The Power of Teamwork: JGI Ergonomics Program

**Christine Naca, Ira Janowitz, Stephen
Franaszek, Ray Turner, Susan Lucas
...and the JGI Ergo Working Group**

Overview

- Description of the JGI
- Review of Production Tasks
- JGI Ergonomics Program
- Ergo Methodology

DOE Joint Genome Institute

- 250 Staff: 30% LLNL and 70% LBNL
- Mix of research and manufacturing work
- Integrated Safety Management (ISM)
- Stephen Franaszek (LBNL)

Walnut Creek, CA

Office & Manufacturing Work Environments

60% staff in computer-intensive office settings

40% staff in hand-intensive production tasks (2 shifts)

Manufacturing Work Environment

- 40% of the staff make up the manufacturing work environment
- High throughput laboratory manufacturing
- Hand-intensive repetitive tasks
- 32 people, 2 shifts/day

Production Short Film

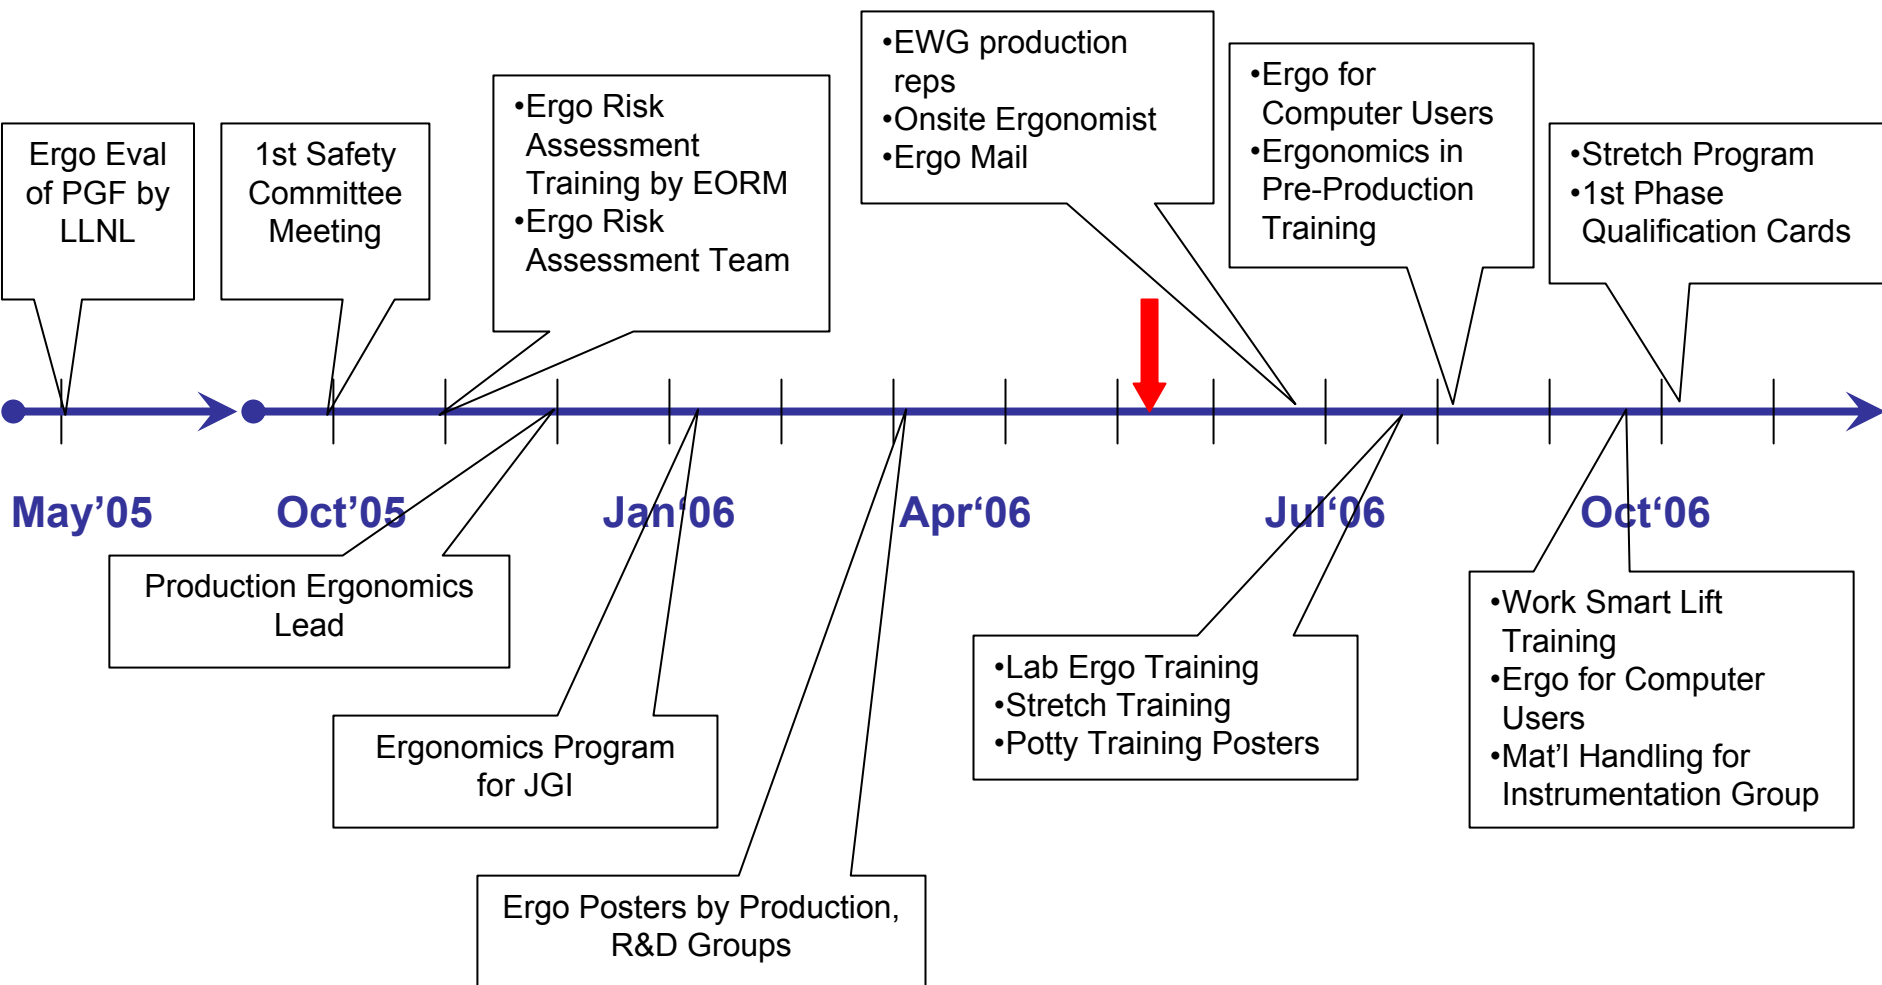

Root Causes of Ergonomic Injuries

- **Equipment/instruments designed for small batches/small lab use now being used for high throughput operation**
- **Culture:**
 - **Understanding Efficiency vs. Speed**
- **High force finger-intensive tasks**

