Programme Note:

Mendeleev celebrates chemist Dmitri Mendeleev's invention of the modern periodic table of elements. The piece has been composed to mark the 150 year anniversary of the Russian scientist's revolutionary discovery. The composer intends for *Mendeleev* to remind audiences of this overlooked discovery, which is integral to the world we live in. Mendeleev first realised his method for categorising the elements through a dream. The music carries the listener through this dream like state, predominantly through the use of ambiguous harmony, soft timbres and extended techniques. As the dream progresses, themes are introduced, each one of these musical gestures reflects the properties of a specific element. These themes have been labelled within the score with the element's corresponding chemical symbol.

The modern periodic table of elements has been utilised by the composer as a compositional tool. In addition to basing the themes on the properties of the elements, the atomic structures of each element have assisted in generating material.

"I saw in a dream a table where all elements fell into place as required."

-Dmitri Mendeleev

Performance Notes:

Aleatoric notation has been utilised in some of the parts:

The above notation indicates that the four boxed notes should be repeated rapidly until the wavy line ends, the rhythm and order in which the notes are played can vary, this is at the discretion of the player.

When boxed note heads without stems appear in the woodwind parts these notes should be played with rubato. If each player plays with this freedom of time, parts of the phrase will overlap or become out of sync. This is the desired effect.

The above notation indicates that the harpist should slap the lower strings with the palm.

In harp and percussion parts - a tie indicates that the performer should let the instrument ring/vibrate and not immediately dampen. 

Percussion notes:

A Double Bass bow is required for some sections of the Vibraphone part, this has been clearly marked on the score.

The Marimba and Tom Toms should be played with hard sticks. The Suspended cymbal should be played with soft cymbal beaters.
