**Tabulations from an April 2020 Survey
of California Registered Voters
about COVID-19 and Racial Minorities**

by the
Berkeley IGS Poll
Institute of Governmental Studies
University of California, Berkeley

April 16-20, 2020

Introduction

The statistical tabulations in this volume are based on a *Berkeley IGS Poll* completed by the Institute of Governmental Studies (IGS) at the University of California, Berkeley. The poll was administered online in English and Spanish April 16-20, 2020 among 8,800 registered voters statewide.

The survey was administered by distributing email invitations to a random sample of the state's registered voters whose email address was listed on the state's voter registration rolls. The sample was provided to IGS by Political Data, Inc., a leading supplier of registered voter lists in California. In an attempt to improve the representativeness of non-English speaking Latinos, the sample was augmented with additional listings of foreign-born Latinos. Once the questionnaire and email invitations had been finalized, they were translated into Spanish and reviewed for cultural appropriateness. Each email invited voters to participate in a non-partisan survey conducted by IGS and provided a link to the IGS website where the survey was housed. Reminder emails were distributed to non-responding voters and an opt out link was provided for voters not wishing to participate and not wanting to receive future emails from IGS about the survey.

To protect the anonymity of survey respondents, voters' email addresses and all other personally identifiable information were purged from the data file and replaced with a unique and anonymous identification number during data processing. At the conclusion of the data processing phase, post-stratification weights were applied to align the sample to population characteristics of the state's overall registered voter population.

The sampling error associated with the results from the survey are difficult to calculate precisely due to the effects of the post-stratification weighting. Nevertheless, it is likely that the results from the overall sample of registered voters are subject to an approximate sampling error of approximately +/- 3 percentage points at the 95% confidence level. Results based on subgroups of this population would be subject to larger margins of sampling error.

About the Institute of Governmental Studies

The Institute of Governmental Studies (IGS) is an interdisciplinary organized research unit that pursues a vigorous program of research, education, publication and public service. A component of the University of California (UC) system's flagship Berkeley campus, IGS is the oldest organized research unit in the UC system and the oldest public policy research center in the state. The co-directors of the Institute of Governmental Studies are Professor Eric Schickler and Associate Professor Cristina Mora.

IGS conducts periodic surveys of public opinion in California on matters of politics and public policy through its *Berkeley IGS Poll*. The poll, which is disseminated widely, seeks to provide a broad measure of contemporary public opinion, and to generate data for subsequent scholarly analysis. The director of the *Berkeley IGS Poll* is Mark DiCamillo. For a complete listing of stories issued by the *Berkeley IGS Poll* go to <https://igs.berkeley.edu/igs-poll/berkeley-igs-poll>.