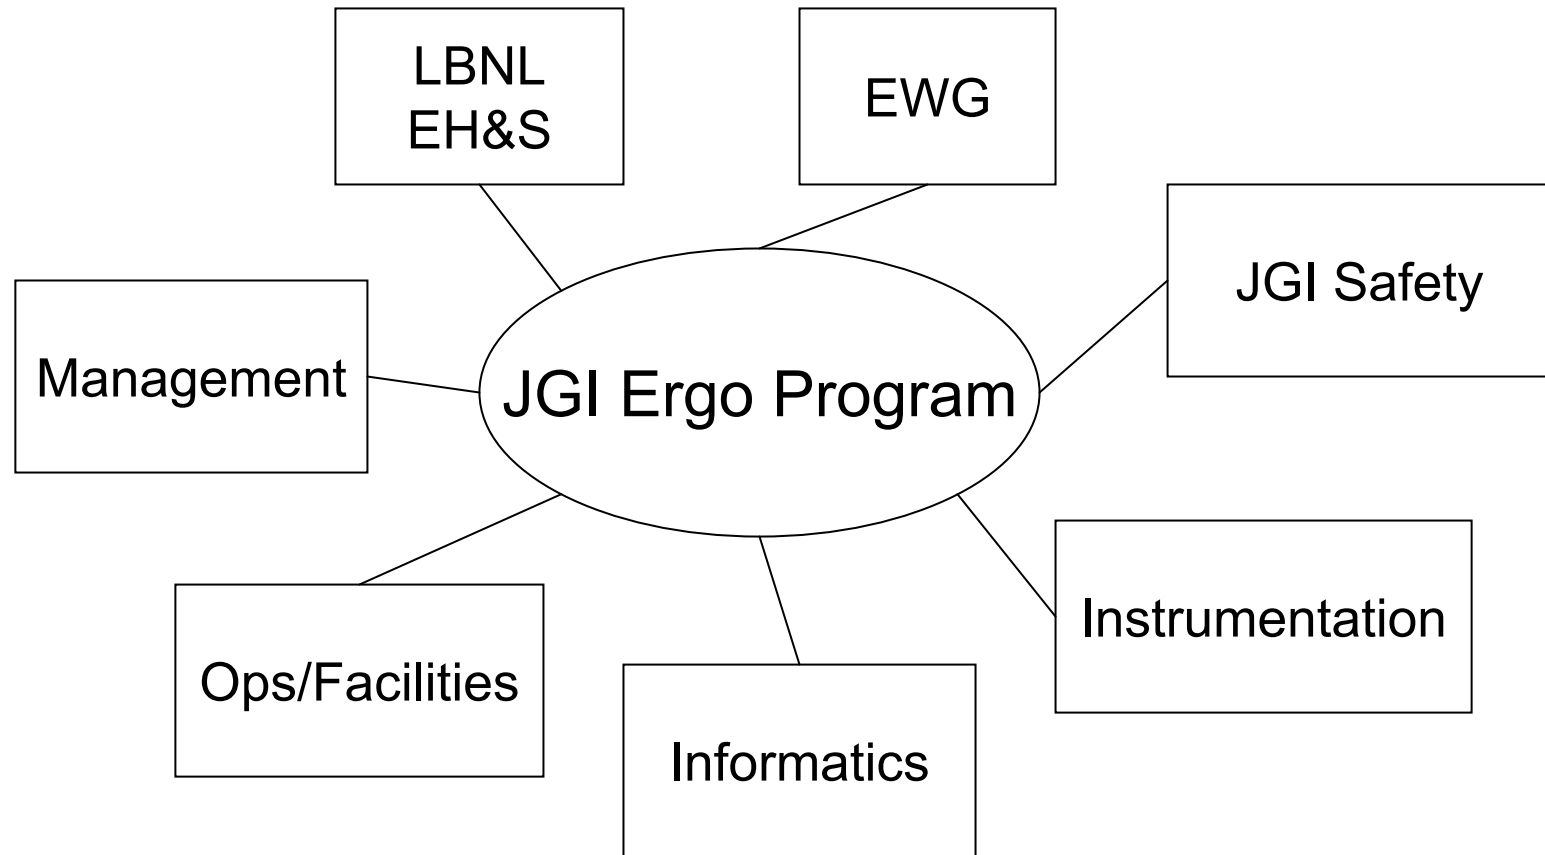

History of Ergonomics at JGI

(May 2005-Current)

