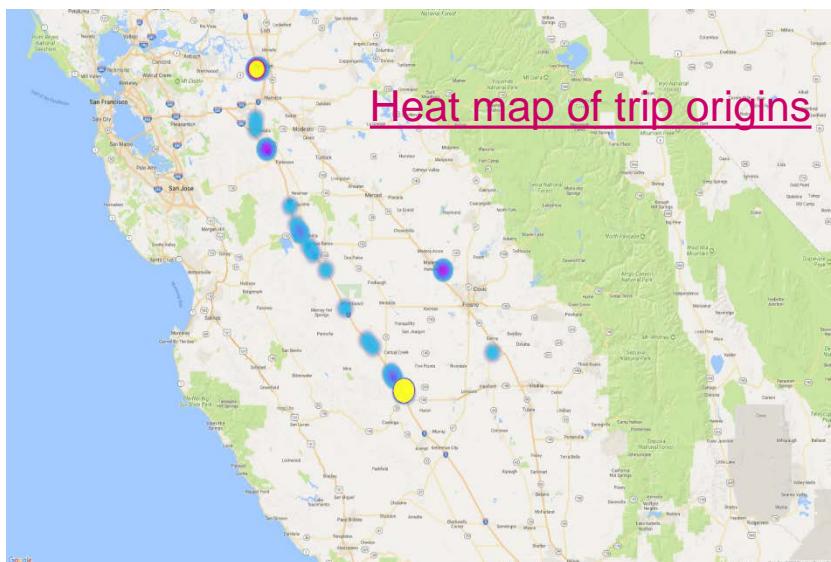

- Short, regional, and long-distance haul
 - Agriculture products hauled throughout the state
- 66% of all trips were non-idle trips.
 - 22% of these were shorter than 25 miles.
 - 30% of these were longer than 100 miles.
 - 84% of VMT > 45 mph.

