Withdrawal: Selective cleavage of BLM, the Bloom syndrome protein, during apoptotic cell death.

Oliver Bischof, Sanjeev Galande, Farzin Farzaneh, Terumi Kohwi-Shigematsu, and Judith Campisi

This article has been withdrawn by the authors except Dr. Kohwi-Shigematsu, who could not be reached. Fig. 3*B* has a duplication of the top band in *lanes 1* and *3*. Fig. 5*D* has a duplication between the top bands and a horizontal flip of the bottom bands. Fig. 5*E* likewise has a duplication of the top bands excluding the probe lanes and a horizontal flip of the bottom bands. Fig. 6*A* has smaller microscopy images pasted on the background of larger microscopy images.