Managing Ergonomics Team Effort

Engaging the Staff

Ergonomics Working Group

Current Ergo Project Status

Classification	Category	Closed	In Progress	Grand Total
Administrative		48	8	56
Engineering	Custom	40	17	55
	Off the Shelf	51	16	65
Grand Total		139	41	180

Ergo Projects by Classification

Shake 'N Plate

Before

After

Administrative:

- Leg Room for seated option

Off the Shelf:

- Lighter plates
- Anti-fatigue Mat

Engineering (custom):

- Fixture to hold the plates

Increased Productivity:

- 25% ↑ throughput

Ergo Cup 2007 Winners

“Team Driven Workplace Solutions”

Top 3 High Risk Factor Tasks

Thermal Cycler Loading

Peeling Seals

Freezer Rack Lifting

Thermal Cycler Loading

Before

After

- 84 Autolid Thermal Cyclers
- Pneumatic Pull-out Shelves & adjusted height.
- Networked the instruments

Peeling Seals

- Plate Fixture to hold plates down freeing up both hands to peel
- Ergo Pliers to eliminate the pinch grip while peeling
- Continual Flow eliminates 90% of foil seal peeling
- LBNL custom automated peeler

Before

After

Freezer Rack Lifting

Before

Height adjustable push/pull cart

Administrative Changes:

- Eliminate use of top shelves (onsite)
- Continual Flow reduced frequency of racking

After

Production Wide Ergo Improvements

Height-Adjustable & Custom Designed Tables

Before

The JGI Ergo Program

Why Are We Having Success?

- **Teamwork**
 - Employee-led Ergonomics Working Group
 - Management Commitment
- **Identify Solutions**
 - Quick Fix-Administrative Solutions
 - Long Term-Engineering Solutions
- **On-Site Ergo Support**
 - Rapid Response
 - Encourage Early Reporting
- **Communication/Education**
 - Group Meetings
 - Posters
 - Weekly Ergo Email
 - Custom Ergo Training Courses

Communication and Education

Warm Up Program 1

At JGI we are committed to taking positive actions in helping our employee's prevent repetitive stress injuries. One of these actions is to ask each employee in the production line to take a five-minute break every hour. This break is intended to give the production team some time outside of their work areas to walk, relax, or do this approved program of ergonomic exercises.

Some of these exercises can be performed by our employee's any time during the day in their work areas, but this hallway ergonomic program, designed by Ronnie Balan, a physical therapist at LLNL Ira Janowitz, JGI ergonomist, and approved by Stephen Franaszek, JGI Safety Office, is designed to meet our production employees' specific ergonomic needs efficiently and safely.

Exercises can be done as a group or alone.

Most are done slowly unless noted. All should be held only to a comfortable tension. Start with 3-5 seconds. They should not hurt. If you are under medical care check with your health care practitioner.

As time permits or if discomfort occurs, try some of the movements during the day.

Stretch Posters

JGI ERGO ROOM

Do you ever experience discomfort from using your mouse because it's too small?

Does your keyboard cause you to bend your wrists into an uncomfortable position?

Did you know that there ARE options available?

The JGI now has an ergonomic demo room available to try out alternatives to your standard keyboard and mouse. We have set-up a computer that will enable you to experience a better workstation layout using a mouse and keyboard that fits your needs. The demo room is located in **building 400, room 405**. If you are interested in trying out any of the equipment, please contact Mike Lee in Safety (ext 5649) or via email at: mdlee@lbl.gov to schedule an appointment.