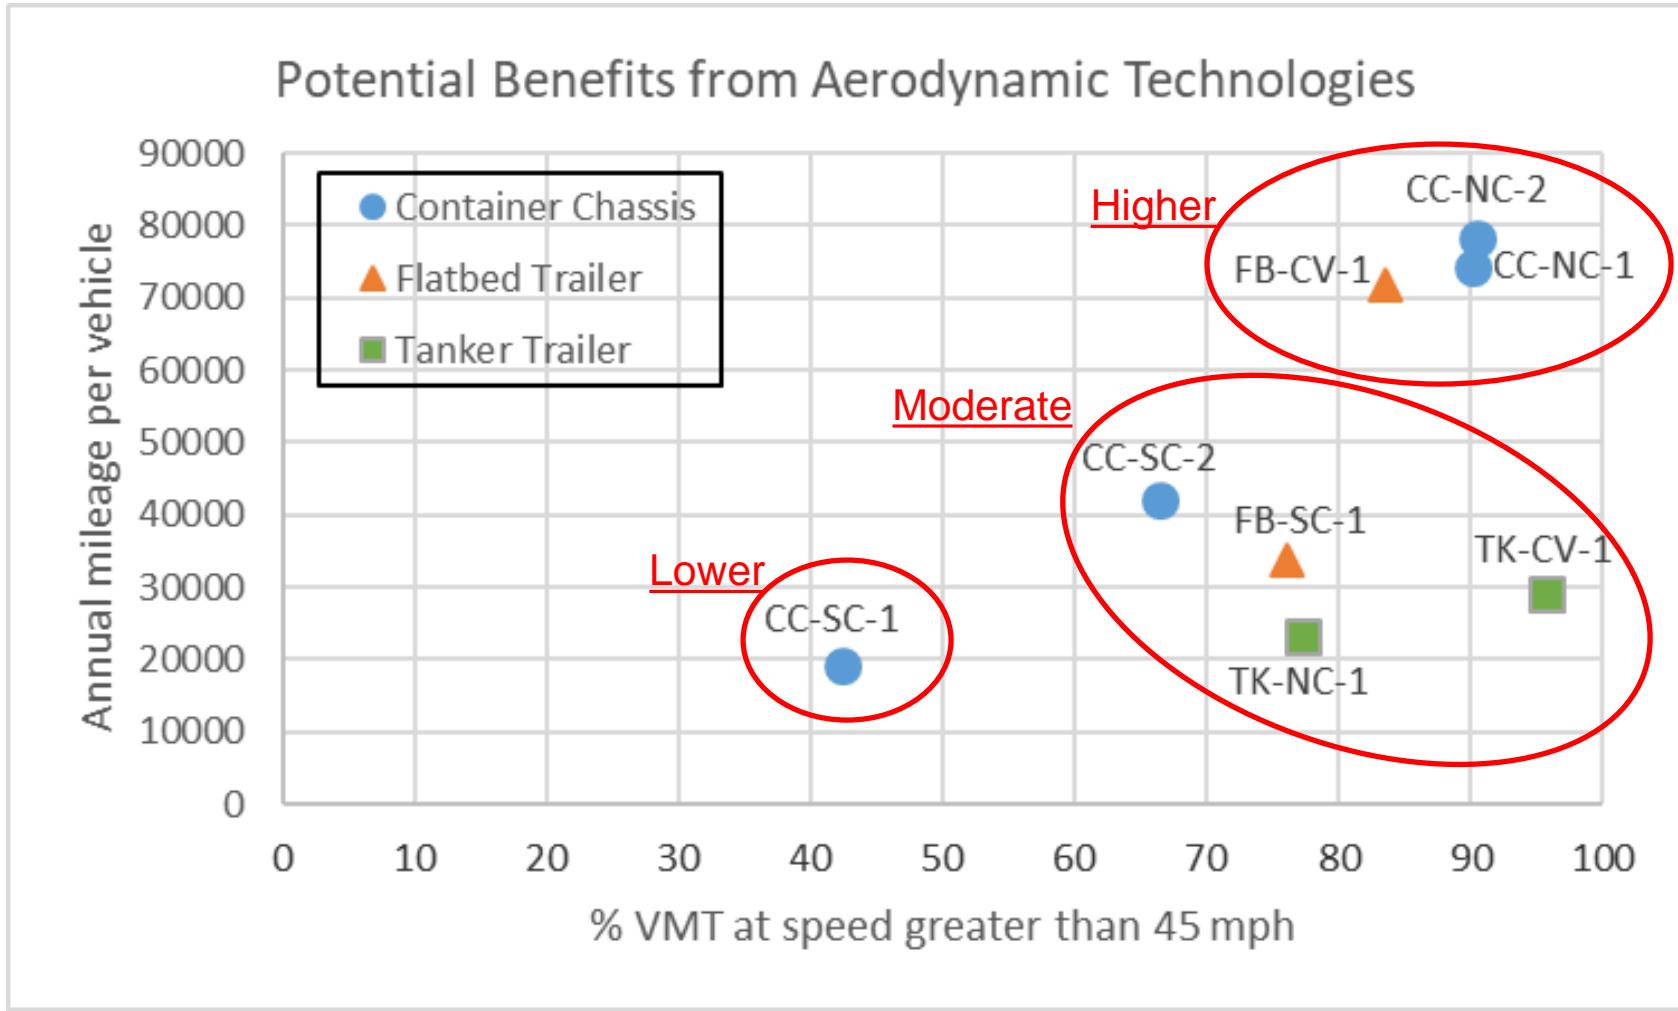

Tanker Trailer Fleet TK-CV-1

- Short, regional, and long haul
 - Dairy products in the Central Valley
- 26% of all trips were non-idle trips.
 - 27% of these were shorter than 25 miles.
 - 54% of these were longer than 100 miles.
 - 96% of VMT > 45 mph.

Comparison among Fleets

Concluding Remarks

- Vehicle activity of 153 tractor-trailers data logged in this study varies.
 - By trailer type and also by fleet within the same trailer type
- For the 8 fleets included in this study:
 - Projected annual mileage per vehicle ranges from 19k to 78k.
 - Fraction of VMT faster than 45 mph ranges from 42% to 96%.
 - Most fleets had $\geq 66\%$ of VMT > 45 mph
- Results indicate that:
 - On average, most fleets would potentially gain significant benefits from aerodynamic technologies on their trailers.
 - Expansion of the Tractor-Trailer GHG regulation may include exemption for fleets or tractor-trailers with low annual mileage traveling mostly at speeds lower than 45 mph.
