RECENT DISSERTATIONS OF INTEREST

Thomas Blackburn

The following list of dissertations, all of which have appeared since a similar list was published in Vol 29, No. 2, 2009 a decade ago, is intended to call attention to significant new scholarship that might be relevant to a reader's particular research interests but might otherwise be overlooked. Some works on the list have since been published in one form or another, though most have not. Summaries can be found in ProQuest: Dissertation Abstracts, which is readily available online, and many can also be obtained in the form of complete texts. Readers are urged to bring any relevant dissertation that may have been inadvertently left off the list to the attention of the editors.