Potty Training

JGI Ergonomic Injury Summary CY 2006-Current

Recordables

First Aid

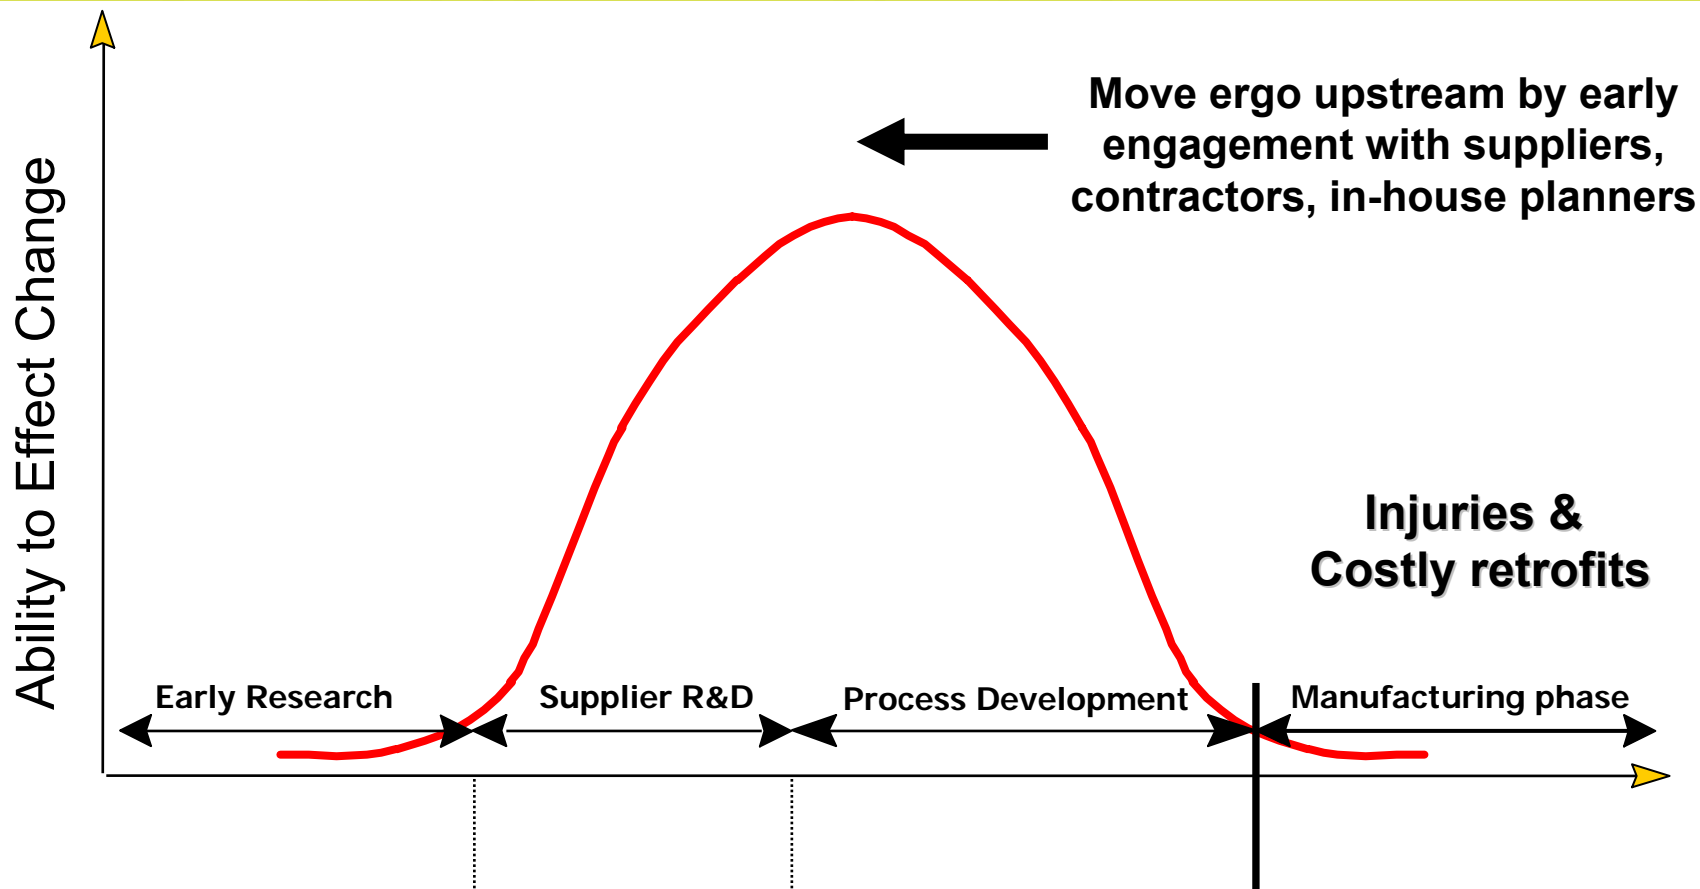

Work Pattern Issues

- **Regular Breaks and Lunch**
- **Mix of hand-intensive activities**
- **Overtime practices**
- **Staffing issues**

The production line has been reorganized by shift instead of by work areas. This will better handle staffing shortages and distribute ergonomic risk across different tasks.

Intel Technology Engagement Model

Low to High Volume Increases Ergonomics Problems
Need to consider duration, repetitiveness + mix of tasks

Plate Loading

Ergo Evaluation Techniques

Semiquantitative Assessment Methods

Quantitative Assessment Methods

Moore-Garg Strain Index

- Estimates the risk of injury to the distal upper extremity (elbow and below)
- Integrates risk factors: force, repetition, posture, recovery time, and duration of the day

Moore-Garg Strain Index

Job / Task: **RCA: Peeling Foil Seals**

Date: **7/27/2006**

Analyst: **Christine Naca, Ira Janowitz**

SI Score Interpretation
 < 3 Safe
 3-5 Uncertain
 5-7 Some Risk
 > 7 Hazardous

Product of all multipliers

SI = **10.1**

Variable	Rating Criterion	Observation	Variable Multiplier	Enter Multiplier	%Max, MVC
Intensity of Exertion (BS is Borg Scale)	Light	Light: Barely noticeable or relaxed effort (BS: 0-2)	1		<25%
	Somewhat Hard	Somewhat Hard: Noticeable or definite effort (BS: 3)	3		25-35%
