Land Information Systems in Developing Countries: Bibliography

Compiled by:

**Harlan Onsrud
Jeff Johnson
Patrick Kirby
Ricardo Moreno
Bheshem Ramlal**

**Department of Surveying Engineering
University of Maine
Orono, Maine 04469-5711**

**National Center for Geographic Information and Analysis
Report 94-3**

Acknowledgments

Articles on land information systems and cadastral systems in developing countries are spread among disparate and often difficult to find literature sources. We wish to thank the many individuals who have aided the compilation of this bibliography by offering their own bibliographies, uncovering overlooked articles, supplying copies of articles, and reviewing the draft document. For special thanks we wish to mention Grenville Barnes, Gary Hunter, D. Jeyanandan, Gary Jeffress, John McLaughlin, Susan Nichols, Malcolm Robertson, and Ian Williamson.

We also wish to thank the Department of Geodesy and Geomatics Engineering at the University of New Brunswick and the Land Tenure Center at the University of Wisconsin for allowing us to access the materials in their libraries. Without their past and ongoing efforts on which to build, this bibliography would have been far more difficult to compile and far less comprehensive.

We gratefully acknowledge partial funding for this project by NCGIA which is funded by NSF grant SES 88-10917.