	Hard	Hard: Obvious effort; Unchanged facial expression (BS: 4-5)	6		35-55%
	Very Hard	Very Hard: Substantial effort; Changes expression (BS: 6-7)	9	6	55-75%
	Near Maximal	Near Maximal: Uses shoulder or trunk for force (BS: 8-10)	13		>75%
Duration of Exertion (% of Cycle)	< 10%		0.5		
	10-29%		1.0		
	30-49%		1.5		
	50-79%		2.0	1.5	
	> 80%		3.0		
Efforts Per Minute	< 4		0.5		
	4 - 8		1.0		
	9 - 14		1.5		
	15 - 19		2.0	1.0	
	> 20		3.0		
Hand/Wrist Posture	Very Good	Perfectly Neutral	1.0		
	Good	Near Neutral	1.0		
	Fair	Non-Neutral	1.5		
	Bad	Marked Deviation	2.0	3.0	
	Very Bad	Near Extreme	3.0		
Speed of Work	Very Slow	Extremely relaxed pace	1.0		
	Slow	Taking one's own time	1.0		
	Fair	Normal speed of motion	1.0		
	Fast	Rushed, but able to keep up	1.5	1.5	
	Very Fast	Rushed and barely/unable to keep up	2.0		
Duration of Task Per Day (hours)	<1		0.25		
	1 - 2		0.50		
	2 - 4		0.75		
	4 - 8		1.00	0.25	
	> 8		1.50

How much is too much?

JGI Production Environment

- **Complex, heterogeneous mix of tasks → difficult to track and control ergo risk exposure**
- **Supervisors need guidelines for assigning workload within safe parameters**

In Summary

- **Collaborative Effort**
- **Continuous Improvement**
- **Proactive and Participatory Ergonomics Program**

Results:

- **Improved Employee Morale**
- **Decreased Recordable Injuries**
